

The Jonard Tools JIC-275 Two Hole Fiber Optic Stripper performs the most common fiber stripping functions. This fiber optic stripper features the following:

- Strips the 600-900 micron buffer coating, and 250 micron coating to expose the 125 micron glass fiber
- The first hole then strips the micro buffer coating to the micron cable
- The second hole strips the micron cable to the glass fiber without nicks or scratches
- Angled jaw guides fiber into the 2nd hole to prevent accidental cutting of the fiber
- Safety lock allows the tool to be easily stored when not in use
- Tool is made of strong high carbon steel and the handle is made of TPR (thermoplastic rubber) for high durability and greater comfort

## SPECIFICATIONS

<b>CUT TYPE</b>	Strip
<b>CABLE TYPE</b>	Jacket, Buffer, Fiber Optic
<b>STRIP DIAMETER</b>	250 micron, 600-900 micron
<b>HANDLE GRIP MATERIAL</b>	TPR (Thermoplastic Rubber)
<b>HANDLE COLOR</b>	Yellow
<b>LENGTH</b>	6" (152 mm)
<b>WEIGHT</b>	0.309 lb (140 g)
<b>UPC #</b>	810053350188
