

7.7kW Single-Phase 200-240V Monitored Automatic Transfer Switch PDU, Two 32A IEC309 32A Blue Inputs, 1 IEC309 32A Outlet, 1U

MODEL NUMBER: PDUMNH32HVAT

High-capacity 7.7kW PDU with ATS provides remote power monitoring and enables redundant power for non-redundant hardware. Digital display and Ethernet interface allow site power status monitoring for primary and secondary inputs, plus load level monitoring to prevent overload conditions.

Description

The PDUMNH32HVAT 7.7kW Single-Phase 200-240V Monitored Automatic Transfer Switch / ATS PDU provides remote power monitoring and enables redundant power for network devices with non-redundant power supply configurations. Ideal for data centers and server rooms, it mounts in 1U of space in EIA-standard 19-inch racks and has one IEC 309 32A Blue outlet for connecting a single device or an additional 230V multi-outlet PDU with IEC 309 32A Blue plug, such as Tripp Lite's PDUMV32HV. Dual 10-ft. (3.05 m) input cords, each with IEC 309 32A Blue input plug, connect to any two separate primary and secondary input power sources, including out-of-phase input sources. The PDU constantly evaluates the power quality of both inputs. To ensure connected equipment remains powered, dynamic solid-state (TRIAC) automatic transfer switching allows the PDU to switch to the secondary source within 1–5 milliseconds if the primary source fails or becomes unstable.

Built-in LX Platform network management interface allows remote access to the PDU for power monitoring, configuration, control and to receive user-configurable notifications. The Java-free LX Platform HTML5-based network interface enables full remote access for PDU status monitoring and email notifications via secure web browser, SNMP, telnet or SSH. Provides real-time load/current data with billing-grade accuracy (± 1 percent). It supports 10/100 Mbps auto-sensing for optimum communication with an Ethernet network. Optional EnviroSense2 modules (sold separate) provide a variety of environmental monitoring capabilities. Protocols supported include HTTP, HTTPS, SMTP, SNMPv1, SNMPv2, SNMPv3, telnet, SSH, FTP, DHCP and NTP.

Features

Primary and Secondary Inputs for Power Redundancy Enables redundant power configurations for network devices with a single input cord or other non-redundant power supply configuration Two IEC 309 32A Blue (2P+E) inputs, each with 10-ft. (3.05 m) cord, connect to separate primary and secondary input power sources Any two input power sources are supported for primary and secondary inputs, including out-of-phase power sources

Built-In IEC 309 32A Blue Outlet Power a single 32A plug-in device or multiple network devices through a connected 32A 200-240V multi-outlet PDU, such as Tripp Lite's PDUMV32HV metered PDU input (sold separately)

Automatic Transfer Switching Dynamic solid-state (TRIAC) automatic transfer switching Switches to secondary power source if primary source fails or becomes unstable 1-5 ms transfer time ensures uninterrupted operation of connected equipment Built-in processor monitors power sources and prevents
