1. Introduction

The MB.200 is a sturdy 3 way base mount for LTE or WIFI MIMO 2*2 Antennas. The standard base version comes with high quality 1 meter small diameter Teflon jacket RG316 cable to allow for flexibility of placement. The base has undergone extensive pull force testing.

The base SMA connectors where the antenna elements connect are SMA(F), so the mating antenna needs to be SMA(M) straight connector type. The base cable itself has a SMA(M) connector. The cable length and cable connector types are customizable, subject to MOQ. The connector can be customizable on the base itself subject to NRE and MOQ.

Options

- Magnetic
- Desktop
- Wall

Magnetic Mount

With six super-magnets embedded, the base mounts permanently to metal surfaces

Wall Mount

Mounting holes in the base make it easy to mount on a wall

Desktop

EVA foam under the base ensures a good grip for desktop use

In practice any antenna model with a standard SMA(M) connector can be used with this base. Taoglas has for 2G/3G/4G applications the TG.35, TG.30, TG.09, or TG.08 For Dual-band WiFi we recommend the TG35 or the GW71.
