# **High Power MELF Resistors**

### **WRM-HP** Series

#### Features:

- AEC-Q200 qualified
- High power up to 1W
- Tolerance down to 0.1%
- TCR down to 15ppm/°C
- High pulse handling capability

All parts are Pb-free and comply with EU Directive 2011/65/EU amended by (EU) 2015/863 (RoHS3)

#### Construction

A metal film is deposited onto a high dissipation ceramic former to which tin plated terminating caps are fitted. The resistor is adjusted to value by a helical cut in the film and the body is protected by a lacquer coating.

#### Marking

Resistance values are colour coded with three or four bands, indicating value and multiplier.

#### Terminations

MaterialPlated steel capSolderabilityThe pure tin finish produces ageing free contacts on which low melting solders can be used. Dipped area shall be<br/>covered with a smooth and bright solder coating after 3 seconds immersion at 215°C.

#### **Solvent Resistance**

The body protection and marking are resistant to all normal industrial cleaning solvents suitable for printed circuit boards.

### Packaging

WRM0204HP resistors are supplied in 8mm plastic tape on 7" reels. WRM0207HP resistors are supplied in 12mm plastic tape on 7" reels. Packing complies with the requirements of IEC286-3.
