

WIRE, MODIFIED FLUOROPOLYMER INSULATED, T4 (3000 Hours @ 150°C) 50 VOLT, LIGHTWEIGHT
The complete requirements for procuring the wire described herein shall consist of this document and the issue in effect of Raychem Specification WSD 1223

COLOUR CODE: The '*' in the part number shall be replaced by a standard numerical colour code designator. Additional number after base colour indicates stripe.
e.g. ACW0219-0.50-96 White base colour with blue stripe.

Where stripes are required, the wire carries two co-extruded longitudinal stripes of the same colour. The individual stripe width is a minimum of 10% of the wire circumference with an overall stripe coverage of 30% maximum

Co-extruded longitudinal stripes are not available on CSA size 10.0mm.

ADDITIONAL TESTING: Insulation Flaws:
100% Spark Test on Finished wire of 5.0 kV High Frequency AC RMS or equivalent.

MARKING REQUIREMENTS: All wire to be marked, with the following exceptions, Wire for:
component use,
Spooling instruction S50 and SMP-SP.

Frequency of mark:

Repeat mark along length of wire at a distance of 165 mm between the start of one mark and the start of another.

Colour of mark:

- ☐ All black base products regardless of stripe colour are to be marked using white ink.
- ☐ All other base colours except black regardless of stripe colour are to be marked using black ink.

MARK DETAIL: NOT TO SCALE

APPROVAL: Electronic approval - no signatures will appear.
