- Sealed Circular LC ODVA Conforming Connector

and optical performance needs in multiple industries.

TE Connectivity (TE) is proud to offer a full rugged fiberoptic product family.

With TE's complete selection that includes world class Physical Contact and Expanded

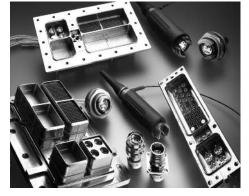

Channel and MT ribbon fiber as well as global industry standards of EN4165 and ARINC

801 along with our M83526/20 and /21 qualified products and wide variety of Expanded

Beam technologies the end user is guaranteed a complete choice that meets their cost

Beam technologies that include MC series of high density contact, a Rugged Single

Expanded Beam Products Product Facts

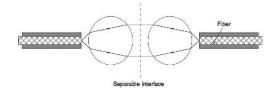

- PRO BEAM Sr., PRO BEAM Jr. and PRO BEAM Mini Connector field deployable interconnects
- ARINC 600 connectors, with inserts/holder blocks designed for Mini Expanded Beam — up to 128 channels on size 3 ARINC 600
- MIL-C-38999 Series III shell size 11 and 15 style circular connectors — Cable assemblies up to 8 fibers
- Unique Modular Design, for use with multimode and singlemode fiber
- Tactical cables, cable reels, backpacks
- Cable assembly and termination services
- Ball lens expands crosssectional area of light over 200 times for multimode and over 2000 times for singlemode
- Rugged hermaphroditic construction (i.e., same insert mates to each other)
- Physically non-contacting mating conditions; no wear, installed fiber ferrule protected by ball lens

ASSEMBLY CAPABILITIES TE Connectivity has extensive Rugged Optic Harness capabilities. Please consult your localTE Sales representative for assistance.

Expanded Beam Technology

From left to right: PRO BEAM Sr., PRO BEAM Jr. & Mini Expanded Beam inserts.

Expanded Beam Principle

Key Features

Fiber Optic Interconnect/
Cable System using
Expanded Beam technology,
which physically expands
and collimates the transmission signal into an optical
beam over 14 times its
original diameter (the cross
sectional area of the light
beam increases over 200
times for multimode optical
signals). For singlemode
signals, the collimated
beam is over 45 times its

original diameter (the crosssectional area of the light beam increases over 2,000 times.). It is then refocused back down onto the core of the receiving fiber. This approach provides ease of alignment and low sensitivity to thermal changes and contamination. High strength, precision connector housings enhance a durable connection, optimizing low loss and repeatable performance.

Applications

Suitable for field-deployable communications, marine ship-to-shore applications, security systems, mobile diagnostic units, oil and gas exploration and other harsh environment applications demanding strength, durability and reliable performance in conditions of multiple coupling/ decouplings, blindmate situations, and high vibration.

Product Facts

- No wear on fiber optic interface; Very vibration resistant
- Easy to handle, easy to clean. Durable connection that is highly resistant to dirt/debris
- Singlemode or multimode
- Common 850/1300 Dual Wavelength, 1310, or 1550 nm wavelengths
- Easy alignment for low-loss, repeatable performance
- Consistent overall optical "link budget" assured
- Low sensitivity to thermal fluctuations and interface contamination
- Repeatable low-loss performance in harsh environments

EB termini

- Durable non-contacting interface assures ease of use/cleaning
- Termini designed to replace existing M29504/4 and /5 physical contact termini that fits the Size 16 AWG cavity of a D389999 III connector
- MM and SM termini designs

Expanded Beam Inserts

- PRO BEAM Sr. Insert the original, larger format, Field Tactical, hermaphroditic Connector System
- PRO BEAM Jr. Insert —
 the second generation,
 reduced size, Field Tactical
 Connector System a
 TE Connectivity original
 design
- Mini Expanded Beam Insert for multi-channel small form factor — the smallest expanded beam multi-channel insert in the industry, another TE Connectivity original design

Expanded Beam Products

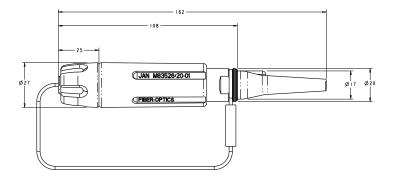

MIL-Qualified Connectors M83526/20 and M83526/21

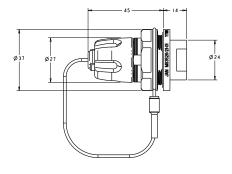

The original now has a MIL-qualified version. The benchmark PRO BEAM Jr. connector series was the model for the MIL-DTL-83526/20 and /21 specifications. TE is now the first to gain full qualification to these specifications with TE's M83526/20 and M83526/21 connectors.

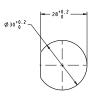

Product Facts

- MIL-qualified to MIL-DTL-83526/20B and MIL-DTL-83526/21B
- QPD- (Qualified Products Database) listed on http://qpldocs.dla.mil/
- VG-approval to VG 95319-100 and -101
- Fully intermateable and interoperable with the benchmark PRO BEAM Jr. connector series
- TE's patented Interference-Fit expanded beam design technology yields unmatched high performance and high reliability

PRO BEAM Mini Connectors

TE Connectivity is pleased to announce the natural extension from our PRO BEAM Sr. and Jr. Connector product lines.

The PRO BEAM Mini Connector saves space and weight and is perfect for high density applications. The product offers the same durability as its larger counterparts.

Performance Specifications Optical, Multimode Version

Insertion Loss, Typical*— 0.7 dB @ 1300 nm and 850 nm dual wavelength

Optical, Singlemode Version

Insertion Loss, Typical*— 0.8 dB @ 1310 nm or 1550 nm

optimized wavelength **Return Loss**** — > 34 dB

@ 1310 nm or 1550 nm optimized wavelength

- *When tested with reference quality launch/receive cable assemblies
- **RL Tested Open Ended

Mechanical

Vibration, Sinusoidal —

10 - 500 Hz, 3 directions;

0.75 mm amplitude @ 10g acceleration **Bump** — 4,000 Bumps, 6 directions,

Free Fall — 500 falls on concrete; Severity 1.2 m

Coupling Endurance —

3,000 couplings

@ 50g acceleration

Weight -

Plug — 290 grams, typical Chassis bulkhead — 150 grams, typical

Temperature

Operational Temperature —

-40°C/+85°C

 $\begin{array}{l} \textbf{Storage Temperature} - -55^{\circ}\text{C}/+85^{\circ}\text{C} \\ \textbf{Temperature, Cyclic} - -55^{\circ}\text{C}/+85^{\circ}\text{C} \end{array}$

Humidity (Damp Heat) —95% RH

Immersion

Water — 5 m depth (plug), 2 m (Bulkhead)

Material and Finish

Shell Alloy — Aluminum; or nickel aluminum bronze (high saline environment)

Plating (For Aluminum Shells Only) —

clear hard anodized or black zinc - nickel alloy (PRO BEAM Sr. bulkheads only)

Bulkhead Connector Panel Thicknesses

PRO BEAM Sr. D-Hole Connector — 6.5 mm max.

PRO BEAM Sr. Square Flange Connector — 8.5 mm max.

38999 Style EB for Harsh Environments

Product Facts

- Available in shell size 11, housed on D38999 Series III style shells for harness applications
- Multiple options available for backshells. Consult your local TE Connectivity Sales Representative
- Shell polarizations A through E available upon request

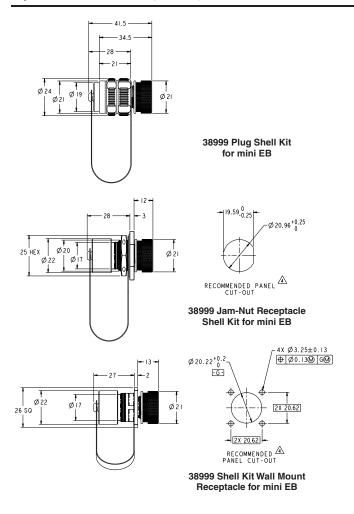

Standard Material and Finish

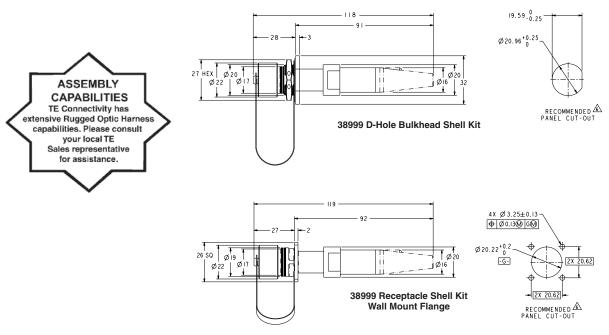

Shell Allov — Aluminum

Plating — Nickel or green chromated zinc or RoHS-compliant black chromated zinc-nickel alloy

*Refer to customer drawing for dash number designation

EB termini Product Facts

- Durable non-contacting interface assures ease of use/cleaning
- Termini designed to replace existing M29504/4 and /5 physical contact termini that fits the Size 16 AWG cavity of a D38999 III connector
- MM and SM termini designs

EB termini are combination of inserts (containing the lens) and EB termini (for terminating the fiber.

Tactical Optical Cable

Non-Metallic Tactical Field Deployable Fiber Optic Cable

Product Facts

- All terrain field deployable cable, up to 4 fibers, singlemode or multimode
- Developed for deployment under the most demanding conditions
- Tight buffered fibers are protected by Aramid yarns and a tough ruggedized polyurethane sheath
- Tested in accordance with MIL-PRF-85045
- Flexible, water resistant, high crush resistant, and lightweight,
- Designs available to be resilient against radiation exposure

Technical Data

Mil-Standard Distribution Cable — 2 Fiber Singlemode

Attenuation — \leq 0.5 dB/km @ 1310 nm / \leq 0.5 dB/km @ 1550 nm

Diameter — 5.8 mm

Weight — 25 kg/km Minimum Bending Radius — 29 mm

Crush Resistance — 2000 N/cm

Operating Temperature – -55° C to $+85^{\circ}$ C

Mil-Standard Distribution Cable — 4 Fiber Singlemode

Attenuation — \leq 0.5 dB/km @ 1310 nm / \leq 0.5 dB/km @ 1550 nm

Diameter — 5.8 mm **Weight** — 27 kg/km

Minimum Bending Radius — 28 mm

Crush Resistance — 2000 N/cm Operating Temperature —

-55° C to +85° C

Mil-Standard Distribution Cable — 2 Fiber Multimode

Fiber Type — 50 μm/125 μm and 62.5/125

Attenuation — \leq 3.5 dB/km @ 850 nm / \leq 1.0 dB/km @ 1300 (62.5/125); \leq 3.5 dB/km @ 850 nm / \leq 1.5 dB/km @ 1300 (50/125)

Mil-Standard Distribution Cable — 4 Fiber Multimode

Fiber Type — 50 μ m/125 μ m and 62.5/125

Attenuation — \leq 3.5 dB/km @ 850 nm / \leq 1.0 dB/km @ 1300 (62.5/125); \leq 3.5 dB/km @ 850 nm / \leq 1.5 dB/km @ 1300 (80/125)

Other fibers (i.e. Polyimide, Silicon buffer, Carbon coated, radiation hardened, etc.) are available upon request.

Commercial Fiber Optic Mechanical Splicing Kit

Light Crimp Splice Part Number: 1985368-1

Product Facts

- Terminates 250 micron coated, 900 micron tightbuffered fibers and 2.0 mm jacketed cable
- Attenuation (typical): ≤0.1dB
- Return Loss (at ambient; 18° to 28° C): ≥20 dB multimode ≥35 dB single-mode
- **■** Operating Temperature: -25° to 70° C
- **■** Storage Temperature: -40° to 85° C
- **■** Tensile retention: 250 micron coated: 2.0 N 900 micron buffered: 3.0 N Jacketed: 50.0 N

Part Number: 1516626-1

The KITCO 0831-8238 Kit The TFOCA Military/ Provides a low cost, highly Commercial Fiber Optic reliable, solution for the Mechanical Splicing Kit repair of Tactical Fiber Optic contains the following items: Cables featuring the ■ 2 JPS-400 Splice TE Connectivity Mechanical

- Protection Sleeves
- 12 Mechanical Splices
- Light Crimp Splice
- Precision Cleaver
- Crimp Tool with Crimp Die
- Splice Holder with Strip Template
- Cleaning Materials
- Tool Roll with all Required
- Support for LC/SC Light Crimp Connectors
- Lightweight, rugged Case

JPS Splice Enclosure Part Number: 1516516-1

The JPS 400 Splice Enclosure is designed to protect TFOCA cable that has been repaired with any mechanical splice or fusion splicer. Designed & evaluated by the United States Marine Corps, this product works in all field applications, even in severe or harsh battlefield environments. Simple to install and easy to re-enter, yet flexible enough to conform to the diameter of a reel

when re-wound. The JPS 400 is ideal for both TFOCA AND TFOCA Second Generation applications.

There are two high-grade brass retention assemblies that use both the jacket and the Aramid varn found in TFOCA cable to provide strain relief & secure the fiber inside the waterproof housing. A waterproof compression gasket prevents water and other contaminants from entering the housing.

JPS 400 Mechanical Properties & Performance Specifications:

Splice. The Kit contains all

of the tools and materials

required to make (3) three

four channel cable repairs,

Splice Protection Sleeve.

when system reliability is

essential, not an option!

including the JPS-400

An Ideal solution in a

tactical environment

- High-grade formulated polyamide conduit & threaded adapters
- Self-extinguishing, low smoke, halogen & cadmium free
- Temperature Range: -50C to +105C continuous, 150C short term
- Chemical resistance to fuels, mineral oils, fats, and alkalies

- Specifically designed for external application in traction industry
- Size: 15" x .630" (ID) x .932" (OD)
- Re-enterable & Re-usable
- Conforms to TFOCA reel sizes
- Cable Size Range: .196"-
- Pull Strength (Load Test): 250 lbs
- Waterproof

Optical Test Set for Fiber Optic Cables

Designed for harsh environments

Product Facts

- Especially designed to support the installation of optical links in the field
- Able to test both cable drums and entire links
- Powered by batteries with high autonomy
- Suitable for diagnostics and construction teams
- Easy to use, ergonomic, rugged design
- Suitable for cable length up to 10 km
- Supports up to 4 fibers per cable with various types of connectors

Diagnostic Features

Power Meter

The optical power from any source can easily be measured with the power meter function.

Optical Source

A continuous optical signal is generated and transmitted with selectable output power.

Drum Test / Cable Test

Test of an entire cable drum with automatic good/bad indication. The test of an entire cable is realized with a 2nd KPG-opt or a loop connector.

Test Frames (optional)

The KPG-opt can generate specific test frames as used in optical networks and LOS systems.

Optical Tester

Fiber Optic Accessories

Hand Held Visual Fault Locator (VFL)

Product Facts

- 650 nm (visible) Class 2 1.0 mW max Diode Laser
- Continuous and flashing (2-3 Hz pulsed) modes
- Rugged rubber shell and body design modeled after a popular military connector
- Lanyard attached dust cover
- Standard 2.5 mm adapter for SC, ST, and FC connectors
- Optional 1.25 mm adapter for LC and MU connectors.
- Unique design allows adapter to permanently reside on VFL so it is not misplaced allowing user to choose 1.25 mm or 2.5 mm
- Uses 1 "AA" style battery for >30 hours of continuous use
- Soft-sided belt case for convenience and storage

The TE Connectivity Hand Held Visual Fault Locator (VFL) is a rugged and affordable solution for identifying breaks and bending in optical fibers and cabling. Its powerful, red (650 nm) laser provides the ability to locate damaged, broken, or tightly bent fibers that cause undesirable attenuation in your system.

The jacket of the cable will glow red at the location of the fault. The FLASH button allows the user to toggle between continuous or pulsed mode. The compact, rugged, and balanced design is based upon a popular harsh environment fiber optic connector. The single "AA" style battery is good for >30 hours of continuous use and the soft-sided protective case with belt loop provides a convenient and protective means of storage.

Applications

Affordable VFL Solution for:

- Identifying breaks, bends, and other damage in optical fibers
- Tracing fiber paths
- Identifying termination errors
- Continuity testing

Product Facts

- **■** For Mini Expanded Beam Inserts
- For use in 100 base-FX **Ethernet LAN applications** per ARINC 664 and ARINC 763
- Insert holders designed to ARINC 600, Supplement 13 or to specific customer needs for Mini Expanded Beam inserts
- **■** Drop-In Insert Holders utilize Standard ARINC 600 Retainers
 - Hard Stop on Plug Side
 - Spring-Loaded Stop on Receptacle Side
 - Captive Hardware
- Facial Sealing Optional
 - Bonded to Receptacle **Block Mating Face**
 - Raised Collar Seal around Optics Insert compresses against **Chamfer on Plug Block Mating Face**

Comparative on Expanded Beam Inserts

Comparative on Expanded Beam Inserts' weight and Insertion Forces when applied to an ARINC housing

- ARINC 600 connector mated pair size 2 = 440 grams (without copper contacts)
- ARINC style Mini and Junior size Expanded Beam inserts = 5 pounds insertion force each when applied to the Rack and Panel ARINC Connector inserts
- Signal Cavity Optical Holder insert (i.e.: holds up to six mini inserts with four fiber ball lenses each or up to 24 fibers each insert set) = @ 30 grams
- Power Cavity Optical Holder insert (i.e.: holds up to four mini inserts with four fiber ball lenses each or up to 16 fibers each insert set) = @ 20 grams
- Insert mated pair PRO BEAM Jr. Connector insert set = @ 41.79 grams
- Insert mated pair Connector insert set = @ 16.17 grams
- Fiber = single fiber ≤ 4 kg / km
- Fiber = four fiber jacketed with a support member ≤ 24 kg / km
- Static spring force per mated Expanded Beam insert pair = 5 lbs.

Physical Contact & Technology

ARINC 801 Optical Termini

Product Facts

- Optical termini for use with GPR, ARINC 600, circular MIL-DTL-38999 connectors.
- Industry Standard 1.25 mm ceramic ferrule
- Compatible with 1.5-2.2 mm Tight jacket and loose tube cable construction:
 - MT Tight jacket cable
 - ML Loose tube cable
- SM / MM versions

Materials

Housings — Nickel Plated Copper Ferrule — Zirconia Spring — Stainless Steel Crimp Sleeve — Nickel Plated Copper Protective Cover — Silicone

Optical Performance Singlemode, 1310 nm/1550 nm (UPC):

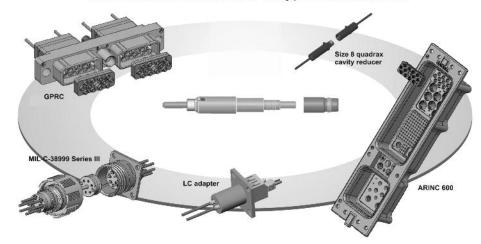

Attenuation, Mean — 0.15dB

Return Loss —> 50dB Multimode, 850 nm/1310 nm: Attenuation, Mean — 0.10dB Return Loss —> 20dB

ARINC 801 Optical Termini (Continued)

There are three types of ARINC 801 Optical Termini available dependent upon cable structure.

TE Connectivity has multiple connector types/families available for the ARINC 801 Optical Termini System.

These are:

- General Purpose Rectangular Connectors
 - F5 & F12 Inserts
- MIL-DTL-38999 connectors
 - **13-04**, 15-06, 21-16
- **ARINC 600**
 - F12 combinations and F36
- Quadrax Cavity Reducers
- Motherboard & Daughtercard Solutions

Ruggedized Fiber Optic Products (Continued)

MIL-T-29504 Style Optical Connector Range

Product Facts

- Manufactured to meet the requirements of MIL-T-29504/4 and 5
- Proven in both rotary and fixed-wing aerospace applications
- Sprung loaded socket contacts ensure consistent pressure and performance levels

The range of MIL-T style optical contacts is designed specifically for use with the MIL-DTL-38999 Series III connectors within the standard size 16 cavity.

Optical Inserts for EN4165 and ARINC 809

Product Facts

- Interchangeable modular inserts
- Easy use insertion / extraction tool
- Easy access to optical contacts for cleaning maintenance
- Compliments DMC-M multiway modular connector range

TE has designed a comprehensive range of Fiber ptic inserts to further enhance our EN4165 connector range. To date the modular inserts can accommodate MC5, MC6 ribbon, Arinc 801 and EN4531 optical contacts.

Fiber Optical Insert for DMC-M

Product Facts

- Light weight composite
- Colour coded
- Modularity
- Screw coupling

An optical insert is available for the popular DMC-M connector which enables six standard MC5 contact to be incorporated into a single insert package or 12 way MC6 or 4 way Arinc 801 contacts.

RSC-v

Product Facts

- Suitable for singlemode applications
- Good return loss measurements
- Tuneable PC variant for optimum performance

APC version of the ever popular RSC connector range. The RSC-V is available with either an angled polish (APC) or a tuneable physical contact (PC) variant.

Ruggedized Circular Connectors

38999

Product Facts

- 100% Scoop Proof
- High strength Aluminium shells
- Superior flourosilicone seals provide maximum tear resistance and sealing memory
- Threaded coupling with self locking for anti-vibration integrity

Military circular connector qualified to MIL-DTL-38999, Series III for fiber optic MIL-T-29504 style termini. Rugged design offers maximum performance for shock and vibration, environmental, moisture and corrosion resistance and provides effective EMI shielding.

MC3 MKII Fiber Optic Multiway Connectors

Product Facts

- Insert-to-insert keying assists precision alignment
- Individually rear insertable/ removable optical contacts enable easy assembly
- Backshells and adaptors available for most single and multifiber cable types

General Specifications

Fiber type – Multi and Singlemode fiber Ranging from 5 to 200um core diameters **Channels** – 5, 8 and 12 Optical channels **Cable size** – 1.5 mm to 3.0 mm outer

Materials

iacket

Shell – Aluminium; nickel plated Aluminium; cadmium plate olive drab Aluminium bronze (special order)

Contact body

Arcap – Titanium **Ferrule** – Zirconia

Alianement sleeve – Zirconia

Seals – Fluorosilicone or nitrile

Plating – Aluminium, nickel plated Aluminium, cadmium plate olive drab Aluminium bronze (special order)

Optical Performance

Insertion loss - 0.25dB typical*
Return loss - 40dB typical*

Repeatability - Typically better than 0.1db with 50/125µm fiber

Environmental Specification Temperature

High temperature endurance - $+155^{\circ}C^{*}$

Low temperature endurance - 65°C* **Durability** - Greater than 500 mating cycles

Vibration

Sinusoidal - 5-3000Hz, 30g **Bump** - 4000 bumps, 40g

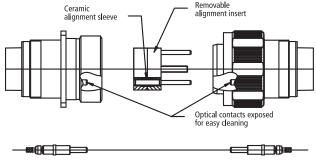

MC3 MKII Fiber Optic Multiway Connectors

The MC3 range of high performance connectors incorporates individual optical contacts inserted from the rear.

The removable socket insert allows for easy access to the optical faces to aid cleaning and maintenance.

The MC3 MkII range has the same removable alignment insert feature as the MC3 for easycleaning (which can be specified in either receptacle or plug), and is suitable for use with most singlemode and multimode optical fibres with core diameters from 5 to 200µm. 5, 8 and 12 optical channels are accommodated in the MIL-C-38999 Series III style connector shells. The MC3 MkII connector range has been tested and approved for use in severe environments.

Identical sprung optical contacts in receptacle and plug connectors

Kev Features

- Precision Zirconia ceramic ferrules and alignment sleeves ensure superior, repeatable optical performance with physical contact polishing techniques
- Insert-to-insert keying assists precision alignment
- Individually rear insertable/removable optical contacts enable easy assembly
- Easily removable alignment sleeve insert facilitates simple cleaning and maintenance

- Colored band indicates full mating
- Identical optical contacts are spring loaded in both plug and receptacle to maintain physical contact even under severe shock or vibration conditions (rigid contact option available for receptacle)
- Simple termination process and tooling
- Backshells and adaptors available for most single and multifiber cable types

- MIL-C-38999 Series III antivibration coupling mechanism and tri-start thread
- Alternative shell keyway orientations provide protection from inadvertent mis-mating
- Dynamic '0' ring seal between mating shells provides water submersion capability

to change.

Optical Contacts (ordered separately)

Optical contacts are supplied with a profile formed optical end face and are available for singlemode or multimode fibers. Contacts are available in either sprung or rigid versions, depending upon application (rigid contacts should be used in bulkhead receptacles only).

Optical Contacts (ordered separately) Options are as follows:

***1 Optical hole Ø 'A' fiber size (see table 1)

Please note: for type 00 (**2) the cable crimp sleeve is not supplied i.e. for terminating buffered fiber.

MC4 Series - Duplex Fiber Optic Connectors

MC4 Series - Duplex Fiber **Optic Connectors Product Facts**

- Insert-to-insert keying assists precision alignment
- Individually rear insertable/ removable optical contacts enable easy assembly
- Backshells and adaptors available for most single and multifiber cable types

fiber connector is based upon shell size 9 Mil-C 38999 Series III making this an extremely compact environmentally sealed 2-way connector. The MC4 is suitable for use with most multimode and singlemode fibers with core diameters of 9 to 200µm. Simplex and duplex constructions can

The MC4 Duplex optical

be accommodated with suitable connector backshells.

Precision ceramic ferrules and alignment sleeves ensure optical performance and reliability over an extended service life.

The optical ferrules are sprung loaded in both the plug and receptacle shells.

This provides an axial load equalization ensuring that butt joint contact is maintained even when the connector is subjected to vibration levels in excess of

This coupling nut is built in antivibration clicker mechanism to prevent inadvertent uncoupling under adverse vibration conditions.

General Specifications Optical

Attenuation - Less than 0-4dB (50/125pm)

Repeatability - Better than 0.2dB **Fiber types** – 50, 62.5, 85/125pm 100/140pm 200/280pm

Cable types

Tight jacket 2.5mm dia Duplex 4.5mm OD For other cable sizes consult Technical Sales

MC5 - High Density Fiber Optic Multiway

MC5 - High Density Fiber Optic Multiway Product Facts

- Insert-to-insert keying assists precision alignment
- Individually rear insertable/ removable optical contacts enable easy assembly
- Backshells and adaptors available for most single and multifiber cable types

The MC5 high density range is the very latest advance in high performance multichannel fiber optic connectors, capable of sustained performance over a wide range of environmental conditions. The MC5 uses the most recent developments in precision ceramic ferrules and lightweight

MIL-C-38999 Series III connector shell materials, combined with purpose designed inserts to ensure the optical performance meets the requirements of high reliability optical systems. Compact sprung loaded, precision optical contacts are individually insertable / removable for

ease of assembly.Extensive testing has confirmed excellent performance under the most demanding environmental conditions with the MC5 chosen as the standard multiway fiber optic connector for the European Fighter Aircraft, Typhoon.

General Specifications

Fiber type — Suitable for fibres with core diameters 5-200um

Channels – 2, 4, 6, 8, 10, 18, and 30 channels

 $\begin{tabular}{ll} \textbf{Cable size} - 1.8 \text{ mm, } 2.1 \text{ mm and} \\ 2.5 \text{ mm jacket} \\ \end{tabular}$

Materials

Shell – Composite (qualified to MIL-C-38999)

Contact body - Arcap

Ferrule - Zirconia

Alignement sleeve - Zirconia

Seals - Fluorosilicone

Plating - Nickel plate

Optical Performance

Insertion loss - 0.25dB typical*
Return loss -40 dB typical

Repeatability - Typically better than 0.1dB (with 50/125µm fiber)

Environmental Specification

Temperature

High temperature endurance - +150°C, 760 hours

Low temperature endurance -65°C, 500 hours

Durability - >1500 mating cycles **Vibration**

Sinusoidal - 5-3000Hz, 40g, 10 hours **Random** - 25-2000Hz, 5g2/Hz (50g rms), 16 hrs

Key Features

- Compact 1.25mm precision zirconia ceramic ferrules
- Alignment sleeves ensure superior, repeatable optical performance with physical contact polishing techniques
- Purpose designed inserts, and insert-to-insert keying assist precision alignment
- Individually rear insertable / removable optical contacts enable easy assembly and maintenance
- Easily removable alignment sleeve insert facilitates simple cleaning and maintenance

- Color band indicates full mate condition
- Identical optical contacts are spring loaded in both plug and receptacle to maintain physical contact even under severe shock or vibration conditions (rigid contact option available for receptacle)
- Simple termination process and tooling
- Composite lightweight, high strength, corrosion resistant connector shells
- MIL-C-38999 Series III antivibration coupling mechanism, and tri-start thread

- Extensive range including 1,2,4,6,8,10 and 30 way connectors
- Available in both plug socket / receptacle pin and plug pin / receptacle socket configurations

^{*}fiber and polishing process dependent

MC5 - High Density Fiber Optic Multiway

MC5 Optical Termini (ordered separately)

Optical contacts are supplied with a profile formed optical end face and are available for singlemode or multimode fibers. Contacts are available in either sprung or rigid versions, depending upon application (rigid contacts should be used in bulkhead receptacles only).

Options are as follows:

****1 = Optical hole \emptyset 'A' (fiber size) (see table 1) **2 = Cable type (see table 2)

Please note: for type 00 (**2) the cable crimp sleeve is not supplied i.e. for terminating buffered fiber.

Table 1 (***1)

MC6 - Fiber Optic Ribbon Cable Connector

MC6 - Fiber Optic Ribbon **Cable Connector**

Product Facts

- Insert-to-insert keying assists precision alignment
- Individually rear insertable/ removable optical contacts enable easy assembly
- Backshells and adaptors available for most single and multifiber cable types

Fiber Type:

Channels – 2 to 72

Cable size - Telecom grade cable Aerospace grade cable

Materials

Shell - Composite (MIL-C-38999)

Contact body - Nickel/cadmium plated composite polymer

Ferrule - Thermoplastic

Alianment Pin:

Seals - Fluorosilicone

Plating - Nickel

The MC6 high density, fiber optic connector series is now further enhanced with the option for industry standard MT Ferrule inserts. The insert accommodates 2 to 72 channels and can be supplied pre-terminated if required. The MC6 uses the

compact MIL-C-38999 Series III, shell size 11 body, also used on the proven MC5 connector. It has a lightweight, corrosion resistant, metal-plated composite shell which provides high strength and durability, combined with EMC shielding.

The result is a very compact, rugged, environmentally sealed solution for a wide range of applications, such as avionics, data bus and in-flight entertainment systems.

Key Features

- Common contact single or multimode MT ferrules MIL-C-38999 Series III anti-vibration coupling with tri-start thread
- Easily accessible Angled Physical Contact (APC) and Physical Contact (PC) faces for cleaning and maintenance
- Rear release contact using size 8 extraction tools Retrofit triple rear seal available

- · Color band indicating full mating
- The use of industry standard MT interface and a variety of housing options ensures integration into new and existing systems
- Interchangeable with MIL-C-38999 Series III

MC801 Connector

MC801 Connector Product Facts

- Uses precision ARINC 801 fiber optic termini (typical multi-mode insertion loss is less than 0.15 dB).
- Removable alignment sleeve insert for easy cleaning of fiber optic termini
- Three stages of alignment: shell-to-shell keys, guide pins and ceramic alignment sleeves
- Includes all of the features of standard D38999 straight plug and panel mount receptacle shells
- Scoop-proof connector design
- Option for alternate keys and keyways

Insert Arrangements

11-02 13-04 15-06 17-08 19-12 21-16 23-24 25-32

Materials

TE's RSC range of high performance fiber optic connectors are manufactured from Arcap for corrosion resistance and feature a rugged construction, incorporating environmental sealing and an anti-vibration coupling mechanism. The optical contact is sprung loaded and common to both plug and receptacle to maintain physical contact even under severe shock or vibration. The RSC range is suitable for both singlemode and multimode applications, and features easily accessible fiber faces for cleaning purposes.

Key Features

- Precision Zirconia ceramic ferrule and alignment sleeve to ensure superior repeatable optical performance with physical contact polishing techniques
- Manufactured from Arcap for corrosion resistance
- Easy access to ferrule to facilitate simple cleaning and maintenance
- Common ferrule carriers for the plug and receptacle
- Optical contact is sprung loaded in both the plug and receptacle to maintain physical contact even under severe shock or vibration
- Simple termination process and tooling

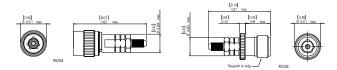

- Anti-vibration coupling mechanism
- Six alternative shell keyway orientations provide protection from inadvertent mis-mating
- Able to accommodate various sizes of multimode and singlemode fiber - (8/125, 50/125, 62.5/125, 100/140, 200/280mm)
- Able to accommodate various sizes of simplex cable (1.6mm -5mm)
- Compatible with HA Connector series

Sealed Circular LC ODVA

Sealed Circular LC ODVA Conforming Connector

Product Facts

- IP67 rated to ensure protection from dust and water immersion
- LC connector qualified to Telcordia GR-326 and TIA/EIA 568B.3
- Temperature range of -40°C to 85°C
- Bayonet-style mechanical lock
- Flame retardant materials per UL 94 V-0
- Dual mounting bulkhead design
- Singlemode and multimode fiber
- Can be used with cable types 9/125, 50/125 and 62.5/125
- LC to LC internal to the box Jumpers
- LC connector accepts tactical cable with 4.5 mm – 7.5 mm OD
- ODVA Conforming Plug to X interface on tactical with break out
- ODVA Conforming Plug to Plug on tactical cable
- Build to customer need

Applications

The LC ODVA Conforming Connector is ideal for:

- Harsh environments where chemicals, corrosive gases and liquids are commonplace
- Inside and outside industrial plant and equipment that interface with industrial Ethernet networks
- Remote interface applications such as towers and antennae as well as FTTX in PON and at the home applications
- Mobile routers and internet hardware

Rugged Circular Connectors

EMPIRE

Product Facts

- Facilitates the implementation of fiber sensors within composites
- Protection of fiber at composite entry/exit point
- Receptacle connector physically embedded within composite material
- Available as panel edge or surface mount configuration

A unique, patent pending Fiber Optic connector technology that allows designers to reliably connect embedded optical fibers to external monitoring equipment, eliminating the problems of fixed 'flying lead' connections to the structure. See TE.com for additional information.

Fiber Optic Cable Assemblies and Harnesses

Product Facts

- Custom designs available
- Custom lengths for harnessing
- Dedicated Fiber Optic harness facility
- Capability to work closely with customer to fully define requirements

TE also has dedicated design and manufacturing resources available to provide rugged and reliable Fiber optic harnesses for Aerospace, Military communications, Railways, Autosport and Industrial equipment.

Rugged Board Level Connector

Ruggedized Optical Backplane Interconnect for VITA 66

Product Facts

- Receptacle designed to maximize optical performance
- Connectors accommodate up to two MT ferrules
- Locating post features helps ensure proper position on the backplane and module boards
- Common protective cover is made of anti-static material
- Plug (daughtercard) connector housing contains a slot feature to facilitate cleaning the MT interfaces
- Receptacle (backplane) connector includes two robust guide pins for blindmating
- Receptacle connector insert floats relative to the shell, providing ±0.25mm planar floating alignment capability
- Connector mounting screws contain pre-applied Nylok patch to withstand vibration

Mechanical

Mating Force (per 12-fiber MT ferrule) – Min: 7.8N [1.75 lb] Max: 11.8N [2.65lb]

Durability – 100 cycles, tested per EIA-455-21

Shock – 50G, sawtooth, 11 msec pulse duration, tested per TIA/EIA-455-14, condition E

Random Vibration – 11.95 G (rms), 50-2000 Hz, 2 hrs per plane - tested per TIA/EIA-455-11, test condition V1-D

Materials

(RoHS-compliant)

Connector shell & housing -

Aluminum alloy 6061, clear-chromate conversion-coated (RoHS compliant)

Alignment posts & screws – Stainless Steel, 300 series, passivated TE Connectivity's (TE)
Ruggedized Optical
Backplane interconnect
system provides a high-density, blind-mate optical
interconnect in a backplane/daughtercard
configuration. The fiber
optic (ribbon) cable

interconnect is fedthrough the backplane to removable system modules using MT ferrules.TE offers the optical system in both a receptacle (backplane) and matingplug (daughtercard) connectors which interconnect up to two MT ferrules, each accomodating up to 24 fiber paths. Other options are available using industry standard ARINC 801 fiber terminus and TE's Expanded Beam, Pro Beam interface in a four-fiber configuration.

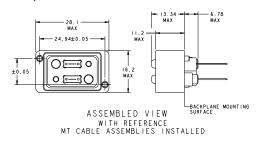

Key Features

- Receptacle designed to maximize optical performance
- Connectors accommodate up to two MT ferrules
- Locating post features helps ensure proper position on the backplane and module boards
- Common protective cover is made of anti-static material
- Plug (daughtercard) connector housing contains a slot feature to facilitate cleaning the MT interfaces
- Receptacle (backplane) connector includes two robust guide pins for blind-mating
- Receptacle connector insert floats relative to the shell, providing ±0.25mm planar floating alignment capability

 Connector mounting screws contain pre-applied Nylok patch to withstand vibration

Navy CID Approved Epoxy Applied

Tight Jacketed LC Connectors

Product Facts

- Multimode or singlemode
- Simplex or duplex
- Tested using MIL-PRF-85045/16 2.0 mm cable
- LC Commercial Item
 Description (CID) interim
 approval by the Naval
 Surface Warfare Center,
 Dahlgren Division

Application

- In Flight Networks
- Shipboard Applications
- Aero Market

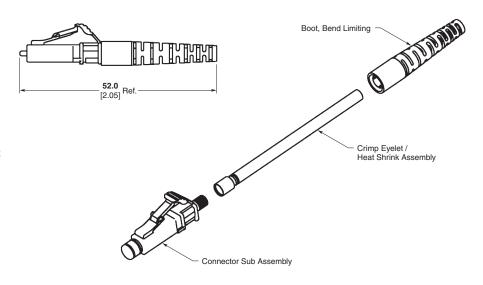

The Tight Jacket LC Connector is a robust design for rugged applications including but not limited to:

- Extreme temperatures -55°C to +110°C
- Excessive vibration or physical shock

Test reports available upon request.

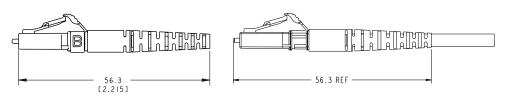

The tight jacketed LC Connectors are non pullproof versions of the standard connectors that are designed for use with tight construction cable. Unlike standard connectors, this design allows the jacket and buffer to move together, reducing the chances of micro-bends and fiber breakage.

| Fiber Type | Kit Part Number | Description |

Note: X = -1 for individual package, -2 for bulk package. Instruction Sheet 408-10015. See http://www.te.com/documents.

Note: All part numbers are RoHS compliant.

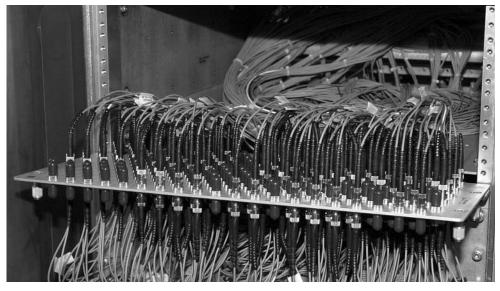

LC Plus — Navy Approved

LC, SC and LightCrimp Plus ST Approved by U.S. Navy for Use On Board Ships LightCrimp Plus ST Fiber Optic Connector Features and Benefits:

- LightCrimp Plus technology delivers the ability to terminate the fiber optic ST connector with mechanical tools by the ferrule being factory polished and terminated to the connector body
- The mechanical process enables a simple strip, clean, cleave crimp process that improves process time and eases the complexity of the installation

Termination Kits:

■ The LightCrimp Plus MM ST part 2064757-1 has a dedicated termination kit, part number 2064764-1, suggested for its implementation. TE provides a wide variety of tools required to prepare and terminate LightCrimp Plus ST connectors.

Whether you're designing local area networks, communications systems or equipment, innovative fiber optic applications begin with innovative fiber optic products. TE Connectivity offers a complete line of fiber optic products to help your designs make light work for you.

TE's comprehensive fiber connector line delivers virtually all industry-standard connections, including LightCrimp Plus ST-Style and epoxy applied Tight Jacketed LC and SC and many others. They bring fiber to the desk at a cost that is competitive with copper.

LightCrimp Plus ST Fiber Optic Connectors

TE LightCrimp Plus ST-Style connectors are available in single or multimode configurations and can be crimped to the fiber. Any, they can install in under two minutes, without epoxy.

TE recently obtained approval from the U.S. Navy for its Multimode LightCrimp Plus ST Connector. This connector has been added to the "Navy Recommended Fiber Optic Components Parts List" located at https://fiberoptics.nswc.navy.mil/,

and is currently listed under the TE part number (2064757-1). In addition, it is listed under the CID number A-A-59917. This approval is the latest in this series and joins the approved status of the LC and SC tight construction epoxy optic connectors listed on the components parts list.

LightCrimp Splice

Product Facts

- Terminates 250 µm coated, 900 um tight-buffered fibers and 2.0 mm jacketed cable
- Attenuation (typical): ≤ 0.1 dB
- Return Loss (at ambient; 18°-28° C):
 - ≥ 20 dB multimode \geq 35 dB single-mode
- Operating Temperature: -25 to 70° C
- Storage Temperature: -40 to 85° C
- **■** Tensile retention: 2.0 N 250 µm coated: 900 µm buffered: 3.0 N 50.0 N Jacketed:
- Fast, easy fiber splicing
- No epoxy required
- No set-up required
- No workstation required
- Ideal for low-fiber count cables
- Same LightCrimp Splice for single-mode and multimode 125 µm diameter fibers
- Kit includes rugged case

LightCrimp splices provide rugged, miniaturized form-factor that assures consistent crimp quality, dependability, and performance that rivals fusion splices. LightCrimp splices have been tested in accordance with IEC 61300 pro-

LightCrimp splices have been designed to meet TIA 568-C.3, IEC 61753 Cat U, and EN optical requirements.

LightCrimp splices provide the proven performance based on technology used to install more than one million LightCrimp Plus connectors.

Offshore Optical Connectors and Cable Assembly

9316 Optic

Product Facts

- Dry Mate connection
- Explosion proof area
- Multiway up to 12 FO
- Operating pressure up to 40 bar
- Single or Multimode fibers can be combined
- Backshell custom design available

9316 series has been designed to withstand the most severe environments in marine and offshore applications.

A special care was taken concerning:

- Easy handling
- Mechanical stress
- Use in polluted environments
- Use in harzardous areas

Showet

Product Facts

- Hybrid product 4 FO and 4 copper contacts
- SplashZone connector
- Operating pressure up to 80 bar
- Single or Multimode fibers can be combined

Combines optical and copper connectivity in a single shell. Supporting both signals and control copper cabling and single-mode and multimode optical fibers to allow the replacement of multiple connectors by one.

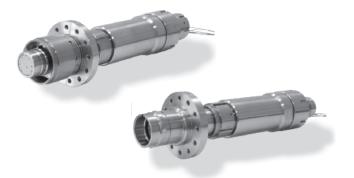

MOD

Product Facts

- **■** Explosion proof area
- SplashZone connector
- Multiway up to 8 FO
- Operating pressure up to 40 bar
- Single or Multimode fibres can be combined

MOD is an explosion-proof connector suited to topside application, quick connect/ disconnect coupling for reliable operation in hazardous environments such as FPSO turrets.

D03000

Product Facts

- Optical Subsea Wet Mateable
- ROV, Bulkhead, Stab plate and Diver versions
- Custom design available
- Back Reflection <-45dB
- Insertion loss < 0.5dB
- 100 matings
- Single or Multimode fibers can be combined

D03000 is a high performing choice for optical applications requiring up to 12 channels and the ability to withstand operational water depths to 4500 m.

Optimized for Subsea Fiber Optic Distribution systems and connections to Subsea Trees.
