RFUV1703

21 GHz to 26.5 GHz GaAs MMIC IQ Upconverter

General Description

Qorvo's RFUV1703 is a 21 GHz to 26.5 GHz GaAs pHEMT upconverter, incorporating an integrated doubler, LO buffer amplifier, a balanced single sideband (image rejection) mixer followed by Variable Gain Amplifier, DC decoupling capacitors. The combination of high performance part and low-cost packaging makes the RFUV1703 a cost effective solution, ideally suited to both current and next generation point-to-point and V_{SAT} applications. RFUV1703 is packaged in a 5 mm x 5 mm QFN to simplify both system level board design and volume assembly.

Lead-free and RoHS compliant
