**Technical specifications**

- **Maximum continuous operating voltage**: 3x 520/300 VAC
- **Operating frequency**: DC to 60 Hz
- **Rated currents**: 10 to 50 A @ 50°C
- **High potential test voltage**: P → E 2000 VAC for 2 sec (HL types), P → E 3000 VDC for 2 sec (HP types), P → P 2250 VDC for 2 sec
- **Protection category**: IP 00 (protection according to VBG 4)
- **Overload capability**: 4x rated current at switch on, 1.5x rated current for 1 minute, once per hour
- **Temperature range (operation and storage)**: -25°C to +100°C (25/100/21)
- **Flammability corresponding to**: UL 94 V-2 or better
- **Design corresponding to**: UL 1283, CSA 22.2 No. B 1986, IEC/EN 60939
- **MTBF @ 50°C/400 V (MIL-HB-217F)**: >200,000 hours

**Features and benefits**

- Two different mounting versions: FN 3025 for chassis mounting and FN3026 for DIN-rail mounting
- Two different performance levels (L types, P types)
- A plastic housing and a metal ground plate are cleverly combined to get the lowest possible product weight without compromising EMC behavior
- The embedded jump-terminal system from Schaffner guarantees user-friendly handling as well as fast and reliable electrical connection
- Captive hinged protective covers contribute to overall safety by offering protection against unintended contact with live conductors. They are included in the standard delivery package without causing extra cost
- Very low leakage current values make these filter ranges ideally suitable for use in Japanese electricity networks as well as in applications which set value on safety and reliability

**Approvals & Compliances**

- Design protected by European patent (EP 1727280)
- RoHS
- UL
- CE
- UL
- CSA
- UL

**Typical applications**

- Applications with the requirement for extremely compact filter solutions
- Applications with tough leakage current requirements or sensitive earth leakage detectors
- Applications with insufficient internal filtering or moderate interference levels
- Automation equipment
- Motor drives and servo drives with short motor cables
- Applications including stepping motors
- Semiconductor manufacturing equipment
- Three-phase power supplies
- Medical equipment (not patient-coupled)

</tbody>
</table>

* Calculated at rated current, 480 VAC and cos phi=0.8. The exact value depends upon the efficiency of the drive, the motor and the entire application.

** Standardized calculated leakage current acc. IEC60939 under normal operating conditions.

## Typical filter attenuation

Per CISPR 17; A=50 Ω/50 Ω sym; B=50 Ω/50 Ω asym; C=0.1 Ω/100 Ω sym; D=100 Ω/0.1 Ω sym

![10 and 20 A HL types](image1)

![10 and 20 A HP types](image2)

![30 to 50 A HL types](image3)

![30 to 50 A HP types](image4)
**Installation**

FN 3025/FN 3026 are delivered with closed plastic covers and unfastened terminals. To install the filter please proceed as follows:

1. Mount the filter on a metal surface with four screws or snap it onto a TS 35 DIN rail.
2. First connect the green/yellow wire to the earth stud of the filter.
3. Gently lift the two hinged plastic covers.
4. Connect phase wires with cable lugs by pushing down and tightening the screws.
5. Please note the torque recommendation on top of the filter.
6. Push the covers back into their locked position to finish the filter installation.
