

Is Now Part of

ON Semiconductor®

To learn more about ON Semiconductor, please visit our website at
www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (_), the underscore (_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild_questions@onsemi.com.

FSA201 — USB2.0 Full-Speed and Audio Switches with Negative Signal Capability

Features

- 3Ω Typical ON Resistance
- -3db Bandwidth: > 250MHz
- Low Power Consumption
- Packaged in Pb-free 10-pin MSOP and 10-Lead MicroPak™ (1.6 x 2.1mm)
- Power-off Protection on Common D+/R, D-/L Ports
- Automatically Detects V_{BUS} for Switch Path Selection

Applications

- Cell Phone, PDA, Digital Camera, and Notebook
- LCD Monitor, TV, and Set-Top Box

Description

The FSA201 is a Double-Pole, Double Throw (DPDT) multiplexer that combines a low-distortion audio and a USB2.0 Full-Speed (FS) switch path. This configuration enables audio and USB data to share a common connector port. The architecture is designed to allow audio signals to swing below ground. This means a common USB and headphone jack can be used for personal media players and similar portable peripheral devices.

Since USB2.0 is an industry standard for shared data-path in portable devices, the FSA201 also incorporates a V_{BUS} detection capability. The FSA201 includes a power-off feature to minimize current consumption when V_{BUS} is not present. This power-off circuitry is available for the common D+/R, D-/L ports only. Typical applications involve switching in portables and consumer applications, such as cell phones, digital cameras, and notebooks with hubs or controllers.

Ordering Information

| Part Number | Package Number | Packing Description |
|-------------|----------------|---|
| FSA201L10X | MAC010A | 10-Lead MicroPak, JEDEC MO-255, 1.6 x 2.1mm |
| FSA201MUX | MUA10A | 10-Lead MSOP, JEDEC MO-187, 3.0mm Wide |

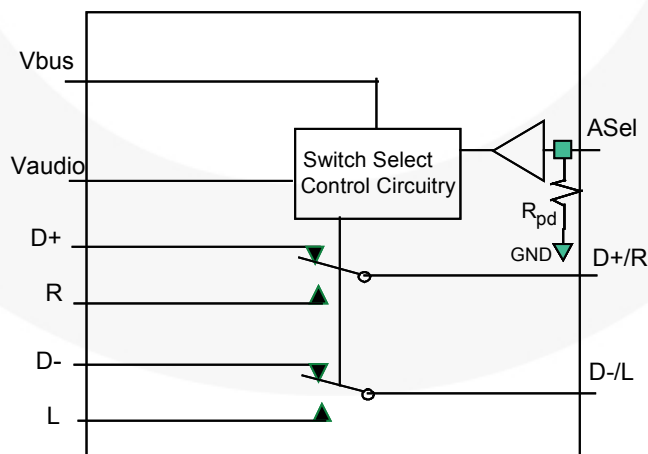

Figure 1. FSA201 Analog Symbol

Pin Assignments

Figure 2. MicroPak™ 10-Pin

Figure 3. MSOP 10-Pin

Pin Descriptions

| Pin # | Name | Description |
|-------|--------------------|--|
| 1, 2 | D+, D- | USB data bus input sources |
| 6 | V _{AUDIO} | Power supply (audio) |
| 3, 4 | R, L | Audio right and left input sources |
| 9 | A _{SEL} | Audio select to override auto USB detect when V _{AUDIO} supply is present |
| 10 | V _{BUS} | Power supply (USB) and auto USB switch-path select |
| 8, 7 | D+/R, D-/L | USB and audio common connector ports |

Truth Table

| A _{SEL} ⁽¹⁾ | V _{AUDIO} | V _{BUS} | L, R | D+, D- |
|---------------------------------|---------------------|---------------------|------|--------|
| LOW | LOW | LOW | OFF | OFF |
| LOW | LOW | High ⁽²⁾ | OFF | ON |
| LOW | HIGH ⁽²⁾ | LOW | ON | OFF |
| LOW | HIGH ⁽²⁾ | HIGH ⁽²⁾ | OFF | ON |
| HIGH | LOW | LOW | OFF | OFF |
| HIGH | LOW | HIGH ⁽²⁾ | OFF | ON |
| HIGH | HIGH ⁽²⁾ | LOW | ON | OFF |
| HIGH | HIGH ⁽²⁾ | HIGH ⁽²⁾ | ON | OFF |

Notes:

1. A_{SEL}- Internal resistor to GND provides auto-V_{BUS} detect if there is no external connection. Forcing A_{SEL} HIGH when V_{AUDIO} is present overrides the USB path even if V_{BUS} is present.
2. H - Value is the threshold as defined to meet USB2.0 V_{BUS} requirements and audio supply threshold in a system (see DC Tables).

Functional Description

The FSA201 is a combined USB and audio switch that enables sharing the D+/D- lines of a USB connector with stereo audio CODEC outputs. The switch is optimized for full-speed USB signals and includes an automatic V_{BUS} -detection circuit. When a USB connector, rather than a headphone, is connected to the ultra-portable device the switch is automatically configured for full-speed USB data transfer. If no V_{BUS} is detected, and yet V_{AUDIO} is present, the switch is configured for the low-distortion audio switch path. The audio switch path also handles negative signals (down to -2V), which eliminates the need for large coupling capacitors.

For those applications where the V_{BUS} is generated as a self-powered device or where V_{BUS} is not removed, the A_{SEL} pin provides the ability to switch, under software

control, to the audio path. The A_{SEL} pin is internally terminated by a resistor to GND (typical value $3M\Omega$) and requires no connection for the standard ultra-portable (cell-phone, MP3, or Portable Media Player). In an application where the supply to the FSA201 V_{BUS} pin is not guaranteed to be removed, a GPIO pin can be used to switch out of full-speed USB mode into audio mode, using the A_{SEL} pin.

The FSA201 V_{BUS} pin must be connected directly to V_{BUS} or a supply $> 3.8V$, not an LDO regulated down to 3.6V or a V_{bat} -generated supply that may fall below 3.8V in normal operation (see the Application Diagram).

Application Diagram

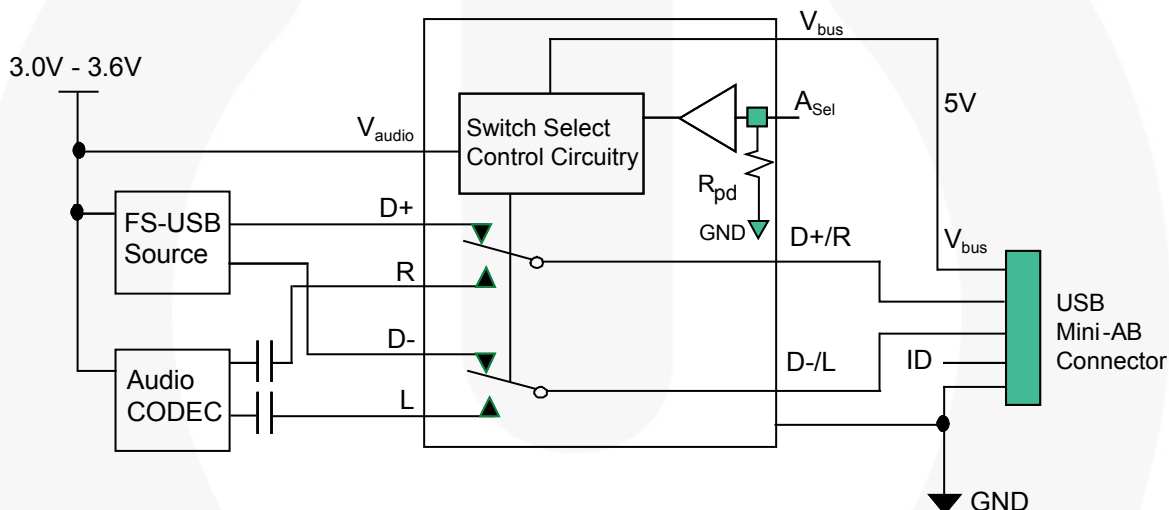

Figure 4. Application Diagram

Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol | Parameter | | Min. | Max. | Unit |
|-------------------------------------|---|-------------------------|--------------------------|--------------------------|------|
| $V_{\text{AUDIO}} / V_{\text{BUS}}$ | Supply Voltage | | -0.5 | 6.0 | V |
| V_{SW} | Switch I/O Voltage ⁽³⁾ | D+, D-, D+/R, D-/L Pins | $V_{\text{BUS}} - 7.0$ | $V_{\text{BUS}} + 0.3$ | V |
| | | R, L, Pins | $V_{\text{AUDIO}} - 7.0$ | $V_{\text{AUDIO}} - 0.3$ | V |
| A_{SEL} | Control Input Voltage | | -0.5 | 6.0 | V |
| I_{IK} | Input Clamp Diode Current | | -50 | | mA |
| I_{SW} | Switch I/O Current (Continuous) | USB | | 50 | mA |
| | | Audio | | 250 | |
| I_{SWPEAK} | Peak Switch Current (Pulsed at 1ms Duration, <10% Duty Cycle) | USB | | 100 | mA |
| | | Audio | | 500 | |
| T_{STG} | Storage Temperature Range | | -65 | +150 | °C |
| T_{J} | Maximum Junction Temperature | | | +150 | °C |
| T_{L} | Lead Temperature (Soldering, 10 seconds) | | | +260 | °C |
| ESD | Human Body Model (JEDEC: JESD22-A114) | I/O to GND | | 10 | kV |
| | | All Other Pins | | 8 | |
| | Charged Discharge Model (JEDEC: JESD22-C101) | | | 2 | |

Note:

- The input and output negative ratings may be exceeded if the input and output diode current ratings are observed.

Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

| Symbol | Parameter | | Minimum | Maximum |
|----------------------|-------------------------------|-------------|---------------------------|---------------------------|
| V_{AUDIO} | Supply Voltage | | 2.7V | 3.6V |
| V_{BUS} | Supply Voltage | | 4.25V | 5.50V |
| A_{SEL} | Control Input Voltage | | 0V | V_{AUDIO} |
| V_{SW} | Switch I/O Voltage | | $V_{\text{AUDIO}} - 6.5V$ | $V_{\text{AUDIO}} - 0.3V$ |
| T_{A} | Operating Temperature | | -40°C | 85°C |
| θ_{JA} | Thermal Resistance (free air) | MicroPak 10 | | 330°C / W (estimated) |

DC Electrical Characteristics

All typical values are at 25°C unless otherwise specified.

| Symbol | Parameter | V _{AUDIO} (V) | Condition | T _A =- 40°C to +85°C | | | Unit |

| Audio Switch Path | | V _{AUDIO} (V) | | | | | |
| | Audio Analog Signal Range | | | V _{AUDIO} – 6.5 | | V _{AUDIO} | V |
| R _{ONAUDIO} | Audio Switch On Resistance ⁽⁷⁾ | 2.7 | V _{L/R} =-2V, 0V, 0.7V, V _{AUDIO} -0.7V, V _{AUDIO} I _{ON} =-100mA, V _{BUS} =0V Figure 5, Figure 13 | | 0.5 | 1.0 | Ω |
| Δ R _{ONAudio} | Audio Delta R _{ON} ⁽⁴⁾ | 2.7 | V _{L/R} =0.7V I _{ON} =-100mA | | 0.01 | 0.10 | Ω |
| R _{FLAT(Audio)} | Audio R _{ON} Flatness ⁽⁵⁾ | 2.7 | V _{L/R} =-2V, 0V, 0.7V, 2V, 2.7V I _{ON} =-100mA | | | 0.35 | Ω |

Notes:

- $\Delta R_{\text{ON}} = R_{\text{ON max}} - R_{\text{ON min}}$ measured at identical V_{CC} , temperature, and voltage. Worst-case signal path, audio or USB channel, is characterized.
- Flatness is defined as the difference between the maximum and minimum values of on resistance over the specified range of conditions.
- Guaranteed by characterization, not production tested.
- On resistance is determined by the voltage drop between the A and B pins at the indicated current through the switch.

DC Electrical Characteristics (Continued)

All typical values are at 25°C unless otherwise specified.

| Symbol | Parameter | V _{AUDIO} (V) | Condition | T _A =- 40°C to +85°C | | | Unit |

DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

PRODUCT STATUS DEFINITIONS

Definition of Terms

| Datasheet Identification | Product Status | Definition |
|--------------------------|-----------------------|---|
| Advance Information | Formative / In Design | Datasheet contains the design specifications for product development. Specifications may change in any manner without notice. |
| Preliminary | First Production | Datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve design. |
| No Identification Needed | Full Production | Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design. |
| Obsolete | Not In Production | Datasheet contains specifications on a product that is discontinued by Fairchild Semiconductor. The datasheet is for reference information only. |

ON Semiconductor and  are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
