The Tools to Make Every Connection Count

Raychem Application Tooling
The Tools to Make Every Connection Count

HIGH QUALITY

- Manufactured to TE Connectivity's strict quality standards

- Tools are designed to make every job easy and trouble-free

- Made from the highest quality materials for low cost of ownership

EASY TO USE

- Designed and developed with the operator in mind

- Convenient, easy to use features make installations faster and easier

- More choice in tooling, from simple hand tools to advanced, automatic operation

APPLICATION SPECIFIC

- Tools offered by TE are designed to aid in the installation of TE wire and cable products

- Decades of experience are applied to the development of all TE installation tools

- Choose from a wide range of tools for any cable management task

TE Connectivity (TE) offers a variety of dependable hand and bench-mount tools for crimping Raychem devices and heating heat-shrinkable products. The tools help give you more accuracy in terminations—increasing productivity, reducing rework, and taking the guesswork out of procedures. With easy-to-use controls and ergonomic design, Raychem tools help make the job go faster and easier.

Raychem AD-1377 Hand Crimping Tool

VERSATILE

- Crimps MiniSeal splices, covering a wire range from 26 to 12 AWG

- Ratchet-controlled release handle

- Pre-set crimp depth that provides the optimum combination of tensile strength and insulation integrity in the finished splice

HIGH PERFORMANCE

- Built-in ratchet system ensures full cycling of the tool and prevents early release

- Designed for an easy and smooth effort to achieve the crimp

- Inside cavities are polished to bring maximum reliability to the crimping operation

QUALIFICATIONS

- Tool: MIL-DTL-22520/37-01

- Calibration Gauge: MIL-DTL-22520/39-01

AD-1377 Hand Crimping Tool
Tool is used for crimping wire terminations with MiniSeal splices.

AD-1377-CRIMP-TOOL-3-CVTY
MIL-DTL-22520/37-01

The Raychem AD-1377 crimp tool from TE is designed for MiniSeal splices. It has a pre-set crimp depth that provides the optimum combination of tensile strength and insulation integrity in the finished splice. The ratcheted release ensures full closure of the tool to help prevent undercrimping.

The tool is calibrated with standard gauge pins or with TE calibration gauge AD-1386. The drawing supplied with the tool defines appropriate cavity dimensions as diameters for the "Go" and "No Go" conditions.

Raychem AD-1522-1 Hand Crimping Tool

VERSATILE

- Crimps DuraSeal crimp splices, covering a range from 22 to 10 AWG

EASY TO USE

- Ratchet-controlled release handle

- Pre-set crimp depth that provides the optimum combination of tensile strength and insulation integrity in the finished splice

HIGH PERFORMANCE

- Built-in ratchet system ensures full cycling of the tool and prevents early release

- Designed for an easy and smooth effort to achieve the crimp

- Inside cavities are polished to bring maximum reliability to the crimping operation

AD-1522-1 Hand Crimping Tool
Tool is used for completing wire terminations using DuraSeal splices.

The Raychem AD-1522-1 crimp tool from TE can be used on all DuraSeal splices. It has a pre-set crimp depth that provides the optimum combination of tensile strength and insulation integrity in the finished splice. The ratcheted release ensures full closure of the tool to help prevent undercrimping.

The tool is calibrated with standard gauge pins or with TE calibration gauge AE-2245. The drawing supplied with the tool defines appropriate cavity dimensions as diameters for the "Go" and "No Go" conditions.

AD-1381 Hand Crimping Tool
Tool is used to crimp cold-applied gel-filled splices with wires ranging from 26 to 12 AWG.

The Raychem AD-1381 crimping tool from TE terminates cold-applied splices, which are TE's in-line, sealed, crimp splices designed for 150°C applications.

The tool has a pre-set crimp depth that provides the optimum combination of tensile strength and insulation integrity in the finished splice. The ratcheted release ensures full closure of the tool to help prevent undercrimping.

The tool is calibrated with standard gauge pins or with the TE calibration gauge AD-1382. The drawing supplied with the tool defines appropriate cavity dimensions as diameters for the "Go" and "No Go" conditions.

Raychem IR-550/ED-7 Heating Tool and Controller Kit

COMPREHENSIVE

- Controller and foot-pedal-operated portable infrared heating tool

- Controller keypad enables the selection of the operation mode up to 20 stored programmed sequences

EASY TO USE

- Provides reliable installation of SolderSleeve and MiniSeal devices, SolderTacts contacts, and TE heat-shrinkable products

- Controller can be used in a manual or automatic mode

FLEXIBLE OPERATION

- **Manual Mode:** Applies full power when foot pedal is depressed, and removed power when the pedal is released

- **Automatic Mode:** Controls duration and level of power according to a preset sequence stored in memory when foot pedal is pressed and released

IR-550/ED-7 Heating Tool and Controller Kit
Kit is used to install SolderSleeve and MiniSeal devices, SolderTacts contacts, and TE heat-shrinkable products.

The Raychem IR-550/ED-7 from TE provides a convenient portable electric infrared heating tool and controller. This system gives fast, reliable installations of SolderSleeve devices, MiniSeal devices, SolderTacts contacts, and TE heat-shrinkable products.

The foot-pedal-operated, benchtop tool allows both manual and automatic control of the heating tool. In the manual mode, the operator uses the foot pedal to start and stop the heating sequence. In the automatic mode, the power and duration of heating—including varying levels and times in the sequence— allow consistent and precise application of heat. The controller can store up to 20 sequences in memory.

Raychem IR-550 Infrared Heating Tools

CAPABLE

- Designed for fast installation of SolderSleeve terminations, MiniSeal terminations, SolderTacts contacts, and heat-shrinkable tubing

- Controls include a power switch, foot switch, and a handle-mounted switch

- The IR-550-300-MARKIII-CE unit is CE approved

SAFE OPERATION

- Fan keeps external surfaces cool and allows for long-duration heating

- Thermostatic switch helps protect from overheating

- Optical filter helps reduce glare from the lamp for safer observation

- A 30-degree base reduces eye strain and glare to others working nearby

CONVENIENT

- Viewing window enables viewing of the heating process

- Foot switch or handle switch operation

- Designed primarily as a benchtop heating tool

IR-550-50-MARKII-HT-TOOL - 120 V

IR-550-300-MARKIII-CE - 230 V

IR-550-50-MARKII-HT-TOOL (120 V) IR-550-300-MARKIII-CE (230 V)

The Raychem IR-550 heating tool from TE is a portable electric infrared heating tool designed for fast, reliable installation of Raychem SolderSleeve terminations, MiniSeal terminations, SolderTacts contacts, and heat-shrinkable tubing.

The IR-550 heating tool can be used as a hand tool, but is primarily designed as a bench-top heating tool. As a hand tool, it is operated using a switch on the handle. As a bench-top heating tool, it can be operated by either a foot switch or handle switch.

A halogen lamp provides the radiant heat source, and reflectors focus the heat from the lamp to concentrate it within the work area of the front reflector. Interchangeable front reflectors are designed for specific product applications.

An optical filter between the lamp and the work area reduces the glare from the lamp, allowing the operator to observe the heating process. The tool also has a viewing window to further reduce glare. The 30-degree base has been designed to further reduce eye strain and glare to others working nearby.

The IR-550-50 is a single unit containing both controls and infrared tool. For the IR-550-300, the control box and infrared tool are separate units.

Specifications

Raychem Mini-Ray MK5 Infrared Heating Tool

CONVENIENT

- Portable, lightweight and convenient for use where workspace is constrained

- Product being installed is visible during the heating cycle

- Available as a complete kit, comprised of manual control box, hand tool, AT3130 reflector and spare bulb

SAFE AND EFFICIENT

- Heat energy is derived from a tungsten halogen lamp and focused onto the product with a reflector

- Optical filter eliminates unwanted UV emissions and excess visible light, reducing glare for the operator

- UL Approved

EASY TO USE

- Hand-held unit with simple trigger operation

- Options available for products up to 9 mm diameter

- Tool can be used with either 230 V or 110 V (nom.) power supply

RoHS Compliant

ROHS Information can be found at the following website: http://www.te.com/customersupport/productcompliance/

This product must not be disposed of as municipal waste.

Mini-Ray MK5 Infrared Heating Tool
Tool is designed for installing SolderSleeve termination products up to 9 mm diameter.

IR1759-MK5-AT3130-ED-CONT

The Raychem Mini-Ray MK5 tool from TE is a hand-held infrared heating tool designed for use in installing TE's SolderSleeve termination products. The tool is portable, lightweight and convenient for use where workspace is constrained.

The hand tool is fan cooled and has low heat emission, as the lamp is only energized on demand. The heat energy is derived from a halogen lamp and is focused onto the product by means of the reflector design.

The IR1759-MK5 standard aperture is recommended for products up to 6 mm diameter, and the IR-3104-MK4/A large aperture for installing products up to 9 mm diameter. This version of the tool will accept larger diameter components, but uniform heating cannot be assured.

The Raychem ED-7 controller is a simple unit, with no variable time or variable power memory functions. It maintains power to the lamp for as long as the tool's trigger switch remains depressed. The controller can be used with either 230 V or 110 V supply voltage.

NOTE: Control unit ED-7-CONT-230/110V-MK5 is used with the IR-1759-MK5-GUN and cannot be used with or fitted to other existing Mini-Ray systems (such as 1759-MK4/A and IR-3104-Mk4/A hand tool).

Specifications

HEATING TOOL

- **Supply Voltage:** 24.0 VAC Nom.
- **Typical Operating Temperature:** 600°C @ 10-second operation
- **Typical Heating Time**: 15 to >70 seconds
- **Lamp:** 250 W tungsten halogen, 800 cycles
- **Noise:** 51 dB (A)
- **Weight:** 1.1 kg (2.4 lb.)
- **Power Cord Length:** 3.1 m

Raychem Mini-Ray MK4 Heating Tool Systems

SAFE AND EFFICIENT

- Product being installed is visible during the heating cycle

- Optical filter eliminates unwanted UV emissions and excess visible light, reducing glare for the operator

- Heat energy from a tungsten halogen lamp is focused onto the product with a reflector

VERSATILE

- Controller can be used in a manual mode with the trigger switch or by pre-set time and power

- Up to 20 memory locations are available for the storage of time/power values

COMPONENTS

- The ED-7-Cont-230 V/110 V controller is a simple unit, with no variable time or variable power memory functions

- The ED-7-001/002 control units provide controls for both power and time, and are suitable where the use of pre-set installation conditions is required

- The ED-7-Batterybox controller is designed for remote areas, and can install approximately 50 x 30 second installations before recharging

COMPLETE

- A kit product is available, comprising manual control box, hand tool, AT3130 reflector and bulb

Mini-Ray MK4 Infrared Heating Tool
Designed for installing SolderSleeve termination products up to 9 mm diameter.

IR-1759-MK4/A, IR-3104-MK4/A ED-7-001/002, ED-7-CONT-230 V/110 V ED-7-BATTERYBOX-230 V/110 V

The Raychem Mini-Ray MK4 tool from TE is a hand held infrared heating tool designed for use in installing SolderSleeve termination products. The tool is portable, lightweight and convenient for use where workspace is restricted.

The hand tool is fan cooled and has low heat emission as the lamp is only energized on demand. A duty cycle up to 50% is permissible with a maximum heating time of 50 seconds. With the ED-7-Cont and ED-7-Batterybox, this duty cycle is fixed within the controller software.

The controllers have a new software feature that improves filter and bulb life. The heat energy is derived from a halogen lamp and is focused onto the product by means of the reflector design. The IR-1759-MK4/A standard aperture is recommended for products up to 6 mm diameter and the IR-3104-MK4/A large aperture for products up to 9 mm diameter. This version of the tool will accept larger diameter components, but uniform heating is not then assured.

Note: Current optical filters still fit the older MK III tools.

Raychem CV2014 Series ThermoGun Heating Tool

SPACE AND WEIGHT EFFICIENT

• Ultra compact design

• Lightweight: 600 g (1.32 lb.)

POWERFUL

• Produces temperatures to 650°C

• Electronic steplessly controlled temperature

• Electronic steplessly controlled airflow

• Electronic heating element protection

SAFE

• Low noise

• Built in stand

• UL Approved

CV2014 Series ThermoGun Heating Tool
Tool is used for installing TE heat-shrink tubing and SolderSleeve terminations, and for making cable repairs.

CV2014-JETS-120V460W-UL
CV2014-JETS-230V460W-EU
CV2014-JETS-230V460W-UK

The small, but powerful Raychem CV2014 hot air gun is capable of producing temperatures of up to 600°C. It can be used for installing heat-shrink tubing, SolderSleeve devices, and cable repair products.

PR Reflectors as shown below can be used with a reflector adapter.

Specifications

POWER

• **Voltage:** 120 V (US models) or 230 V (UK/EU models)
• **Power Consumption:** 460 W

AIR

• **Air Flow (@ 20°C):** 20 to 80 l/min

TEMPERATURE

• **Temperature Range:** 40°C to 650°C

DIMENSIONS

• **Size (L x ø):** 235 mm L × 70 mm dia., 9.25″ L x 2.75 dia. Handle is 40 mm (1.6″) dia.

WEIGHT

• 0.6 kg (1.3 lb.) (with 3 m cord)

Raychem CV1981 and CV1983 Series ThermoGun Heating Tools

VERSATILE

- Heavy-duty bench or hand held hot air tool

- Intelligent e-Drive operating unit

- Digital temperature indicator (AT models) for easy adjustment to product requirements

CAPABLE

- Wide temperature range: 40°C to +650°C

- Precise temperature control on AT models allows tool temperature to be matched to the heat-shrink product's requirements

- Closed-loop controlled temperature

- Open-loop controlled air volume

SAFE

- Ergonomic handling

- Modern design

- Safety guard

CV1981 and CV1983 Series ThermoGun Heating Tools
ThermoGun heating tools are used for installation of TE heat-shrink products, molded parts, and SolderSleeve terminations.

CV1981 Series ThermoGun Heating Tool
CV1983 Series ThermoGun Heating Tool

Raychem CV1981 and CV1983 Series ThermoGun heating tools from TE are intelligent, robust, double insulated heavy-duty tools. The tools use an internal thermocouple to ensure accurate output temperature.

CV1981 AT model use closed-loop control to ensure that the set value is achieved even while supply voltage varies slightly. The digital display shows set temperature and measured temperature simultaneously. AT models also feature adjustable airflow.

A motor-driven fan forces air through the heating element, which is enclosed in a stainless steel barrel and safety guard. The tool is fitted with power control, to allow for adjustment of output temperature. An integral stand allows the tool to be used as a bench tool.

The heating tool is available in a variety of models and is suited to a wide range of heat-shrink applications. The various PR Series push-on reflectors are easily and quickly attached to the gun.

Raychem Heat Guns
Tools are designed for installation of TE heat-shrink products and SolderSleeve devices.

HL1920E
HL2020E

HL1920E

The HL1920E heat gun is a powerful, electronically controlled hot air gun with temperature control and cool air stage. The switch, located on the grip handle, is used for setting temperature and airflow. The heat gun can be conveniently operated using one hand.

Temperature range 50°C to 600°C @150/300/500 l/min.

Both tools are suited for heat-shrink products and SolderSleeve devices.

HL2020E

The HL2020E heat gun from TE is a microprocessor-controlled, high-end heat gun with temperature control, LCD display, and cold air stage. The heat gun features a joystick for making temperature adjustments, and the current working temperature is identified on an LCD display.

Temperature range: 80°C to 630°C in 10°C steps @150/300/500 l/min.

Raychem AA-400 Super Heater Compressed-Air Heating Tool

APPLICATIONS

• For installing heat-shrinkable tubing in confined spaces

• Small SolderSleeve devices

• Devices (wire-to-pin applications)

• SolderTacts contacts

VERSATILE

• Very focused heat

• Wide variety of reflectors available

• Excellent tool for small items and confined areas

EASY TO USE

• Automatic power cut-off switch to protect heating element if air flow is interrupted

• Pressure regulator and gauge for adjusting air flow and temperature

• Indicator light to show when power is applied to heating element

AA-400 Super Heater Compressed-Air Heating Tool
Tool is used for installing heat-shrinkable tubing and devices.

Raychem HT-900B Compressed Air Nitrogen Heater Tools

CAPABLE

• 290°C to 495°C temperature range

• Compressed air/nitrogen 80 to 200 psi

• Regulated air/nitrogen through the hose

• Air/nitrogen monitored by small sensing hose

EASY TO USE

• Temperature is controlled by the controller setting and on thermo-couple feedback

• On/Off power switch handle with overload protection controls electrical supply

SAFE

• Automatic shutdown if air supply falls below 5.0 psi

• Compressed air/nitrogen runs through four orifices to cool handle of tool

• Power on light for unit

• Heated air light for heating element

HT-900B Compressed Air Nitrogen Heater Tools (Available in the US only)
Tools are used for the field installation of heat-shrinkable insulation and termination products.

HT-900B-1-HT-TOOL-YELLOW (115 V)
HT-900B-30-HT-TOOL-OLIVE (115 V)
HT-920B-10-HT-TOOL-YELLOW (230 V)
HT-920B-1-HT-TOOL-OLIVE (230 V)

The Raychem HT900B compressed air/nitrogen heating tool from TE supplies a stream of heated air or nitrogen to aid in the field installation of heat-shrinkable insulation and termination products.

The heating tool consists of a heat gun and a control module. The tool comes with hot air reflectors, a spare heating element, thermocouple, and operating instructions. The heat gun is permanently attached to the control module by a hose assembly, which contains air hoses and electrical wires.

The compressed air/nitrogen heating tool operates by passing a stream of air or nitrogen through an electrical heated element located in the body of the heat gun.

Specifications

ELECTRICAL

• **HT-900B:** 115 VAC, 50-400 Hz, single-phase, 7 A
• **HT-920B:** 220 VAC, 50-400 Hz, single-phase, 3.5 A

Raychem AD-5000 Installation Tool

EASY TO USE

- Designed specifically to install Tinel-Lock ring screened terminations in the correct position

- Tinel-Lock rings have thermochromic patch to aid in consistent installation

- Thermochromic patch color changes to black to provide visual verification of correct installation

- Tool switches off when pressure on jaws is released

FAST

- 5 to 15-second typical installation time for a Tinel-Lock ring

- Simple line-up and squeeze-handle installation

VERSATILE

- Accommodates Tinel-Lock rings from size TR04 to TR24 inclusive

- Various electrode types can be used to install other Tinel-Lock ring sizes and types

AD-5000 Installation Tool
Tool is used to correctly position and install size TR04 to TR24 Raychem Tinel-Lock rings in screened terminations.

AD-5000-TINEL-ASSY

The AD-5000 tool is a manually operated resistance-heating tool designed to install Raychem Tinel-Lock rings in screened terminations. Intended for small batches, the tool makes it easy to consistently and quickly install Tinel-Lock rings. Machine cycle time is typically 5 to 15 seconds, depending on ring size and braid type on the termination.

The tool accommodates Tinel-Lock rings from size TR04 to TR24. Various electrode (jaws) types can be used to install other ring sizes and types.

Specifications

POWER

- **Supply:** 220–240 V, 50 Hz
- **Main Fuse:** 240 V, 2 A (Type T) Anti-surge
- **System Noise:** Silent operation

DIMENSION

- 340 x 320 x 170 mm (13.4″ x 13″ x 6.7″)

WEIGHT

- 4.2 kg (9.5 lb.)

Ordering Information

A complete tool includes the hand tool assembly and electrodes. Three types of electrodes are available:

• Standard electrodes are used for Tinel-Lock rings, sizes TR04 through TR24

• Conduit electrodes are used when terminating Tinel-Lock rings on conduit or double braids

• Square profile electrodes are used with TC02 and TC03 rings

Tinel installation tool AD-5000-TINEL-ASSY includes both the hand tool assembly (AD-5000-TINEL-HAND-TOOL) and standard electrodes (AD-5000-TINEL-STD-ELECT).

Raychem AD-5020 Installation Tool

CONVENIENT

- Designed specifically to install Tinel-Lock ring screened terminations in the correct position
- Foot pedal operated on and off
- Controller "POWER OUTPUT" is adjustable from 80% to 100%

EASY TO USE

- Ring's thermochromic patch color changes to black to provide visual verification of correct installation
- Tool switches off when foot pedal is released

FAST

- 5 to 15-second typical installation time for a Tinel-Lock ring
- Simple line-up and press foot pedal switch installation

AD-5020 Installation Tool for Tinel-Lock Rings
Tool is used to correctly position and install size TR04 through TR24 Raychem Tinel-Lock rings in screened terminations.

AD-5020-TINEL-HAND-TOOL-230V
EG1245-000

The AD-5020 tool is a manually operated resistance-heating tool designed to install Tinel-Lock rings in screened terminations. Intended for small batches, the tool makes it easy to consistently and quickly install Tinel-Lock rings. Machine cycle times typically 5 to 15 seconds, depending on ring size and braid type on the termination.

The tool accommodates Tinel-Lock rings from size TR04 through TR24. A foot pedal is used to cycle the tool on and off.

Specifications

POWER

- **Supply:** 220–240 V, 50 Hz
- **Main Fuse:** 230 V, 4 A (Type T) Anti-surge
- **System Noise:** Silent operation

DIMENSIONS

- 160 x 120 x 250 mm (6.3" x 4.7" x 9.8")
- **Power Lead:** 1.3 m (51")
- **Foot Pedal Lead:** 2 m (78")

WEIGHT

- 7.9 kg (17.4 lb.)

RH-3960 and RH-3965 Tinel-Lock Installation Tools

RH-396X Tinel-Lock Installation Tool
Tool is designed specifically to install TE Connectivity's Tinel-Lock rings for screened terminations.

RH-3960-1-TINEL-KIT-120V
RH-3965-1-TINEL-KIT-220V

The RH-396X manually operated resistance heating tool is designed specifically to install TE Connectivity's Tinel-Lock rings for screened terminations. Available in 120 V and 220 V versions, it is designed to accommodate our Tinel-Lock rings from size TR04 through TR24 inclusive.

The tool makes it easy to install Tinel-Lock rings consistently and quickly. The operator uses the hand-held tool to install the Tinel-Lock ring in its correct position on screened terminations. The ring has a patch of thermochromic paint, which turns to a black color upon successful installation.

The operator positions the ring on the termination, ensuring that the patch of thermochromic color is visible. The jaws of the installation tool are then clamped onto the ring to start the installation. When the thermochromic paint turns black, installation is complete.

The RH-396X Tinel-Lock ring installation tool is available in North America and Asia Pacific only.

Specifications

POWER

• **Supply:** 250 W/2.8 VAC

TRANSFORMER DIMENSIONS

• 260 mm x 210 mm x 165 mm (10.25" x 8.25" x 6.5")

WEIGHT

• 3.18 kg (7.0 lb.)

Ordering Information

Recommended for installing Tinel-Lock rings TC series and TR04 thru TR20.
A complete tool includes the hand tool assembly and electrodes.

• Standard electrodes are used for Tinel-Lock rings, sizes TR04 through TR24
• Resistance Heating Tool: 915088-01
• Use with American Beauty Transformer 105-A12 (110 V) or 105-A12-220V (220 V) and Foot Switch 10519

Raychem Underwater Cable Splice Kit
Tool is used for jointing of TE specified polyethylene jacketed cables.

UWCS-AT3535-110V
UWCS-AT3535-220V

The Raychem underwater cable splice (UWCS) from TE is suitable for jointing of TE specified polyethylene jacketed cables, which are subject to water immersion and pressure.

The splice consists of molded polyethylene inserts, which are encased in a heat recoverable sleeve. The joint is placed in **a purpose-made oven**, which melts the joint components with the cable jacket and, when cooled, gives a water- and pressure-tight joint with the insulated conductor connections embedded within it.

Raychem AD-1319-9 Holding Fixture

EASY TO USE

• Holding fixture simplifies and speeds installation of terminations and splices

• Two lateral clamps, simple to adjust and align

• Fixture secures wire or cable for consistent installation

VERSATILE

• Designed for use with Raychem heat-shrinkable devices

• Adjustable jaws set distance between clamps

AD-1319-9 Holding Fixture
Tool is used to quickly and accurately install Raychem heat-shrinkable devices.

AD-1319-9

The AD-1319-9 holding fixture is a tool that simplifies and speeds installation of Raychem devices. The fixture contains two wire clamps that are easily adjusted to center and secure the wire or cable for installation.

Specifications

DIMENSION

• 180 x 150 mm (7″ x 6″) approx.

WEIGHT

Selecting the Equipment Needed To Install TE Connectivity Heat-Shrinkable Products

Selecting the proper tool is very important in order to ensure correct and efficient installation.

Our application equipment has been designed, selected, and engineered for maximum production efficiency, providing optimal heating temperatures, performance and control features.

TE has developed installation Codes of Practice and Product Installation Procedures that give instructions to our customers in the correct methods for successfully installing our heat-shrinkable products. These are either available as stand-alone documents, or are incorporated into the product drawings themselves.

Below are listed some of our heat-shrinkable products along with the recommended tooling that can be found within this catalog. Please note that there are some tools that can be used for the installation of several of our product families, such as our various types of heat gun.

In order to ensure the correct and focused delivery of heat, reflectors are recommended and available in a variety of sizes. For more details, see the Codes of Practice and Product Installation Guides, or contact your TE representative.
