

## **H Series Tapered Inserts**

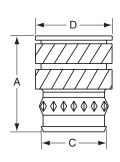

### Superior in design and performance

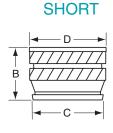

H Series Tapered Inserts outperform all competitive inserts for ultrasonic and thermal applications. Our customers confirm it.

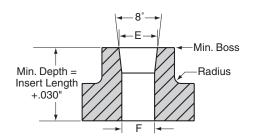

We've eliminated the outward stress that occurs with other insert designs during the installation process. Our proprietary "knuckle knurl" ensures a more uniform flow of material into the diagonal knurls and undercuts, ensuring a complete fill, reducing installation time and increasing holding strengths.

Recommended Hole Size – See chart for installation hole size. Additional information can be found on page 5, Design Guidelines.

Stainless Steel Inserts – Class 3A/4H screw must pass with finger torque, standard class go gage may stop on last thread. • Part numbers for Stainless Steel Inserts are the same as listed in the chart, but ending with -SS.

Thread sizes of 0-80, 2-56, M1.6 and M2.0 in H Series Inserts have a single diamond knurl.
