

SMT Power Inductors

Power Beads - PA4792.XXXHL and PA4793.XXXHL

Current Rating: PA4792 (100Apk), PA4793 (60Apk)

Inductance Range: 230nH to 500nH

Height: 7.25mm Max (PA4792)
6.6mm Max (PA4793)

Footprint: 22.2mm x 8.2mm Max (PA4792)
15.1mm x 8.6mm Max (PA4793)

Electrical Specifications @ 25°C — Operating Temperature -40°C to +130°C⁷

Part Number	Inductance ¹ @ 0A _{DC} (nH ±10%)	Inductance ² @I _{rated} (nH TYP)	I _{rated} ³ (ADC)	DCR ⁴ (mΩ)	Saturation Current ⁵ (A TYP)		Heating Current ⁶ (A TYP)	Hi-pot ¹⁰ (Vdc)
					25°C	100°C		
PA4792.XXXHL: 22.2 x 8.2 x 7.25mm Max								
PA4792.231HLT	230	230	46	0.47±10%	100	86	46	200
PA4793.XXXHL: 15.1 x 8.6 x 6.6mm Max								
PA4793.501HLT	500	470	40	1.15±15%	60	51	40	200

NOTES:

- Inductance measured at 100kHz, 100mVrms. For PA4793 the listed inductance is measured from 1-3 with pins 2,4 shorted
- Inductance at Irated is the value of the inductance at 25°C at the listed rated current.
- The rated current as listed is either the saturation current (25°C or 100°C) or the heating current depending on which value is lower.
- The nominal DCR is measured from point ① to point ②, as shown below on the mechanical drawing. For PA4793 the listed DCR value is for each winding.
- The saturation current is the typical current which causes the inductance to drop by 20% at the stated ambient temperatures (25°C, 100°C). This current is determined by placing the component in the specified ambient environment and applying a short duration pulse current (to eliminate self-heating effects) to the component.
- The heating current is the DC current which causes the part temperature to increase by approximately 40°C when used in a typical application.
- In high volt*time applications, additional heating in the component can occur due to core losses in the inductor which may necessitate derating the current in order to limit the temperature rise of the component. To determine the approximate total losses (or temperature rise) for a given application, the coreloss and temperature rise curves can be used.
- Parts with the HLT suffix are sold in tape and reel packaging. Pulse complies to industry standard tape and reel specification EIA-481. Samples of these parts can be ordered by removing the HLT suffix and replacing with HL.
- The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
- Hi-pot is measured from the bottom of the core to the leads. Hi-pot is tested for 2sec with a leakage current maximum of 0.1mA.
