

Servo drive solution for multi-axial position control with Ethernet real-time

Features

- Real-time communication via Ethercat protocol
- Three-phase motor drive inverter based on [STDRIVE101](#) gate driver and [STH270N8F7-2](#) power MOSFET
- [STM32F767ZI](#) microcontroller Arm®32-bit Cortex®-M7
- NETX90 network controller
- Main supply voltage up to 48 V with a max. overvoltage robustness of 60 V
- Max. power dissipation up to 700 W
- Motor brake dissipative energy circuit
- Digital actuation section for industrial loads
- RS485 interface for digital encoder and host interface
- On-board DC-DC converter and linear regulator

Description

The [STEVAL-ETH001V1](#) servo drive evaluation board has been developed to address three-phase PMSM applications oriented to multi-axial position control and connectivity.

The evaluation board embeds a motor control power stage, a digital actuation section and a power management section.

The motor control power stage hosts the [STDRIVE101](#) half-bridge gate driver and six [STH270N8F7-2](#) power MOSFETs, featuring real-time connectivity with Ethercat communication protocol supported by the NETX90 network controller, whereas the digital actuation section hosts an industrial IO management section with [CLT03-2Q3](#) (input) and [IPS160H](#) (output). The power management section is powered by [L7987](#), [L7805CD2T-TR](#) and [LD39150DT33-R](#) devices.

The [STEVAL-ETH001V1](#) is equipped with two RJ45 connectors for daisy chain connection and an RS485 interface for digital encoder or host connection powered by [ST3485EI](#). For a better noise immunity, the PCB is characterized by a 6-layer stack and an insulated track for supply line and ground. A quadrature encoder interface with index is also present.

Product summary	
Servo drive solution for multi-axial position control	STEVAL-ETH001V1
Firmware for servo drive solution enabling motor control position through Ethercat protocol	STSW-ETHDRV01V1
Triple half-bridge gate driver	STDRIVE101
STripFET F7 Power MOSFET	STH270N8F7-2
Arm Cortex-M7 MCU	STM32F767ZI
Applications	3-phase field oriented control Industrial servo drives
