TAIYO YUDEN

# EYSHJNZXZ

TAIYO YUDEN

Control No. HD-AG-A150197	(1/6)	Control name General Items
------------------------------	-------	-------------------------------

## 1. Scope

This specification ("Specification") applies to the hybrid IC "EYSHJNZXZ", a **Bluetooth**® 4.2 low energy module ("Product") manufactured by TAIYO YUDEN Co., Ltd. ("TAIYO YUDEN")

## 2. Description

- a) User Code : EYSHJNZXZ  
Type : EYSHJN

\*User Code may be changed for mass production or other cases.

Note: Please use the User Code (EYSHJNZXZ) to order this product

- b) Chip : Nordic nRF52832 (512kB Flash, 64kB RAM)

- c) Function : Radio frequency transceiver Module. Bluetooth®4.2 conformity.

- d) Application : IoT devices, Health & Fitness Equipment, Sensor, Toys

- e) Structure : Hybrid IC loaded with silicon monolithic semiconductor  
Containment of hazardous substance in this Product

\* This product conforms to RoHS Directive (2002/95/EC).

- f) Outline : 28-pin Land Grid Array

- g) Marking : Part Number, Lot Number, and manufacturer on Shielding Case

- h) Country of origin : Japan

- i) Packaging : Packaging method: Tape & reel + aluminum moisture barrier bag  
Packaging unit: 2000

\*It might be provided as tray at sample stage.

**EYSHJNZXZ**

TAIYO YUDEN

Control No. HD-AG-A150197	(2/6)	Control name General Items
------------------------------	-------	-------------------------------

## j) Notes:

## a. Limitation of Warranty

- 1) TAIYO YUDEN provides warranties only if the Product is operated under the condition set forth in this Specification. Please note that TAIYO YUDEN shall not be liable for any defect and/or malfunction arising from use of the Product under the terms and conditions other than the operating conditions hereof. In addition when this Product is used under environmental conditions such as over voltage which is not guaranteed, it may be destroyed in short mode. To ensure the security of customer's product, please add an extra fuse or/and a protection circuit for over voltage.
- 2) This Product is designed for use in products which comply with Bluetooth® 4.2 Specifications. TAIYO YUDEN disclaims and is not responsible for any liability concerning infringement by this Product under any intellectual property right owned by third party in case the customer uses this Product in any product which does not comply with Bluetooth®4.2 Specifications (the "non-complying products"). Furthermore, TAIYO YUDEN warrants only that this Product complies with this Specification and does not grant any other warranty including warranty for application of the non-complying products.
- 3) In some cases, TAIYO YUDEN may use replacements as component parts of Products. Such replacement shall apply only to component part of Products, which TAIYO YUDEN deems it possible to replace or substitute according to (i) Scope of Warranty provided in this specification (e.g. Electric Characteristics, Outline, dimension, Conditions of Use, Reliability Tests, Official Standard (Type Approvals etc.)) and (ii) Quality of Products. TAIYO YUDEN also ensures traceability of such replacement on production lot basis.

## b. Instruction for Use (CAUTION)

- 1) Because Product is not designed for radiation durability, please refrain from exposing Product to radiation in the use.
- 2) Communication between this Product and other might not be established nor maintained depending upon radio environment or operating condition of this Product and other products with wireless technology.
- 3) This Product operates in the unlicensed ISM band at 2.4GHz. In case this Product is used around the other wireless devices which operate in same frequency band of this Product, there is a possibility that interference occurs between this Product and such other devices. If such interference occurs, please stop the operation of other devices or relocate this Product before using this Product or do not use this Product around the other wireless devices.
- 4) This Product mentioned in this Specification is manufactured for use in Health & Fitness Equipment, Sensor, Toys. Before using this Product in any special equipment (such as medical equipment, space equipment, air craft, disaster prevention equipment), where higher safety and reliability are duly required, the applicability and suitability of this Product must be fully evaluated by the customer at its sole risk to ensure correct and safety operation of those special equipments. Also, evaluation of the safety function of this Product even for use in general electronics equipment shall be thoroughly made and when necessary, a protective circuit shall be added in design stage, all at the customer's sole risk.

**EYSHJNZXZ**

TAIYO YUDEN

Control No. HD-AG-A150197	(3/6)	Control name General Items
------------------------------	-------	-------------------------------

## 5) Japan Regulatory Information

- a) This Product is a radio system and obtained certification of construction type combined with the specific antenna.
- b) Please ensure that your product has a label with the following certification mark at easily viewable location. If your product is too small to have the label, please place it in the instruction manual and package of your product. The mark diameter shall be equal or greater than 3mm. In case your product does not have the label with the following certification mark, you or your customer who uses your product may be against the Radio Law and subjected to criminal punishment. TAIYO YUDEN shall not be liable for any loss or damage incurred by you or your customer arising from use of your product which does not have following certification mark.

This product has a radio system which was approved as a radio station in a low power data communication system based on the Radio Law.

EYSHJN : 001-A07864

## 6) Canada Regulatory Information

- a) This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:
- (1) This device may not cause interference; and
  - (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1) l'appareil ne doit pas produire de brouillage;
- 2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

## b) (For portable device)

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that is deemed to comply without testing of specific absorption rate (SAR).

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement émet une énergie RF très faible qui est considérée comme conforme sans évaluation du débit d'absorption spécifique (DAS).

**TAIYO YUDEN**

**EYSHJNZXZ**

TAIYO YUDEN

Control No. HD-AG-A150197	(4/6)	Control name General Items
------------------------------	-------	-------------------------------

## c) (For mobile device)

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that is deemed to comply without maximum permissive exposure evaluation (MPE).

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement émet une énergie RF très faible qui est considérée comme conforme sans évaluation de l'exposition maximale autorisée (MPE).

## d) Please notify certified ID by either one of the following method on your product.

-Contains IC : 4389B-EYSHJN

Specifiez ID certifiée dans votre produit par une de méthode suivante.

-Contains IC : 4389B-EYSHJN

## 7) FCC Regulatory Information

a) This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

b) Please notify certified ID by either one of the following method on your product.

-Contains Transmitter Module FCC ID: RYYEYSHJN

-Contains FCC ID: RYYEYSHJN

c) CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the use's authority to operate the equipment.

d) (For Portable Device)

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment has very low levels of RF energy that is deemed to comply without testing of specific absorption rate (SAR).

e) (For mobile device)

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment has very low levels of RF energy that is deemed to comply without maximum permissive exposure evaluation (MPE).

f) The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

g) This module can change the output power depending on the circumstances by the application software which is developed by module installer. Any end user cannot change the output power.

TAIYO YUDEN

**EYSHJNZXZ**

TAIYO YUDEN

<b>Control No.</b> <b>HD-AG-A150197</b>	<b>Control name</b> <b>General Items</b>
--------------------------------------------	---------------------------------------------

## 8) CE Regulatory Information

- a) When your end product installs this module, it is required to proceed additional certification processes before placing on the market in EU member states to make your products fully comply with relative EU standards.
- b) TAIYO YUDEN can provide you the test reports of conducted measurement portion for the radio module. You can utilize the test reports for the certification processes of your end product as it requires radio testing.

## c. Term of Support

- 1) In the case that customer requests TAIYO YUDEN to customize the hardware of this Product in order to meet such customer's specific needs, TAIYO YUDEN will make commercially reasonable effort to modify such hardware or software at customer's expense; provide however, the customer is kindly requested to agree it doesn't mean that TAIYO YUDEN has obligations to do so even in the case it is technically difficult for TAIYO YUDEN.
- 2) Any failure arising out of this Product will be examined by TAIYO YUDEN regardless of before or after mass production. Customer agrees that once such failure is turned out not to be responsible for TAIYO YUDEN after aforesaid examination, some of the technical support shall be conducted by TAIYO YUDEN at customer's expense; provided however, exact cost of this technical support can be agreed through the negotiation by the parties.
- 3) Do not alter hardware and/or software of this Product. Please note that TAIYO YUDEN shall not be liable for any problem if it is caused by customer's alteration of Hardware without Taiyo Yuden's prior approvals.
- 4) TAIYO YUDEN does not guarantee functions and performances which depend on the customer's firmware. TAIYO YUDEN does not assume liabilities for defects and failures (i) in functions, performances and quality of the Customer's product incorporating the Products and (ii) which may occur as the Product is incorporated in the Customer's product.

## d. Caution for Export Control

This Product may be subject to governmental approvals, consents, licenses, authorizations, declarations, filings, and registrations for export or re-export of the Product, required by Japanese Foreign Exchange and Foreign Trade Law (including related laws and regulations) and/or any other country's applicable laws or regulations related to export control.

In case you will export or re-export this Product, you are strongly recommended to check and confirm, before exporting or re-exporting, necessary procedures for export or re-export of this Product which is required by applicable laws and regulations, and if necessary, you have to obtain necessary and appropriate approvals or licenses from governmental authority at your own risk and expense.

## e. Term of Warranty

TAIYO YUDEN warrants only that this Product is in conformity with this Specification for one year after purchase and shall in no event give any other warranty.

**TAIYO YUDEN**

**EYSHJNZXZ**

TAIYO YUDEN

<b>Control No.</b> <b>HD-AG-A150197</b>	<b>Control name</b> <b>General Items</b>
--------------------------------------------	---------------------------------------------

## f. Items of the Specification

- 1) Any question arising from the Specification shall be solved in good faith through mutual discussion by the parties hereof.
- 2) The language of this “General items” is Japanese and this “General items” shall be interpreted by Japanese Any copies of translation is a reference purpose only and is not binding on both parties hereto.

## g. Special note

- 1) Taiyo Yuden writes firmware for and fixed SoftDevice (s132\_nrf52\_2.0.1\_softdevice.hex) to this product. Customer writes firmware that is match the customer applications including SoftDevice at the customer's own responsibility.
- 2) The Electrical Characteristics defined in this Specification are of the module with above Firmware (s132\_nrf52\_2.0.1\_softdevice.hex). If other firmware developed by Customer is installed, the characteristics may differ from the defined value in the Electrical Characteristics. Bluetooth qualification and radio type approval may become invalid.
- 3) EYSHJN series module is qualified as PHY only with Component category by Bluetooth SIG. The QDID of this module is 84902. The final product needs to get qualification as End product combining with PHY (module), SoftDevice and Profile before selling the product. The combination of Link and Host layer is differ with SoftDevice. Please refer to following combination and consult with your qualification body and BQE.

TAIYO YUDEN

**EYSHJNZXZ**

TAIYO YUDEN

Control No. HQ-BA-537	Control name Handling Precaution
--------------------------	-------------------------------------

This specification describes desire and conditions especially for mounting.

## Desire/Conditions

## (1) Environment conditions for use and storage

1. Store the components in an environment of < **40deg-C/90%RH** if they are in a moisture barrier bag packed by TAIYO YUDEN.
2. Keep the factory ambient conditions at < **30deg-C/60%RH**.
3. Store the components in an environment of < **25±5deg-C/10%RH** after the bag is opened.  
(The condition is also applied to a stay in the manufacture process).

## (2) Conditions for handling of products

Make sure all of the moisture barrier bags have no holes, cracks or damages at receiving. If an abnormality is found on the bag, its moisture level must be checked in accordance with 2 in (2).

Refer to the label on the bag.

1. All of the surface mounting process (reflow process) must be completed **in 12 months** from the bag sea date.
2. Make sure humidity in the bag is less than **10%RH** immediately after open, using a humidity indicator card sealed with the components.
3. **All** of the surface mounting process (reflow process including rework process) must be completed in **168 hours** after the bag is opened (inclusive of any other processes).
4. If any conditions in (1) or condition 2 and 3 in (2) are not met, bake the components in accordance with the conditions at **125deg-C 24hours**
5. As a rule, baking the components in accordance with conditions 4 in (2) shall be once.
6. Since semi-conductors are inside of the components, they must be free from static electricity while handled.(<100V) Use ESD protective floor mats, wrist straps, ESD protective footwear, air ionizers etc. , if necessary.
7. Please make sure that there are lessen mechanical vibration and shock for this module, and do not drop it.
8. Please recognize pads of back side at surface mount.
9. Washing the module is not recommended. If washing cannot be avoided, please test module functionality and performance after thoroughly drying the module.  
We cannot be held responsible for any failure due washing the module.
10. Please perform temperature conditions of module at reflow within the limits of the following.  
Please give the number of times of reflow as a maximum of 2 times.

リール仕様

Tape wide	8mm	12mm	16mm	24mm	32mm	44mm
W	9.4mm	13.4mm	17.4mm	25.4mm	33.4mm	45.4mm

Taping performance  
テーピング性能

Both of an embossing tape top cover tape bear this, when the power of 10N is applied in the direction of a drawer.  
•エンボステープ、トップカバーテープともに、引き出し方向に10Nの力を加えた場合に、これに耐えること。

The exfoliation adhesion of a top cover tape is the intensity of 0.1～1.3N.  
(The angle to pull is 165～180 degrees. The speed to pull is 300 mm/min.)  
•トップカバーテープの剥離強度は、角度165～180度に保ち、300mm/minのスピードでトップカバーテープを引っ張ったとき、0.1～1.3Nとする。

Note  
備考

Lack of the parts in 1 reel is with two or less pieces.  
1リール中の部品の欠落は2個までとします。(ラベル表示数量と梱包数は同じです。欠落とはテープ内でのモジュール抜けが2個まで許容させていただくという意味になります。)

Keep-out area

In order to keep the antenna performance on the module, please do not place any components, ground of main board, signal line, conductive plating in Keep-out area.

Keep-out area will be applicable in all layers of the customer's substrate.

Please consider on the occasion of pattern design.

(2/3)	Antenna application note

Recommended arrangement of the module

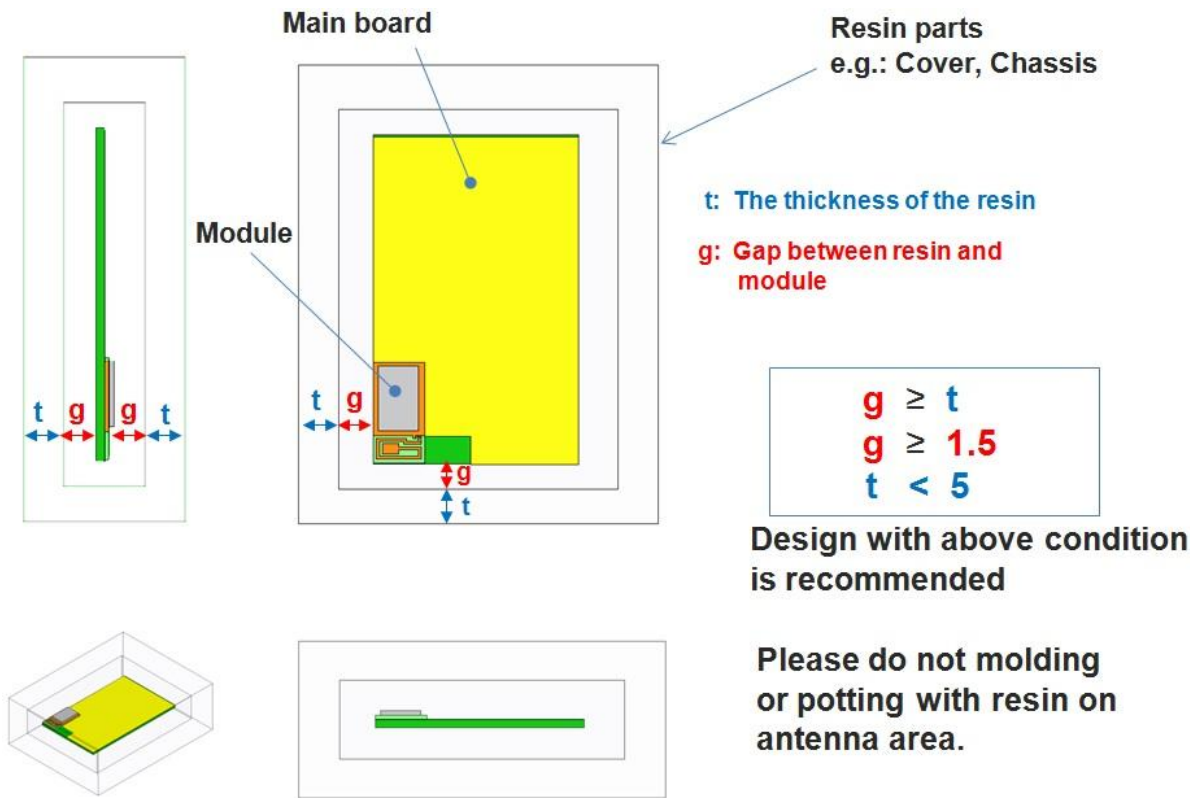

- \*1 Please do not place any board, signal line and metal chassis as possible except main board. Mounting the components in \*1 area on the main board is allowed in keeping with next item \*2.
- \*2 This area is routing prohibited area on the main board. Please do not place Copper on any layer. Please remain FR-4 dielectric material. The antenna is tuned with the FR-4.

Example layout on main board

### 1. Power Up Sequence

VCC\_NRF power supply rise time (0V to 1.7V) must not exceed 60ms.

### 2. Recommended Power Circuit

VCC\_NRF is the main power supply (1.7 – 3.6V) for this module. The supply voltage range of VCC\_NRF is 1.7V to 3.6V in both of LDO and DCDC mode. In case of the power supply voltage fluctuation by the load change is large, the module may not function properly. If an external regulator is used, the load change characteristic should be good in order to keep stable voltage as possible when the current is change.

### 3. Battery operation

When using a small battery (e.g. CR2032), a large capacitor (e.g.100uF low leakage capacitor) should be placed near the battery. This will reduce the voltage drop especially when the module is operated at low temperatures

### 4. Pattern Design Guide

#### 4-1. Power Supply System

Power supply bypass capacitors should be placed close to the VCC\_NRF pin of the module. The VCC\_NRF trace should be greater than 0.5mm and a bigger a via diameter is recommended.

#### 4-2. Bypass Capacitor Layout

A parallel combination of a small capacitance (about 10pF) and a large capacitance (1uF to 10uF) is recommended for bypass capacitors. The GND of the bypass capacitor should be placed close to an adjacent module GND to ensure the shortest closed loop.

#### 4-3. GND Pattern

Power supply bypass capacitor GND should be placed in proximity of module GND. Wide GND area must be provided to ensure isolation for each layer.

GND pattern of each layer should be connected to GND area with large number of via.

32kHz Clock

This module does not installed 32.768kHz crystal. In case of operating without external crystal, please use following example code in order to enable internal 32.768kHz RC oscillator (32k RCOSC).

```
nrf_clock_lf_cfg_t clock_lf_cfg;
clock_lf_cfg.rc_ctiv = 16;
clock_lf_cfg.rc_temp_ctiv = 2;
clock_lf_cfg.source = NRF_CLOCK_LF_SRC_RC;
clock_lf_cfg.xtal_accuracy = NRF_CLOCK_LF_XTAL_ACCURACY_250_PPM;
SOFTDEVICE_HANDLER_APPSH_INIT(&clock_lf_cfg, true);
```

Note that when you choose to use the RC oscillator, it will add around 10uA average current consumption compared to a 20ppm external crystal.  
ANT specification requires +/-50ppm accuracy for 32.768kHz clock. There is a possibility that the internal RC oscillator does not meet to the specification.
