

## QUARTERWAVE

Our most affordable mobile antennas receive the most detailed attention. Quarterwave models and 3-dB chrome nut models feature a gold-plated brass contact and heavy duty specially formulated Stand Up grommets that last longer and stay straighter. For any mobile application, you can be sure that we have a feature packed solution for you.

### FEATURES AND BENEFITS

- All Quarterwave antennas have gold-plated contacts (corrosion resistant/most conductive)
- Stand-up™ grommets do not degrade over time
- High spring temper rods stay straighter longer
- Stainless-steel corona ball stays on rod – no dissimilar metal interaction as in competitor designs
