

Thick Film High Power Chip Resistor

WHPC Series

Features

- Double the standard power for size
- Inverse terminated versions
- Small footprint
- Excellent pulse performance
- Extra-high-power range
- AEC-Q200 Qualified

 All parts are Pb-free and comply with EU Directive 2011/65/EU amended by (EU) 2015/863 (RoHS3)

Construction

Thick-film electrodes, resistor material, overglaze and organic protection are screen printed on an alumina substrate. Wrap-around terminations have an electroplated nickel barrier and matt tin plating; this ensures excellent leach resistance properties and solderability.

Marking

5% parts are marked with 3 digits. The first two digits are significant figures and the third digit is the number of zeros to follow. The letter "R" represents a decimal point.

1% parts have four digits, the first three digits are significant figures and the fourth digit is the number of zeros to follow. The letter "R" represents a decimal point.

Solvent Resistance

The body protection is resistant to all normal industrial cleaning solvents suitable for printed circuits.
