

# CG-425A Pin-Type Li Ion Battery

**Terminal Types** Li Ion Pin cells are only available With Solderable Tabs

\* All models have stainless steel tab with tin (Sn) plating.

### **Features & Benefits**

- A small and slim pin-shaped Lithium Ion battery which expands design options for micro devices.
- · A high-strength metal exterior case provides excellent reliability.
- Rapid charging makes your portable devices more user-friendly.

Part number	CG-425A		
Maximum charging v	4.35V		
Nominal Voltage	3.8V		
Typical Capacity	32.0mAh		
Rated Capacity	30.0mAh		
Dimensions*	Diameter(Max.)	4.7mm	
Dimensions	Height(Max.)	25.0mm	
Weight <sup>*</sup>		Approx. 1.0g	
Operating	Charge	0°C to +60°C	
Temperature	Discharge	-20°C to +60°C	
Maximum continuou	is discharging current	60.0mA(2It)	
Maximum charging o	current	90.0mA(3It)	
Certifications		IEC62133, UL1642	

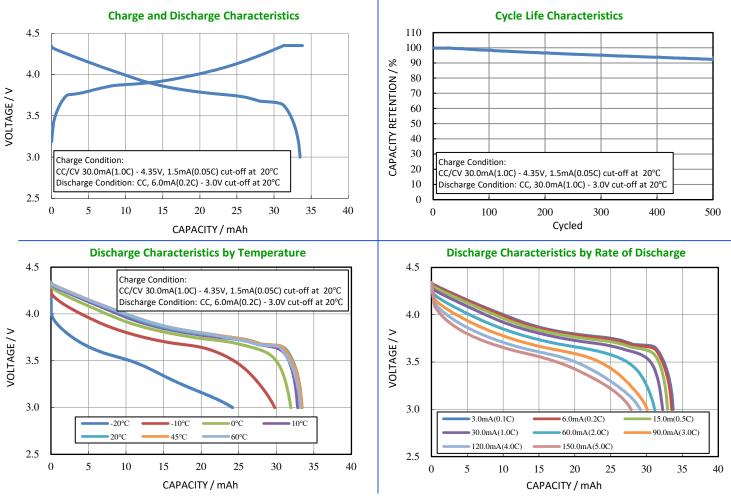

\* Without tabs.

As of March, 2020. The contents of this product information are subject to change without notice.

March 2020 - The contents of this datasheet are subject to change without notice. <u>https://industrial.Panasonic.com/ww/products/batteries/secondary-batteries/pin-li-ion</u> <u>oembatteries@us.panasonic.com</u> (877) 726-2228

## **Battery Characteristics**

This data in this document is for descriptive purposes only and is not intended to make or imply any guarantee or warranty.

## **Handling Guidelines**

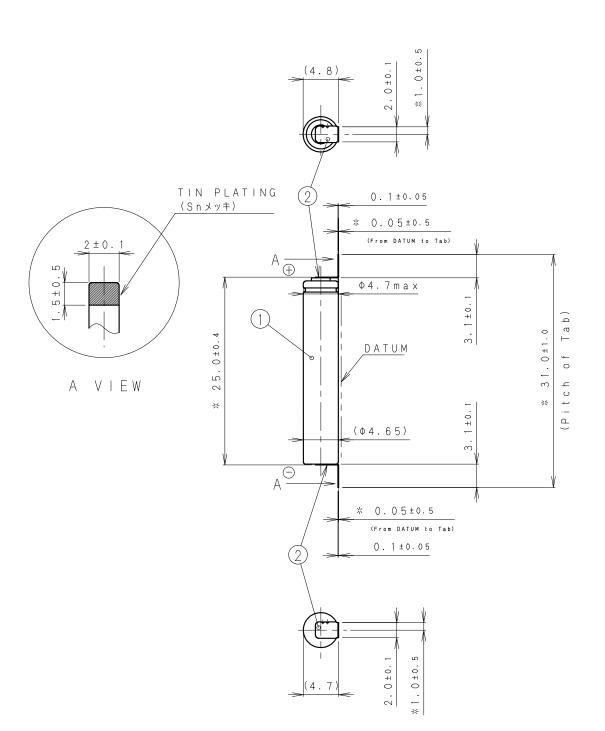

#### 1. Standard Voltage Range is 3.0 - 4.35V. Protection required for over-charge/over-discharge.

Standard Voltage Range	3.0~4.35V
Do not over-charge	Stop charging at 4.45±0.05V
	Allow charging again at less than 4.25±0.05V
Do not over-discharge	Stop discharge at 2.7±0.1V
	Allow discharging again at more than $3.3\pm0.1V$
Over Current Protection	Stop discharge in the case of an out-put connection short circuit.

## 2. In order to prevent accidental ingestion of the battery, it must be inaccessible to the individual user / customer.

The battery will be shipped with tabs. Please attach the battery to the device.

	CG425A Li Ion Pin Cell - Charging Instructions
Charge Temperature	Battery should be charged between 0°C and 60°C.
Charge Voltage between 10°C and 45°C	At ambient temperatures less than 45°C, the charge voltage should be 4.35V maximum.
Charge Current between 10°C and 45°C	At 10°C and higher, the maximum charge current should be 90.0mA(3.0It).
Charging at less than 10°C	Battery should be charged at 30.0mA(1.0It) maximum at 10°C and lower.
Charging between 45°C and 60°C	Charge setting voltage should be maximum 4.25V if the temperature is between 45°C and 60°C.
Charging Low	If the open circuit voltage is less than 3.0V, the battery should be charged at 3.0mA(0.1It) or less until the voltage reaches 3.0V. If the voltage is less than 2.7V, the battery may experience significant reduction in performance.
Charging Low Voltage Battery	If the battery voltage remains less than 3.0V after 1 hour, stop charging.
	If the battery voltage drops to less than 0.5V, terminate charging. The battery may catch on fire, smoke, explode, or cause heat generation.
Charge End	The battery should be fully charged when the current reaches 1.5 mA. The charging process should not be continued below 1.0 mA charging current.
Charge Timer	A timer should be used in all charging profiles. Standard total charge time is 3 hours at specified charge rates.
Charger Control	Charger should have overvoltage protection to prevent charge voltage exceeding 5V even in the case of charger malfunction.
Pulse Charging	Pulse charging is prohibited.

CG425A Li Ion Pin Cell – Battery Protection					
Safety Unit	The Li Ion Pin cell does NOT have a safety unit for battery protection. The Li Ion Pin cell should be used with a safety unit.				
Overcharge Protection	When the battery voltage exceeds 4.45±0.05V, charging should be stopped. Once the battery voltage is less than 4.25±0.05V, charging can resume.				
Overdischarge Protection	When battery voltage is less than 2.7±0.1V, discharging should be stopped. Once battery voltage exceeds 3.3±0.1V, discharging should be restarted.				
Overcurrent Protection	When output terminals are short circuited, discharge should be halted.				

	CG425A Li Ion Pin Cell – Precautions for use
Storage Precautions	<ul> <li>Store the battery at a constant temperature of 5°C to 35°C in order to prevent deterioration from heat.</li> <li>Storage at less than -20°C may cause a leakage.</li> <li>Keep the battery away from high humidity such as 85% RH or higher in order to prevent self-discharge caused by corrosion.</li> <li>Keep the battery away from heat sources i.e., boiler, radiator and etc., and from direct sunlight.</li> <li>Please be careful not to generate dew condensation due to sudden change of storage temperature.</li> <li>In the case of long-term storage such as over 1 month, please store the battery in a cool, dry place approximately 20°C.</li> </ul>
Operation Temperature	Refer to the operating temperature range on page 1 on the datasheet. Extended operation or storage at the high end of the temperature range may reduce battery life.
Soldering	Do not solder anything directly to the battery. Battery with tab When soldering a battery with tab, make sure that soldering iron does not touch the battery directly. Soldering shall be done within 5sec with iron front temperature at about 350°C, and the battery surface temperature shall not exceed 85°C. Internal components of the battery, including the separator and gasket, are made with resin and can be damaged by high temperature causing possible leakage. Avoid dust, foreign matter and heat generating components. Please pay close attention to avoid possible external short-circuit between the positive tabbing and the negative case due to the close proximity between them. (1)the design of the circuit board pattern (2)the method of securing the battery onto the board (3)the process of mounting the battery to the board
Series and Parallel Connections	Please contact Panasonic regarding series and parallel connections.
Mounting	The battery must be inaccessible to the individual user / customer.

	CG425A Li Ion Pin Cell – Precautions for use
Used Battery	Please dispose according to regional rules, laws and regulations.
Prohibitions	<ul> <li>Please observe the following:</li> <li>If NOT observed, the battery may catch on fire, smoke, explode, or cause heat generation.</li> <li>*Never use other than in the applied voltage range(3.0~4.35V).</li> <li>*Never disassemble the battery.</li> <li>*Never deform the battery.</li> <li>*Never give a strong shock to the battery and never throw it.</li> <li>*Pack the battery securely for transport.</li> <li>*Never throw the battery into fire or water.</li> <li>*Never expose to heat or flame.</li> <li>*Never expose to heat or flame.</li> <li>*Never connect the battery to conditions higher than 85°C.</li> <li>*Use authorized chargers or observe charging conditions specified in this document for battery to an AC outlet or DC automotive plug.</li> <li>*Stop charging if the charging process cannot be finished.</li> <li>*Never reverse the polarity (+) and (-).</li> <li>*Never reverse the polarity (+) and (-).</li> <li>*Never reverse the polarity (+) and (-).</li> <li>*Never use different types of batteries together. Avoid using this battery and dry-cell battery, coin-type lithium battery, old and new batteries, any other combination of rechargeable batteries.</li> <li>*Never forcibly discharge.</li> <li>*Keep out of the hands of children. There is a possibility of accidental ingestion.</li> <li>*Never place the battery in or near a microwave or other cooking appliances.</li> <li>*Inediately stop using the battery gets into your eyes, immediately flush your eyes with clean water and seek medical attention. If left untreated, it will cause significant eye damage.</li> </ul>

#### Li Ion Pin Cell – Disclaimer

- 1) You shall not alter, change, repair, improve or modify our battery ("Battery"). Panasonic Corporation ("Panasonic") shall not be responsible for any issues caused by modifications to the Battery taken place after that the Battery is delivered to the customer.
- 2) Panasonic shall not warrant or be responsible in any case where you fail to carry out proper handling, operating, installation, testing, service and checkout of the Battery and/or to follow the instruction, cautions, warnings, and notes provided in this data sheet.
- 3) In no event shall Panasonic be responsible for any defects of the Battery or any performance of any devices in which the Battery are incorporated.
- 4) Panasonic makes no representation or warranties, express or implied, with respect to the Battery, including, but not limited to, the implied warranties of merchantability and of fitness for a particular purpose.
- 5) Panasonic shall not take any responsibility for the use or incorporation of the Battery for or into devices for which failure or malfunction of the Battery may directly jeopardize life or cause threat of personal injury, such as for medical equipment, vehicle equipment, aircraft and aerospace equipment, aircraft electronics equipment, explosion-proof equipment or any other similar equipment.
- 6) IN NO EVENT SHALL PANASONIC, REGARDLESS OF THE LEGAL REASON, TORT OR OTHERWISE, BE LIABLE TO YOU AND/OR ANY THIRD PARTIES FOR ANY LOST PROFITS OR FOR SPECIAL, DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING, WITHOUT LIMITATION, ANY LOSS, DAMAGES, COSTS AND EXPENSES ARISING FROM OR IN CONNECTION WITH THE USE OF THE BATTERY AND/OR ANY LOSS OF ELECTRICAL POWER, COMMUNICATION AND DATA.
- 7) You shall, to the extent available under applicable law, defend, indemnify and hold Panasonic, its customers, and its and their respective officers, directors, agents, servants, affiliates. representatives and employees (collectively, "Panasonic Parties") harmless from and against all losses, liabilities, damages, claims, demands, actions, proceedings, lawsuits, judgments, governmental orders, recalls, proposed recalls and all costs and expenses, including but not limited to reasonable attorneys' fees and other professionals' fees and expenses incurred in the investigation or defense thereof or the enforcement of rights hereunder, in each case whether or not resulting from third party claims (collectively, "Claims"), arising out of or in connection with the Battery. For the avoidance of doubt, you shall defend, indemnify and hold the Panasonic Parties harmless from and against any and all Claims arising out of or in connection with (i) death or injury to any person, or damage to any property, resulting, directly or indirectly, from the design, manufacture, assembly, purchase, sale, use, operation or disposal of the Battery, (ii) any loss of an electrical power, communication or data due to the Battery regardless of the cause thereof, or (iii) your failure to comply with the terms and conditions set forth in this disclaimer.
- 8) This disclaimer may be subject to change without notice.
