

## Low voltage high performance NPN power transistor

### **Features**

- Very low collector-emitter saturation voltage
- High current gain characteristic
- Fast switching speed

### **Applications**

- Emergency lighting
- LED drive
- Motherboard and hard disk drive
- Mobile equipment
- DC-DC converter, voltage regulation

### **Description**

The device is a NPN transistor manufactured using new "PB-HCD" (power bipolar high current density) technology. The resulting transistor shows exceptional high gain performances coupled with very low saturation voltage.

#### Package mechanical data 3

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com. ECOPACK® is an ST trademark.
