FS12-500

Description:

The FS12-500 is a dual primary and dual secondary, split bobbin design which operates with either a parallel input of 115V or a series input of 230V. The output voltage will be either 12.6V with a center-tap under a 0.5A load with the secondaries wired in series, or 6.3V under a 1.0A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
