

TOSHIBA CMOS Linear Integrated Circuit Silicon Monolithic

# TCK42xG Series

Over Voltage Protection MOSFET Gate Driver IC

## 1. Description

TCK42xG series is Over Voltage Protection Gate Driver IC for External N-channel MOSFET. This product support to MOSFET operating in wide voltage line from 2.7 V to 28 V with various Over Voltage Lock Out lineups. And this features low standby current, less than 1  $\mu\text{A}$ , built in charge pump circuit and MOSFET gate-source protection circuit. Package is very small and thin WCSP6G (1.2 mm x 0.8 mm (typ.), t: 0.35 mm (max)). Thus this is suitable for mobile, wearable system and power management circuit such as load switch application.

Weight : 0.61 mg ( typ.)

## 2. Applications

Load switch circuit for mobile, wearable, and IoT equipment

## 3. Features

- Gate driver for N-channel Common Drain MOSFET
- Gate driver for N-channel Single High side MOSFET
- High maximum input voltage:  $V_{\text{IN max}} = 40 \text{ V}$
- Wide input voltage operation:  $V_{\text{IN}} = 2.7 \text{ to } 28 \text{ V}$
- Gate-Source protection circuit
- Over Voltage Lock Out :  $V_{\text{IN OVLO}} = 6.31 \text{ V, } 10.83 \text{ V, } 14.29 \text{ V, } 23.26 \text{ V and } 27.73 \text{ V typ}$
- Under Voltage Lock Out :  $V_{\text{IN UVLO}} = 2.0 \text{ V typ}$
- Built in Charge pump circuit: Gate source voltage  $V_{\text{GS}} = 5.6 \text{ V and } 10 \text{ V typ}$
- Low standby current :  $I_{\text{Q(OFF)}} = 0.9 \mu\text{A max at } V_{\text{IN}} = 12 \text{ V (Except TCK424G, TCK425G)}$

Start of commercial production  
2021-11

### 4. Absolute Maximum Ratings (Note)

Characteristics	Symbol	Rating	Unit
Input voltage	V <sub>IN</sub>	-0.3 to 40	V
Output voltage	V <sub>OUT</sub>	-0.3 to 40	V
Control voltage	V <sub>CT</sub>	-0.3 to 6	V
Output GATE voltage	V <sub>GATE1,2</sub>	-0.3 to 40	V
Power dissipation	P <sub>D</sub>	800 (Note 1)	mW
Operating temperature range	T <sub>opr</sub>	-40 to 85	°C
Junction temperature	T <sub>j</sub>	150	°C
Storage temperature	T <sub>stg</sub>	-55 to 150	°C

Note: Using continuously under heavy loads (e.g. the application of high temperature/current/voltage and the significant change in temperature, etc.) may cause this product to decrease in the reliability significantly even if the operating conditions (i.e. operating temperature/current/voltage, etc.) are within the absolute maximum ratings. Please design the appropriate reliability upon reviewing the Toshiba Semiconductor Reliability Handbook ("Handling Precautions"/"Derating Concept and Methods") and individual reliability data (i.e. reliability test report and estimated failure rate, etc).

Note1: Rating at mounting on a board: FR4 board. ( 40 mm × 40 mm × 1.6 mm, Cu 4 layer )

### 5. Top Marking, Pin Assignment (top view)

A1: VGATE1

B1: VGATE2

### 6. Operating Ranges

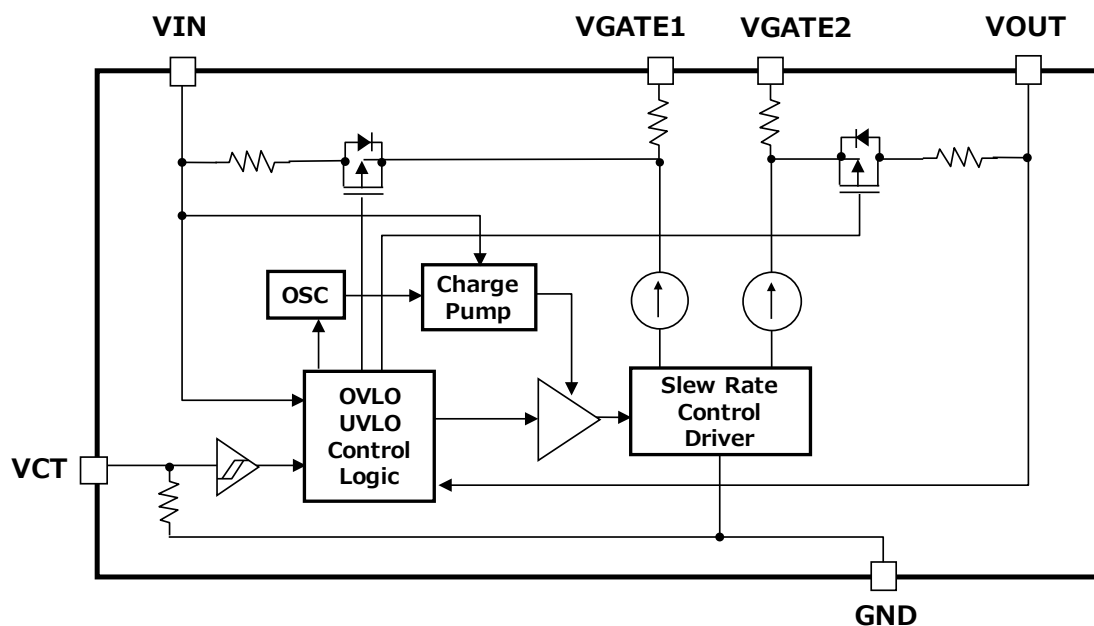

Characteristics	Symbol	Min.	Typ.	Max.	Unit
Input operation voltage	$V_{IN\_opr}$ (Note 2)	2.7	—	28	V
CONTROL High-level input voltage	$V_{IH}$	1.2	—	5.5	V
CONTROL Low-level input voltage	$V_{IL}$	—	—	0.4	V

Note 2:  $V_{IN\_opr} < V_{IN\_OVLO\ Max}$  of each product

### 7. List of Products Number, OVLO and VGS

Product number	OVLO threshold, falling typ (V)	External MOSFET Gate-Source voltage (Control ON) typ (V)
TCK420G	27.73	10
TCK421G	23.26	10
TCK422G	14.29	10
TCK423G	14.29	5.6
TCK424G	10.83	5.6
TCK425G	6.31	5.6

### 8. Block Diagram

### 9. PIN Description

PIN	Name	Description
A1	VGATE1	Gate Driver Output for Gate 1 Or OPEN state (Non connection) for Single MOSFET use case
B1	VGATE2	Gate Driver Output for Gate 2
C1	VOUT	Monitoring Output voltage Connecting Output (Source 2) of Common Drain MOSFET Or Connecting Output (Source) of single MOSFET use case
A2	VIN	Input power supply voltage Connecting Output (Source 1) of Common Drain MOSFET Or Connecting Output (Drain) of single MOSFET use case
B2	GND	Ground
C2	VCT	Mode control input terminal VCT=High turn the external MOSFETs ON, VCT=Low, turn the external MOSFETs OFF

### 10. Operation Table

$2.7V \leq V_{IN} \leq 28 V$  ( $T_a = -40$  to  $85^\circ C$ )

VCT	VGATE1, VGATE2
High	Driver ON mode
Open	Driver OFF mode
Low

## 12. Application Note

### 12.1. Common Drain Connection N-channel MOSFET circuit example

- Input and Output capacitor**  
 An input capacitor ( $C_{IN}$ ) and an output capacitor ( $C_{OUT}$ ) are recommended for the stable operation. And it is effective to reduce voltage overshoot or undershoot due to sharp changes in output current and also for improved stability of the power supply. When used, place  $C_{IN}$  and  $C_{OUT}$  as close to VIN pin and VOUT pin to improve stability of the power supply.
- VCT pin**  
 VCT pin is pull down connection to GND. VCT High level voltage must be under 5.5V  $V_{IH}$  max.
- VGATE1,2 pin and VOUT pin**  
 VGATE1 pin is connected to Gate of VIN side MOSFET. VGATE2 pin is connected to Gate of VOUT side MOSFET. VOUT pin is connected to Source of VOUT side MOSFET. When the gate driver IC turns off state, VGATE1 terminal voltage is close to VIN voltage dropped by parasitic diode forward voltage. This circuit works to protect over voltage for VIN side MOSFET Gate-Source terminal. VOUT terminal works to protect VOUT side MOSFET as same circuit.
- Turn on recovery time after Over Voltage Lock Out (OVLO)**  
 Once  $V_{IN}$  is in normal voltage range after OVLO, the turn on recovery time is similar  $V_{GS}$  ON time ( $t_{ON}$ ).
- Under Voltage Lock Out (UVLO) and Over Voltage Lock Out (OVLO)**  
 UVLO and OVLO are designed in these products, but these are not designed to constantly ensure the suppression of the gate driver IC and external MOSFETs within operation limits. Depending on the condition during actual usage, it could affect the electrical characteristic specification and reliability. To select external MOSFETs, please consider enough electrical design margin. When using these products, please read through and understand the concept of dissipation for absolute maximum ratings from the above mention or our 'Semiconductor Reliability Handbook'. Then use these products under absolute maximum ratings in any condition. Furthermore, Toshiba recommends inserting failsafe system into the design.

## RESTRICTIONS ON PRODUCT USE

Toshiba Corporation and its subsidiaries and affiliates are collectively referred to as "TOSHIBA".

Hardware, software and systems described in this document are collectively referred to as "Product".

- TOSHIBA reserves the right to make changes to the information in this document and related Product without notice.
- This document and any information herein may not be reproduced without prior written permission from TOSHIBA. Even with TOSHIBA's written permission, reproduction is permissible only if reproduction is without alteration/omission.
- Though TOSHIBA works continually to improve Product's quality and reliability, Product can malfunction or fail. Customers are responsible for complying with safety standards and for providing adequate designs and safeguards for their hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption. Before customers use the Product, create designs including the Product, or incorporate the Product into their own applications, customers must also refer to and comply with (a) the latest versions of all relevant TOSHIBA information, including without limitation, this document, the specifications, the data sheets and application notes for Product and the precautions and conditions set forth in the "TOSHIBA Semiconductor Reliability Handbook" and (b) the instructions for the application with which the Product will be used with or for. Customers are solely responsible for all aspects of their own product design or applications, including but not limited to (a) determining the appropriateness of the use of this Product in such design or applications; (b) evaluating and determining the applicability of any information contained in this document, or in charts, diagrams, programs, algorithms, sample application circuits, or any other referenced documents; and (c) validating all operating parameters for such designs and applications. **TOSHIBA ASSUMES NO LIABILITY FOR CUSTOMERS' PRODUCT DESIGN OR APPLICATIONS.**
- **PRODUCT IS NEITHER INTENDED NOR WARRANTED FOR USE IN EQUIPMENTS OR SYSTEMS THAT REQUIRE EXTRAORDINARILY HIGH LEVELS OF QUALITY AND/OR RELIABILITY, AND/OR A MALFUNCTION OR FAILURE OF WHICH MAY CAUSE LOSS OF HUMAN LIFE, BODILY INJURY, SERIOUS PROPERTY DAMAGE AND/OR SERIOUS PUBLIC IMPACT ("UNINTENDED USE").** Except for specific applications as expressly stated in this document, Unintended Use includes, without limitation, equipment used in nuclear facilities, equipment used in the aerospace industry, lifesaving and/or life supporting medical equipment, equipment used for automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions, safety devices, elevators and escalators, and devices related to power plant. **IF YOU USE PRODUCT FOR UNINTENDED USE, TOSHIBA ASSUMES NO LIABILITY FOR PRODUCT.** For details, please contact your TOSHIBA sales representative or contact us via our website.
- Do not disassemble, analyze, reverse-engineer, alter, modify, translate or copy Product, whether in whole or in part.
- Product shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable laws or regulations.
- The information contained herein is presented only as guidance for Product use. No responsibility is assumed by TOSHIBA for any infringement of patents or any other intellectual property rights of third parties that may result from the use of Product. No license to any intellectual property right is granted by this document, whether express or implied, by estoppel or otherwise.
- **ABSENT A WRITTEN SIGNED AGREEMENT, EXCEPT AS PROVIDED IN THE RELEVANT TERMS AND CONDITIONS OF SALE FOR PRODUCT, AND TO THE MAXIMUM EXTENT ALLOWABLE BY LAW, TOSHIBA (1) ASSUMES NO LIABILITY WHATSOEVER, INCLUDING WITHOUT LIMITATION, INDIRECT, CONSEQUENTIAL, SPECIAL, OR INCIDENTAL DAMAGES OR LOSS, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF OPPORTUNITIES, BUSINESS INTERRUPTION AND LOSS OF DATA, AND (2) DISCLAIMS ANY AND ALL EXPRESS OR IMPLIED WARRANTIES AND CONDITIONS RELATED TO SALE, USE OF PRODUCT, OR INFORMATION, INCLUDING WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY OF INFORMATION, OR NONINFRINGEMENT.**
- Do not use or otherwise make available Product or related software or technology for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). Product and related software and technology may be controlled under the applicable export laws and regulations including, without limitation, the Japanese Foreign Exchange and Foreign Trade Law and the U.S. Export Administration Regulations. Export and re-export of Product or related software or technology are strictly prohibited except in compliance with all applicable export laws and regulations.
- Please contact your TOSHIBA sales representative for details as to environmental matters such as the RoHS compatibility of Product. Please use Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. **TOSHIBA ASSUMES NO LIABILITY FOR DAMAGES OR LOSSES OCCURRING AS A RESULT OF NONCOMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS.**
