

## Automotive dual Transil™ array for ESD protection

Product status

ESDA37WY

#### **Features**

- AEC-Q101 qualified
- · Dual unidirectional Transil functions
- Low leakage current (I<sub>R</sub> max. < 1 μA at V<sub>RM</sub>)
- 300 W peak pulse power (8/20 μs)
- High ESD protection level: up to 25 kV
- High integration
- · Suitable for high density boards
- · Complies with the following standards/
  - ISO 10605: C = 330 pF, R = 330  $\Omega$ : 30 kV (air discharge), 30 kV (contact discharge)
  - ISO 7637-3 fast transient: Pulse a:  $V_S = -150 \text{ V}$ , Pulse b:  $V_S = +100 \text{ V}$
  - ISO 7637-3 slow transient: Positive pulse:  $V_S$  = +85 V, Negative pulse:  $V_S$  = -85 V

### **Applications**

Where transient overvoltage protection in ESD sensitive equipment is required, such as:

- Entertainment
- · Signal communications
- Connectivity
- · Comfort and convenience

### **Description**

This device is a diode array designed to protect 1 line or 2 lines against ESD transients.

The device is ideal for applications where both reduced line capacitance and board space saving are required

It can also be used as bidirectional suppressor by connecting only pin 1 and 2.

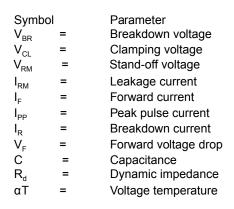

## 1 ESDA37WY\_Characteristics

Table 1. Absolute maximum ratings (T<sub>amb</sub> = 25 °C)

Symbol	Parameter	Value	Unit	
V <sub>pp</sub>	Peak pulse voltage <sup>(1)</sup>	ISO 10605 (C = 330 pF, R = 330 $\Omega$ ): Contact discharge Air discharge ISO 10605 (C = 150 pF, R = 330 $\Omega$ ): Contact discharge Air discharge	30 30 30 30	kV
P <sub>pp</sub>	Peak pulse power (8/20 μs)		300	W
I <sub>pp</sub>	Peak pulse current (8/20 µs)		6.3	Α
Tj	Maximum operating junction ter	mperature range	-55 to 175	°C
T <sub>stg</sub>	Storage junction temperature ra	-65 to 175	°C	
TL	Maximum temperature for solde	260	°C	

<sup>1.</sup> For a surge greater than the maximum values, the diode will fail in short-circuit.

## 3 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK<sup>®</sup> packages, depending on their level of environmental compliance. ECOPACK<sup>®</sup> specifications, grade definitions and product status are available at: www.st.com. ECOPACK<sup>®</sup> is an ST trademark.

### 3.1 [Package name] package information

- Epoxy meets UL 94,V0
- Lead-free package

### 4 Recommendation on PCB assembly

### 4.1 Solder paste

- 1. Halide-free flux qualification ROL0 according to ANSI/J-STD-004.
- 2. "No clean" solder paste is recommended.
- 3. Offers a high tack force to resist component movement during high speed.
- 4. Use solder paste with fine particles: powder particle size 20-45 μm.

#### 4.2 Placement

- Manual positioning is not recommended.
- 2. It is recommended to use the lead recognition capabilities of the placement system, not the outline centering
- 3. Standard tolerance of ±0.05 mm is recommended.
- 4. 3.5 N placement force is recommended. Too much placement force can lead to squeezed out solder paste and cause solder joints to short. Too low placement force can lead to insufficient contact between package and solder paste that could cause open solder joints or badly centered packages.
- To improve the package placement accuracy, a bottom side optical control should be performed with a high resolution tool.
- 6. For assembly, a perfect supporting of the PCB (all the more on flexible PCB) is recommended during solder paste printing, pick and place and reflow soldering by using optimized tools.

#### 4.3 PCB design preference

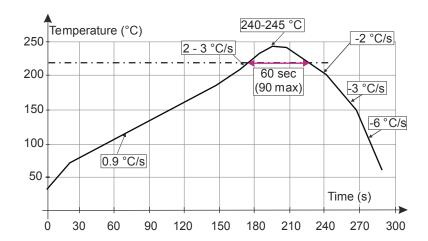

- 1. To control the solder paste amount, the closed via is recommended instead of open vias.
- 2. The position of tracks and open vias in the solder area should be well balanced. A symmetrical layout is recommended, to avoid any tilt phenomena caused by asymmetrical solder paste due to solder flow away.

DS12297 - Rev 2 page 8/12

### 4.4 Reflow profile

Figure 12. ST ECOPACK® recommended soldering reflow profile for PCB mounting

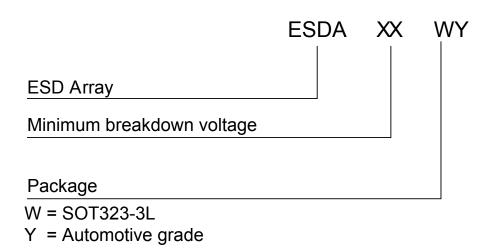

Note: Minimize air convection currents in the reflow oven to avoid component movement.

DS12297 - Rev 2 page 9/12

## 5 ESDA37WY\_Ordering information

Figure 13. Ordering information scheme

**Table 4. Ordering information** 

Order code	Marking <sup>(1)</sup>	Package	Weight	Base qty.	Delivery mode
ESDA37WY	E3Y	SOT323-3L	6.6 mg	3000	Tape and reel

<sup>1.</sup> The marking can be rotated by multiples of 90° to differentiate assembly location.
