Patent Pending

TO COMPRESS RG 6/59, 7/11 AND RCA CONNECTORS

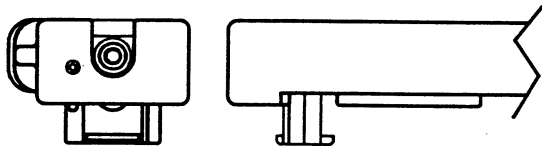

1) Open the compression chamber by activating the handle to the open position.

2) Push the slide up from the bottom until it clicks into the RG 6/59-RCA position or down for the RG 7/11 position.

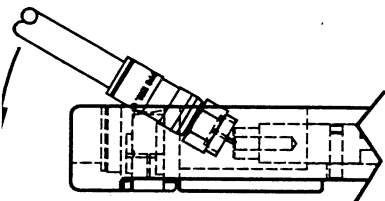

RG 6/59-RCA position

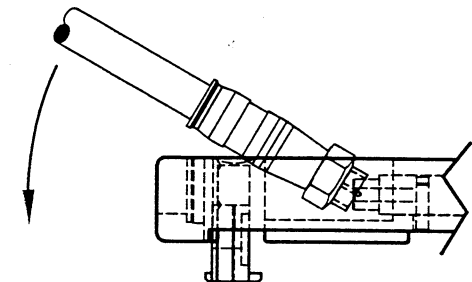

RG 7/11 position

3) Install the un-compressed connector and cable by inserting the center conductor into the hole in the compression tip while rotating downward as shown.

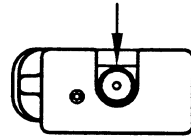

RG 6/59-RCA position

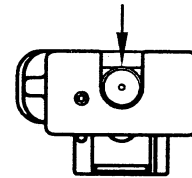

RG 7/11 position

4) Press the cable into the saddle. The connector must be fully seated to assure a uniform compression.

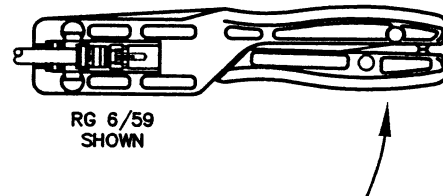

6/59 position

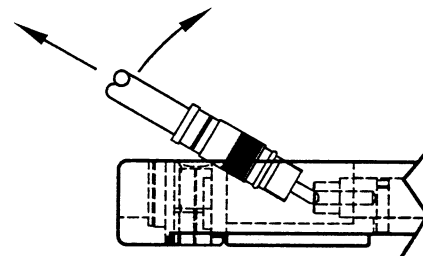

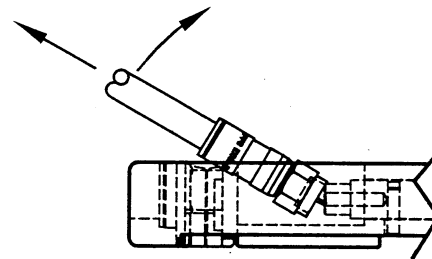

7/11 position

5) With the cable/connector pre-assembly in place squeeze the tool handle to the closed position. A toggle action is evident as the handle approaches its full movement and the handles butt.

RG 6/59
SHOWN

6) Release the handle to the open position and lift the cable in a radial motion up and out of the compression chamber.
