# E5AR

CSM\_E5AR\_DS\_E\_3\_5

**E5AR Digital Controllers offer high speed, high precision, and multiple I/O and use a 5-digit, 3-row LCD display for high visual clarity.**

- A short sampling period of 50 ms enables use in applications requiring high-speed response.
- PV, SP, and MV data is displayed simultaneously in a 3-row, negative LCD display with a backlight.
- Multiloop control, cascade control, and proportional control are possible with a single Controller.
- When using models with CompoWay/F communications, initial settings can be downloaded and settings can be masked using Support Software (CX-Thermo version 4.0 or higher).
- Equipped with calculation functions as a standard (e.g., square root calculation and broken-line approximation).
- DeviceNet Communications  
Data setting and monitoring can be performed without special programming.

Note 1: The supply voltage (i.e., 100 to 240 VAC or 24 VAC/VDC) depends on the model. Be sure to specify the required type when ordering.

- 2: The Controller is equipped with multiple sensor input. Temperature input or analog input can be selected with the input type setting switch. There is basic insulation between power supply and input terminals, power supply and output terminals, and input and output terminals.
- 3: Do not use an inverter output as the power supply. (Refer to *Safety Precautions for All E5AR Models*.)

## ■ Accessories (Order Separately)

### Terminal Cover

E53-COV14 (for E5AR)

### Unit Label Sheet

Y92S-L1

### Rubber Packing

Y92S-P4 (for DIN96 × 96)

Order the Rubber Packing separately if it becomes lost or damaged. (Refer to page 4.)  
The Rubber Packing can be used to achieve an IP66 degree of protection.  
(Deterioration, shrinking, or hardening of the rubber packing may occur depending on the operating environment.  
Therefore, periodic replacement is recommended to ensure the level of waterproofing specified in NEMA4. The time for  
periodic replacement depends on the operating environment. Be sure to confirm this point at your site. Consider one year  
a rough standard. OMRON shall not be liable for the level of water resistance if the customer does not perform periodic  
replacement.)  
The Rubber Packing does not need to be attached if a waterproof structure is not required.

### Mounting Adapters

Y92H-9 (2pcs)

One set is packaged with the product.  
Order Mounting Adapters separately if yours are lost or damaged.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
