

Ceramic Ball Grid Termination Arrays

CHC Series

Features

- Superior TaNFilm® resistors on ceramic substrate
- High density networks on a reduced footprint
- Excellent high frequency performance
- Standard tolerances to $\pm 1\%$
- RoHS compliant terminations available

 All Pb-free parts comply with EU Directive 2011/65/EU amended by (EU) 2015/863 (RoHS3)

TT Electronics' chipscale on ceramic CHC offers a high-performance termination array in a small surface mount BGA package. Solder balls placed on a ceramic substrate permit very low parasitic inductance and capacitance. This improves speeds, lowers propagation delays, and reduces ground bounce. Also, TT Electronics' proven tantalum nitride thin film technology can handle the most demanding environmental conditions.
