Product Name : 40dB GPS/Galileo Hercules Heavy Duty Screw Mount Antenna For long cable lengths above 5m

Description : Three Stage 40dB Height 29mm Diameter 52mm Cable: 10m RG-174 IP65 Rated Enclosure Connector: SMA(M)

1. Introduction

The **A.03.C** Hercules is a 40dB LNA high performance thread mount GPS/Galileo antenna designed for external use on vehicles and outdoor assets where long cable lengths above 5 metres (15 feet) are used. Designed for heavy duty work with onepiece C&C machined nickel steel base plate and threads, there are also convenient side slots for running cables laterally. Durable UV resistant ABS housing is IP65 rated, resistant to vandalism and direct attack. At only 29mm high it complies with the latest EU directives for height restrictions, whilst also enabling covert operation with a diameter of 52mm.

Because it is a GPS/Galileo it is used for all location based services such as large fleet vehicle tracking, remote monitoring, telematics, M2M applications and timing for base stations.

Cable lengths, types and connectors are fully customizable.

For cable lengths below 5m please use our 28dB LNA **A.01.C** model.
