Part No:
PCS.07.A

Description:
Low Profile Cellular SMD Dielectric Antenna
824~960MHz/1710~2170MHz

Features:
High Efficiency Multi-Band SMD antenna
Low profile 35mm * 7mm * 3mm
CE Certified
RoHS & Reach Compliant

1. Introduction

The PCS.07.A is a low profile SMT cellular antenna designed for direct SMT mount on the device PCB. It provides highest efficiency in very small factor 35*7*3mm. It is more resistant to detuning compared to other antenna integrations. If tuning is required it can be tuned for the device environment, while there is no need for new tooling. Its rectangular shape and very small size makes it very easy to integrate – can be mounted directly on the edge of the PCB board.

The PCS.07 antenna is suitable for lower cost cellular applications and is especially suitable for telematics and automotive sector. If higher efficiency or improved radiated spurious emissions are required, especially on smaller ground-planes, please use our PA series antennas, PA.26 or PA.710. 9. Solder Reflow Recommendations

The PCS.07.A can be assembled by following the recommended soldering temperatures are as follows:

*Temperatures listed within a tolerance of $\pm 10^{\circ}\text{C}$

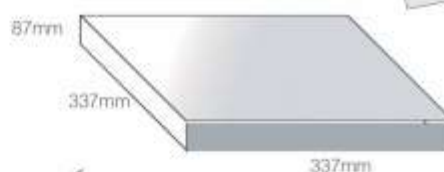

The PCS.07.A is not limited to the number of passes through the reflow process. Smaller components are typically mounted on the first pass, however, we do advise mounting the PCS.07.A when placing larger components on the board during subsequent reflows.
