## CAUTION:

When powered from the USB bus, do not exceed the 500mA maximum allowable current drain. Damage to the target board or host PC may result.

# Step-by-Step Installation Instructions

1

## Install Software and Tools

Install CodeWarrior Development Studio for S12Z 10.6(Eclipse).

2

## Connect the USB Cable

Connect one end of the USB cable to the PC and the other end to the mini-B connector on the DEVKIT-S12ZVC board. Allow the PC to automatically configure the USB drivers if needed.

3

## Using the Example Project

The pre-loaded example project utilizes the **DEVKIT-S12ZVC** potentiometer and the RGB LED. Once the board is plugged in you can adjust the potentiometer and the RGB LEDs should illuminate/de-illuminate in response. Each color will change when the potentiometer position is adjusted.
