

E SERIES RECEPTACLES WITH SOLDER CUPS

Switchcraft now offers the E Series with a solder cup option. This new option is perfect for panel mount, non-PC board applications. The solder cups offer a generous area to solder. Available in male and female, the receptacles can be mounted from the front or rear of the panel. See the back page for part numbers. This new option is in addition to all of the previous termination options available with the E Series.

QG® PART NUMBERING SYSTEM

Each character (or absence thereof) in the part numbers

Character	Description
E	Series designator
3	3 pins or contacts
*	M – male connector; F – female connector
QG	Denotes insert only
H	Denotes housing only
B (housing)	Black housing (absence of 'B' denotes satin-nickel)
RA (note)	Right-angle PC terminals (absence of 'RA' or 'ST' denote conical spring solder terminals)
ST	Straight PC terminals (absence of 'ST' or 'RA' denote conical spring solder terminals)

RELEASE INSERT

In two simple steps, inserts can be released while housing stays fastened to the panel.

1. With a small screwdriver, twist insert locking screw from front of insert.
2. Remove insert from the rear of the housing.

TERMINALS

Four terminations are available on E Series receptacles:

1. Conical Spring Solder terminals – conical spring on each pin holds wire in place providing constant pressure during soldering process. This effectively acts as a third hand, assuring a high quality solder termination. Housing mounts to panel.
2. Straight PC terminals – direct termination to PC board. Housing mounts to panel.
3. Right-angle PC terminals – direct termination to PC board at a right-angle. Housing mounts to panel.
