STSW-L99SM81V

Graphical User Interface (GUI) for L99SM81VQ6 and L99SM81VY evaluation boards

Data brief

Features

- Complete Graphical User Interface (GUI) for EVAL-L99SM81VQ and EVAL-L99SM81VY evaluation boards.

Description

The STSW-L99SM81V is the Graphical User Interface (GUI) dedicated to set and control EVAL-L99SM81VQ and EVAL-L99SM81VY.

These evaluation boards are designed for Automotive Stepper Motor driver application.

The STSW-L99SM81V has been developed by using C++ and it works with motherboard based on SPC560B microcontroller programmed with dedicated firmware that drives the L99SM81 assembled in the daughter board.
