# High efficiency, two-digit numeric displays

The LB-402 DN series were designed to meet the need for multi-digit numeric displays. These LED numeric displays use GaAsP on GaP (red), GaP(green) for the emitting material and are housed in an epoxy resin package.

They are two-digit displays with a character height of 10.16 mm.

#### Features

- 1) Height of character : 10.16 mm
- 2) Common anode and common cathode configurations are available for each color.
- 3) The package surface is painted black and the segments are colored the display color.
- 4) High efficiency reflectors are used to achieve a bright, clear display.
