# MT2000

Altera medical-grade, very thin wall, polyolefin heat-shrinkable tubing

Altera MT2000 tubing can provide electrical insulation, mechanical protection, strain relief, color coding, and identification for many medical components and devices.

Altera MT2000A tubing provides an inner layer of adhesive. During installation, the USP Class VI adhesive layer will reflow around the substrate to provide sealing or blocking against fluids and other bioburden materials.

Altera MT2000 tubing may be sterilized by gamma radiation or ethylene oxide with no significant changes in properties. It is fabricated from materials that meet the requirements of U.S. Pharmacopeia (USP) Class VI plastics (contact with injectables and body fluids or tissue).

# Temperature rating

gamma sterilization.

Full recovery temperature:	140°C
Continuous operating temperature:	–40°C to 105°C

#### Ordering information

Colors	Standard	Black, clear		
	Nonstandard	White, red, yellow, blue, orange		
Size selection	Always order the largest size that will shrink snugly over the component being covered.			
	A variety of specia	of special order sizes are available.		
Standard packaging	On plastic spools, double-bagged			
Ordering description	ame, size, and color; for example, MT2000-3.0-0 (0=Black).			
	Specify MT2000A for adhesive-lined constructions in sizes 3.0 and larger only (special order).
