

# **Specification**

Part No. : **GSA.8827R.A.101111** 

Product Name : Phoenix 4G/3G/2G Ultra-wideband I-bar Antenna

for First-Tier Automotive Application

Feature : LTE / GSM / CDMA / DCS / PCS / WCDMA / UMTS /

HSDPA / GPRS / EDGE / GPS / Wi-Fi

698MHz to 960MHz, 1575.42MHz,

1710MHz to 2700Mhz

1M RG.174 cable with SMA(M) connector

AntD© Antenna Diagnostic Compatible

Low profile for easy installation

Fully customizable cable length and connector

105mm\*30mm\*7.7mm

**RoHS** compliant

#### 1. Introduction

The GSA.8827R Phoenix Ultra-Wideband I-Bar antenna is a robust high efficiency cellular antenna for use with all 4G/3G/2G cellular modules worldwide.

Its slim-line design allows for covert and convenient installation in automotive vehicles, its omni-directional gain across all bands ensures constant reception and transmission. GSA.8827R is manufactured and tested in a TS16949 first tier automotive approved facility, and it has gone through full PPAP design, reliability and quality audits.

The Phoenix finds its application particularly in first-tier automotive application, aftermarket and telematics. With its unique ultra-wide band dipole design, the Phoenix has exceptional industry performance characteristics considering its very low profile at 7.7mm and has a compact size of only 105mm\*30mm.

This antenna is designed to be mounted on glass or plastic (not on metal). It comes with strong 3M double-sided adhesive for a permanent and secure fix to your vehicle interior. The antenna is UV Resistant. Cable lengths and connectors are fully customizable.

GSA.8827R features Taoglas' AntD© antenna diagnostic technology. AntD© allows connected radio products using the latest cellular modules and recommended circuits from Telit and uBlox to perform diagnostics on the antenna. This includes detection that the proper antenna is connected and that the connection isn't shorted or broken. Contact Taoglas engineering for examples on how to implement AntD© antenna diagnostics in your product.

# 2. Specification
