## 1. Style

“Detector Switches” are mainly used as signal switches of electric devices, with the general requirements of mechanical and electrical characteristic.

Standard test conditions shall be 5 to 35°C in temperature, 45 to 85%RH in humidity and 86 to 106kPa in atmospheric pressure. Should any doubt arise in judgment, tests shall be conducted at 20±2°C in temperature, 60 to 70%RH in humidity and 86 to 106kPa in atmospheric pressure.

1.1 Operating Temperature Range: -40°C to 85°C

1.2 The shelf life of product is within 6 months.

**2. Current Range:** 1mA, 5VDC

**3. Type of Actuation:** Auto Return

## 4. Test Sequence:

	Item	Description	Test Conditions	Requirements
Appearance	1	Visual Examination	Physical inspection without applying any external forces.	There shall be no defects that affect the serviceability of the product.
Electric Performance	2	Contact Resistance	Shall be measured at 1KHz ± 200Hz (20mV Max, 50mA Max) or 1A 5VDC by voltage drop method.	500mΩ Max.
	3	Insulation Resistance	Measurements shall be made at 500 VDC potential between terminals and cover.	100MΩ Min.
	4	Dielectric Withstanding Voltage	Apply 300 VAC (50Hz or 60Hz) between terminals and cover for 1 minute.	There shall be no breakdown or flashover

Mechanical Performance	5	Operating Force	Applying force to the center of the stem for 2.7mm	40gF Max.
	6	Terminal Strength	The static load 300gF shall be applied on top of the terminal in every direction for 1 minute.	Shall be free from any terminal damage and looseness and breakage of terminal holding position. Terminal may be bent after test, electrical performance requirement specified in item 4 shall be satisfied.
	7	Solder heat Resistance	Manual Soldering: -Terminal: 350°C Max. -Time: 3 Seconds Max. Reflow Soldering: -2 times or less.  <p>Above mentioned time-temperature chart is based on the temperature on the parts-mounting surface of P.C.B.</p>	1) Shall be free from any pronounced deforming in appearance.  2) The electrical performance requirements as per items 2 through 4 shall be satisfied.
Durability	8	Operating Life	Tested as follows: 100,000 cycles operations at a rate of 20 to 30 cycles/min without load. (When pushing the actuator at right angle)	1) Contact resistance: 1Ω Min. 2) Operating force: Between 10 and -30% of initial value.  Every part should not defect in appearance and mechanical performance.
Weather-proof	9	Humidity Test	Following the test set forth below the sample shall be left in normal temperature and humidity conditions for 1 hour before the measurements are made: 1) Temperature: 40±2°C 2) Relative Humidity: 90 to 95% 3) Time: 168 hours Water drops shall be removed.	1) Insulation resistance: 100MΩ Min.  2) Withstand voltage: To be satisfied with item 4.
	10	Heat Test	Following the test set forth below the sample shall be left in normal temperature and humidity conditions for 1 hour before the measurements are made: 1) Temperature: 85±2°C 2) Time: 96 hours Water drops shall be removed.	
	11	Cold Test	Following the test set forth below the sample shall be left in normal temperature and humidity conditions for 1 hour before the measurements are made: 1) Temperature: -20±2°C 2) Time: 96 hours Water drops shall be removed.	

### ■ Precautions in Handling

1. Care must be taken to ensure excess flux on the top surface of the printed circuit board does not adhere to the switch.
2. Do not wash the switch.

### ■ Recommended storage conditions:

Store the products in the original packaging material. After opening the package, the remaining products must be stored in the appropriate moisture-proof & airtight environment.

Do not store the switch in the following environment or it may affect performance and solderability:

1. temperatures below -10° C to 40°C & humidity at 85% (min)
2. environment with corrosive gas
3. storage over 6 months
4. place in direct sunlight
