

Data Sheet AMI-4440-TT-C

Features:

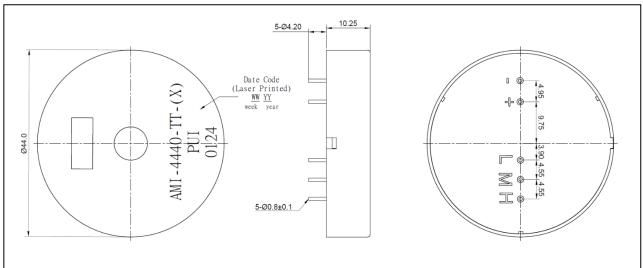

- Piezo Indicator
- IEC 60601-1-8 Compliant Cardiovascular Tone

Specifications

Parameters	Values	Units
Rated Voltage	5	VDC
Operating Voltage Range	3.3 ~ 5	VDC
Input Peak Current	150	mA
(Maximum at 5VDC)		
Standby Current	12	mA
(Maximum at 5VDC)		
Active Current	20	mA
(Maximum at 5VDC / LMH Tones)		
Minimum SPL	80	dBA
(Measured at 10cm / 5VDC)		
Typical SPL	80 ~ 90	dBA
(Measured at 10cm / 5VDC)		
Frequency Range	$150 \sim 4000$	Hz
Storage Temperature	-30 ∼ +85	°C
Operating Temperature	-30 ∼ +85	°C
Weight	9	Grams
Housing Material	ABS (black)	-
Terminal Type	Thru-Hole / Pins	-
Acceptable Soldering Methods	Hand Solder, Wave Solder	-
Environmental Compliances	RoHS/REACH	-
Sound Type	Cardiovascular IEC60601-1-8 Compliant	

©2024, PUI Audio Inc.

Dimensions

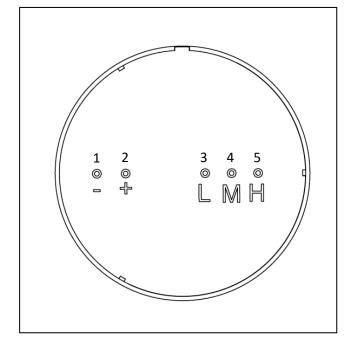

Pin Labeling / Function

Pin	Name	Function	
1	-	Power Supply (-)	
2	+	Power Supply (+)	
3	Low	Low Priority Alarm Control	
4	Medium	Medium Priority Alarm Control	
5	High	High Priority Alarm Control	

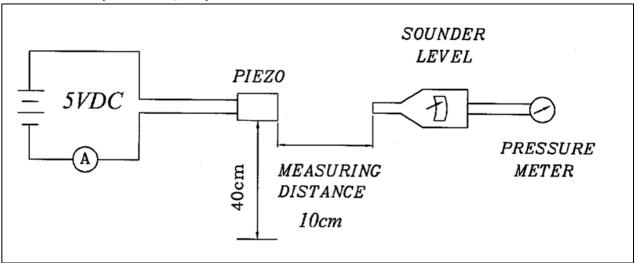

Controls

LONUTOIS				
Priority	Description	Connection		
Standby	Silence	(+) → DC+		
(off)		(-) → Ground		
Low	2 alerts repeated	(+) → DC+		
	every 20 seconds	(-) → Ground		
		• L pin to (-)		
Medium	3 alerts repeated	(+) → DC+		
	every 10 seconds	(-) → Ground		
		• M pin to (-)		
High	10 alerts	(+) → DC+		
	repeated every 3	(-) → Ground		
	seconds	• H pin to (-)		

Measurement Method

Standard Test Fixture (Distance: 10cm, 5VDC)

Reliability Testing Standard Test Condition (+5~+35°C, 45~85% RH)

	lition (+25±2°C, 60~70% RH)	_
Type of Test	Test Specifications	Judgement
Solderability	Lead terminals immersed in rosin for 5 seconds, then immersed in solder bath of +270±5°C for 3±1 seconds.	Minimum 90% of lead terminals shall be wet with solder (excluding terminal edges) after test.
Soldering Heat Resistance	Lead terminals immersed up to 1.5mm from part body in solder bath of +300±5°C for 3±0.5 seconds or +260±5°C for 10±1 seconds	No interference in operation after test.
Vibration	1.5mm amplitude vibration with 10-55Hz vibration band frequency applied to each XYZ directions for 2 hours. Dropped onto wooden board 4cm thick in each	Value of oscillation frequency/current consumption should be within 10% of initial value. SPL should deviate no more than ±10dB SPL of
Drop	XYZ axis 3 times (9 total).	initial value.
High Temperature	Temperature: +85°C Duration: 240 hours	
Low Temperature	Temperature: -30°C Duration: 240 hours	
Humidity	Temperature: +40°C Relative Humidity: 90±5% Duration: 240 hours	Allow 4 hours rest at +25°C after each test.
Temperature Cycle	+25°C +25°C +25°C +25°C	Value of oscillation frequency/current consumption should be within 10% of initial value. SPL should deviate no more than ±10dB SPL of initial value. Allow 4 hours rest at +25°C after each test.
Continuous Life	Duty Cycle: Continuous Voltage: 5V Temperature: +70°C Duration: 48 hours	Value of oscillation frequency/current consumption should be within 10% of initial value. SPL should deviate no more than ±10dB SPL of initial value.
Intermittent Life	Duty Cycle: 1 minute on, 1 minute off Voltage: 5V Temperature: +25±2°C Duration: Minimum 5000 cycles (each tone)	ilitiai value.

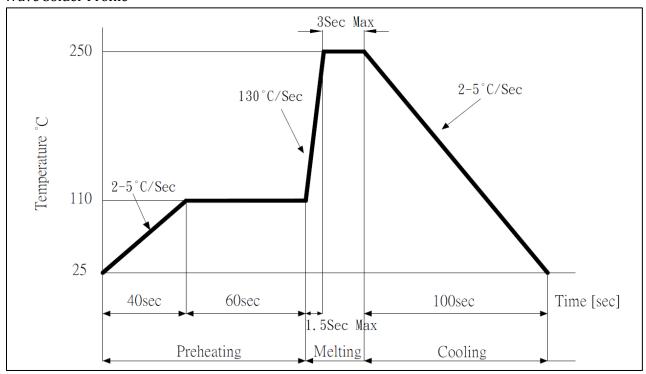

Recommended Soldering Practices

Manual / Hand Solder:

Solder Temperature: 330°C ~ 380°C

Max Solder Time: 2 seconds

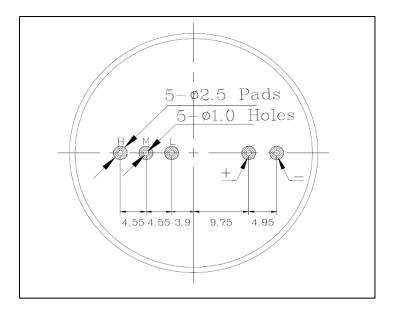

Wave Solder Profile

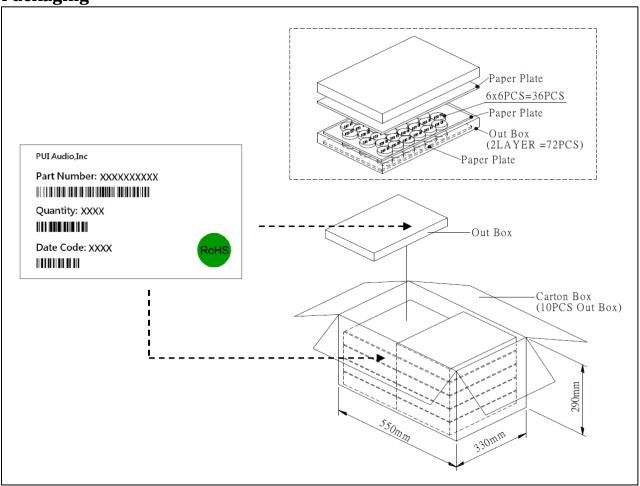

Recommended Land Pattern

This land pattern is advisory only and its use or adaptation is entirely voluntary.

<u>PUI Audio disclaims all liability of any kind associated with the use, application, or adaptation of this land pattern.</u>

Packaging

Specifications Revisions
