What is VGA2HDMI

[VGA2HDMI](#) is an open source hardware board which converts signals from VGA to HDMI. This allow old retro computers, game consoles and devices with VGA output to be displayed on modern displays and TVs with HDMI input.

[AgonLight2](#), [AgonOrigins](#) and [Cerberus2100](#) are tested to work with [VGA2HDMI](#).

VGA2HDMI features:

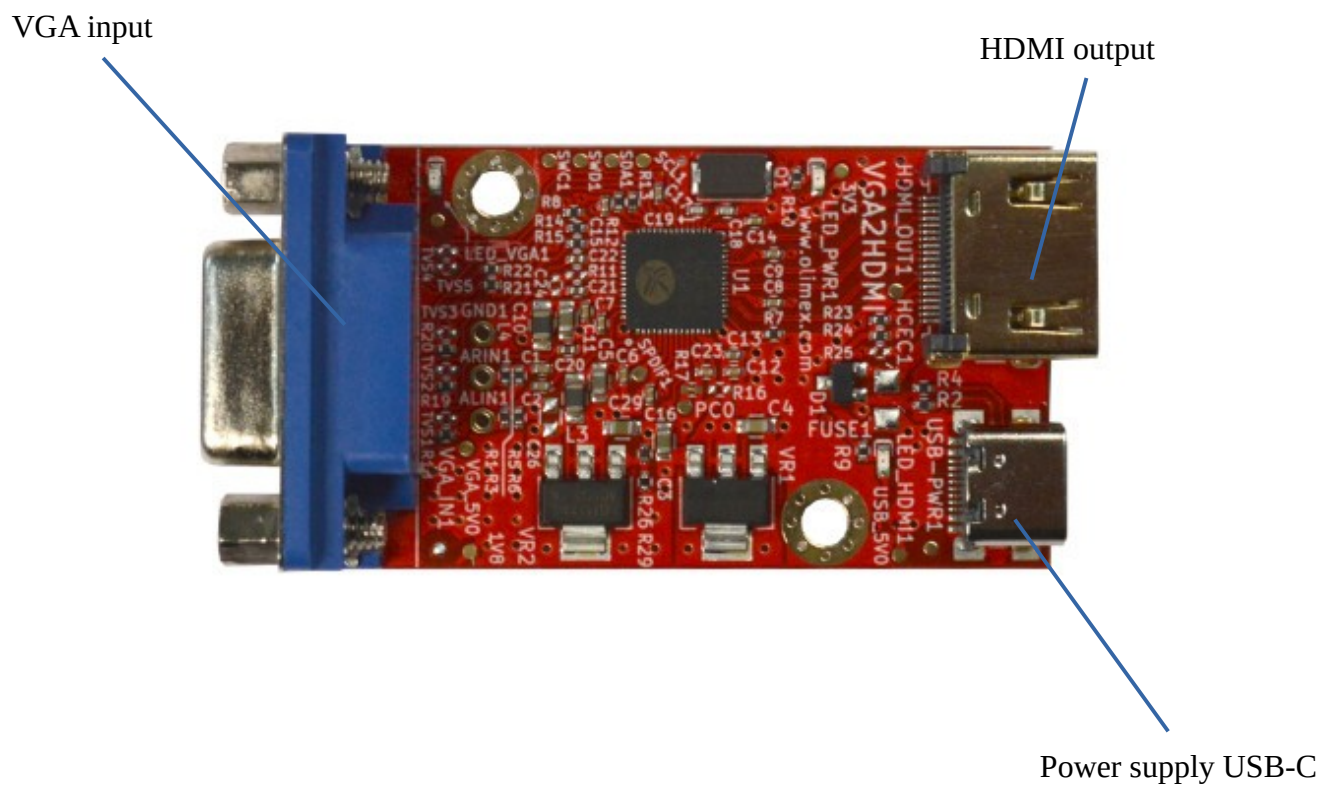

- VGA connector input
- HDMI connector output
- USB-C power supply connector
- Power supply status LED
- VGA signal LED
- HDMI signal LED
- Dimensions are: 51 x 33 mm
