1. Introduction

The Taoglas DCM.59 is a DSRC antenna for in-car use. The DCM.59 has been designed based on the stringent demands of the automotive industry, and with the future of DSRC applications various use cases for this antenna will continue to emerge. Some DSRC use cases gaining traction include vehicle-to-vehicle (V2V), vehicle-to-infrastructure (V2I), vehicle-to-pedestrian (V2P), and vehicle-to-cloud (V2C) communication, and are all being integrated into the next generation of vehicles.

C-V2X will be an important communication method for future automotive applications and improve road safety, reduce collisions, and allow autonomous vehicles to be used more widely, enhancing road safety even more.

Typical Applications include:

- Telematics Devices
- Parking payment systems
- Vehicle Security
- Road Safety
- Traffic Management Systems

The DCM.59 comes with a FAKRA Code Z Water blue Jack connector as standard and this can be customized subject to MOQ and NRE, contact your regional Taoglas customer support team for more information.
