

KORE™ Series Cable Protectors

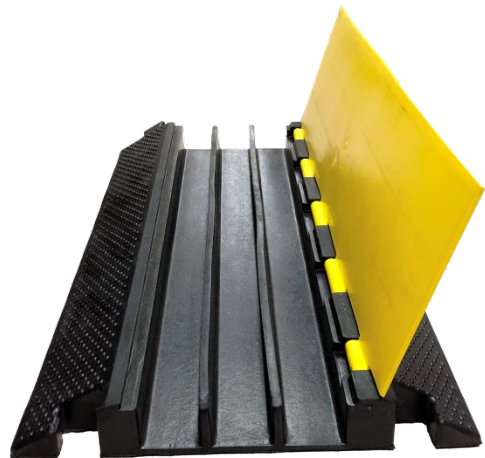

The KORE™ series cable protectors are designed as a temporary solution to protect cables in work zones or large event situations. The single piece, rubber design contains a top hinged, PVC lid for easy access. This protector provides high impact resistance and dynamic load-bearing properties.

The KORE™ series cable protectors are available in 2, 3, or 5 channel pieces which can fit cables measuring up to 1.5 inches in diameter.

Safety warning symbols are molded into the lid's surface and they are skid resistant with rough patterns on all upper surfaces. The bright yellow top provides superior visibility to oncoming vehicular and foot traffic.
