QuickNet[™] Copper Cabling System

The QuickNet™ Copper Cabling System provides a custom, pre-terminated cabling solution which meets unique requirements. Fast and simple to install, the system enables quick network deployment, increased reliability, and lower total cost of ownership as compared to field terminated installations. Engineered for maximum design flexibility and high rack density utilization (up to 48-ports in one rack space), the system offers 100% factory tested pre-terminated cable assemblies in custom lengths and configurations. QuickNet™ Angled and Flat Patch Panels accept QuickNet™ Pre-Terminated Cassettes, Patch Panel Adapters, and Blanks, which snap in and out, with one hand, for quick installation.

Key	Features	Benefits

Pre-terminated	Controlled factory environment provides consistent network performance while reducing installation time and on-site waste as compared to field-terminated installations				
100% factory tested	Eliminates the time and cost associated with on-site testing and ensures verified performance (permanent link test data supplied with each cable assembly)				
Wide range of cable types and performance levels	Category 6A UTP/STP and Category 6 UTP performance levels available in plenum or riser cable fire ratings				
Wide range of termination configurations and custom lengths	Cable assemblies allow customization including pre-terminated cassettes, jack modules, modular plugs, plug packs, and/or unterminated cable options to provide design flexibility for all installations in lengths from 10' to 295' (1' increments)				
Pre-terminated cassettes	Snap in and out of QuickNet™ Patch Panels and include an integral release tab to ensure easy on-site moves, adds, and changes				
Plug packs	Facilitate quick and easy connection and disconnection to a variety of switches, reducing time and cost associated when installing and maintaining structured cabling links				
Patch panel adapter	Snaps in and out of QuickNet [™] Patch Panels and accepts Mini-Com [™] Modules for UTP, fiber optic and audio/visual applications				
Standard and high-density solution	QuickNet [™] Patch Panels in angled and flat designs enable 24 and 48-ports in one rack unit for efficient rack space utilization				
Assembly identification	Each cable assembly label includes part number, performance level, and serialized quality assurance number for future traceability; custom cable assembly and/or individual cable labels available upon request				
Integrated bonding and grounding	Innovative shielded cassette and shielded jack design provides linear conductive path for proper bonding to QuickNet™ Shielded Metal Patch Panels				
Keyed connectivity (optional)	Mechanically and visually distinguished connectivity prevents unintentional insertion into unlike keyed or non-keyed ports, offering additional network design flexibility and versatility accommodating the need for a more discrete network				

Technical Information

- Each QuickNet[™] Cable Assembly is factory tested to electrical permanent link specifications
- TX6A[™] 10Gig[™] Copper Cabling Systems exceed requirements of ANSI/TIA-568-C.2, ISO 110801 Class Ea Edition 2.1, and IEEE 802.3an standards for supporting 10GBASE-T requirements
- TX6500[™] and TX6000[™] Copper Cabling Systems exceed ANSI/TIA-568-C.2 and ISO 11801 2nd Edition Class E standards
- Jack modules utilize patented Giga-TX[™] Technology which optimizes performance by maintaining cable pair geometry and eliminating conductor untwist
- Modular plugs meet all applicable ANSI/TIA-968-A requirements and exceed IEC 60603-7 specifications

QuickNet™ Patch Panel and Accessories Ordering Information

Part Description	No. of Rack Spaces	Std. Pkg. Qty.
Angled 24-port patch panel.	1	1
Angled 48-port high density patch panel.	1	1
Angled 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications.	1	1
Flat 24-port patch panel.	1	1
Flat 48-port high density patch panel.	1	1
Flat 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications.	1	1
Flat 24-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules.	1	1
Flat 48-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules.	1	1
Angled 24-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules.	1	1
Angled 48-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules.	_	1
Patch panel adapter accepts all Mini-Com ™ Modules for multimedia applications.		1
Patch panel blank reserves space for future use and promotes proper airflow and cooling.	-	1
Label/label cover kit for 24-port QuickNet ™ Patch Panels.	_	1
Removal tool allows individual cables to be removed from plug pack without disruption of other network connections.	_	1
Lock-in device prevents unauthorized removal of cables from the plug pack.	_	10
QuickNet [™] Plug Pack individual housing accepts six RJ45 modular plugs.	_	1
QuickNet ™ Recessed Plug Pack individual housing accepts six RJ45 modular plugs.	_	1
	Angled 24-port patch panel. Angled 48-port high density patch panel. Angled 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications. Flat 24-port patch panel. Flat 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications. Flat 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications. Flat 24-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Flat 48-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Angled 24-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Angled 48-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Patch panel adapter accepts all Mini-Com ™ Modules for multimedia applications. Patch panel blank reserves space for future use and promotes proper airflow and cooling. Label/label cover kit for 24-port QuickNet ™ Patch Panels. Removal tool allows individual cables to be removed from plug pack without disruption of other network connections. Lock-in device prevents unauthorized removal of cables from the plug pack. QuickNet ™ Plug Pack individual housing accepts six RJ45 modular plugs.	Angled 24-port patch panel. Angled 48-port high density patch panel. Angled 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications. Flat 24-port patch panel. Flat 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications. Flat 24-port patch panel. Flat 48-port high density patch panel with pre-printed vertical numbering on each port for switch applications. Flat 24-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Flat 48-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Angled 24-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Angled 48-port shielded all metal patch panel, for use with shielded QuickNet ™ Pre-Terminated Cassettes and Shielded Jack Modules. Patch panel adapter accepts all Mini-Com ™ Modules for multimedia applications. Patch panel blank reserves space for future use and promotes proper airflow and cooling. Label/label cover kit for 24-port QuickNet ™ Patch Panels. Removal tool allows individual cables to be removed from plug pack without disruption of other network connections. Lock-in device prevents unauthorized removal of cables from the plug pack. QuickNet ™ Plug Pack individual housing accepts six RJ45 modular plugs.

"Custom cable assembly labels are available up to eighteen characters; individual cable labels are available up to litteen characters.
**For cable assemblies constructed of Category 6A (TX6A-SD™ 106ig™) UTP MaTriX Copper Cable, the maximum length is 196 ft. (60m).
All connectivity is wired T568B. Category 6 Enhanced Performance level utilizes Panduit® TX6500™ Category 6 UTP Cable. Permanent link test results shipped with each cable assembly.
