## Freedom

### Part No:

FXP830.24.0100B

### Description

FXP830 Freedom Wi-Fi® 2.4/5.8/7.1GHz Dipole Antenna, Wi-Fi® 6 included with 100mm of 0.81mm cable and IPEX MHF4 Connector (HSC compatible)

### Features:

- Flexible Polymer Antenna
- Covers Newly established Wi-Fi® 6 bands
- Covers 2.4/5.8/7.1GHz Wi-Fi® Bands
- Operates in Free Space (Ground Plane Independent)
- Cable: 100mm of Ø0.81mm
- Connector: IPEX MHF4 Connector (HSC compatible)
- RoHS & Reach Compliant

## 1. Introduction

The FXP830 is a high efficiency, small, dipole antenna covering 2.4/5.8/7.1GHz bands including Bluetooth®, Wi-Fi® and the newly established Wi-Fi® 6/Wi-Fi® 6E, making this an ideal solution for future-proofing an IoT device. This Taoglas patent pending antenna is unique in the market because it is made from poly-flexible material, has a tiny form factor (42\*7\*.01mm) and has double-sided 3M tape for easy “peel and stick” mounting.

The FXP830 is the ideal all-round antenna solution for squeezing into narrow spaces and still maintaining high performance, for example at the top of LCD devices.

Many module manufacturers specify peak gain limits for any antennas that are to be connected to that module. Those peak gain limits are based on free-space conditions. In practice, the peak gain of an antenna tested in free-space can degrade by at least 1 or 2dBi when put inside a device. So ideally you should go for a slightly higher peak gain antenna than mentioned on the module specification to compensate for this effect, giving you better performance.

Upon testing of any of our antennas with your device and a selection of appropriate layout, integration technique, or cable, Taoglas can make sure any of our antennas' peak gain will be below the peak gain limits. Taoglas can then issue a specification and/or report for the selected antenna in your device that will clearly show it complying with the peak gain limits, so you can be assured you are meeting regulatory requirements for that module.

For example, a module manufacturer may state that the antenna must have less than 2dBi peak gain, but you don't need to select an embedded antenna that has a peak gain of less than 2dBi in free-space. This will give you a less optimized solution. It is better to go for a slightly higher free-space peak gain of 3dBi or more if available. Once that antenna gets integrated into your device, performance will degrade below this 2dBi peak gain due to the effects of GND plane, surrounding components, and device housing. If you want to be absolutely sure, contact Taoglas and we will test. Choosing a Taoglas antenna with a higher peak gain than what is specified by the module manufacturer and enlisting our help will ensure you are getting the best performance possible without exceeding the peak gain limits.

The cable and connector are fully customizable, for further information contact your regional Taoglas customer support team.

## 2. Specifications

| Wi-Fi Electrical |                 |             |                |                   |                 |           |              |                   |                  |
|------------------|-----------------|-------------|----------------|-------------------|-----------------|-----------|--------------|-------------------|------------------|
| Band             | Frequency (MHz) | Measurement | Efficiency (%) | Average Gain (dB) | Peak Gain (dBi) | Impedance | Polarization | Radiation Pattern | Max. input power |

| Operation Temperature | -40°C to 85°C              |
| Storage Temperature   | -40°C to 85°C              |
| Relative Humidity     | Non-condensing 65°C 95% RH |

### 3. Mechanical Drawing

|   | Name                  | P/N            | Material | Finish      | QTY |
|---|-----------------------|----------------|----------|-------------|-----|
| 1 | FXP830 FPCB           | 100111A010011A | Polymer  | Black       | 1   |
| 2 | 0.81 Coaxial Cable    | 300715C000000A | FEP      | Gray        | 1   |
| 3 | IPEX MHF4             | 204411I000013A | Brass    | Gold        | 1   |
| 4 | Double-Sided Adhesive | 100111A010011A | 3M 467   | Brown Liner | 1   |

## 4. Packaging

100pcs FXP830.24.0100B per PE Bag  
 Bag Dimensions - 210 x 100mm  
 Weight - 34.07g

1000pcs FXP830.24.0100B per PE Large Bag  
 Bag Dimensions - 440 x 270 x 80mm  
 Weight - 0.35kg

5,000 pcs FXP830.24.0100B per carton  
 Carton - 330 x 260 x 240mm  
 Weight - 2.3Kg

Pallet Dimensions 1200x 1000 x 1400mm  
 60 Cartons per Pallet  
 12 Cartons per layer  
 5 Layers

## 5. Antenna Characteristics

### 5.1 Test Setup

VNA Test Set-up on 2mm ABS

## 5.2 Return Loss

## 5.3 VSWR

## 5.4 Efficiency

## 5.5 Average Gain

## 5.6 Peak Gain

## 6. Radiation Patterns

### 6.1 Test Setup

Chamber Test Set-up on 2mm ABS

## 6.2 2mm ABS Patterns at 2450 MHz

### 6.3 Free Space Patterns at 2450 MHz

## 6.4 2mm ABS Patterns at 5500 MHz

## 6.5 Free Space Patterns at 5500 MHz

## 6.6 2mm ABS Patterns at 6520 MHz

## 6.7 Free Space Patterns at 6520 MHz

## Changelog for the datasheet

### SPE-14-8-022 - FXP830.24.0100B

#### Revision: G (Current Version)
