

# REFLOW CAPABLE UNIVERSAL MATE-N-LOK CONNECTORS

Designed for customers who intend to streamline manufacturing processes with simple reflow soldering of PCB assemblies.

The reflow capable universal MATE-N-LOK product line builds on a tested solution for wire-to-board applications. The thermoplastic housing is designed to withstand high temperatures associated with reflow soldering. This allows for easy transition to a full reflow assembly process.

Headers are designed with polarization features and a low contact mating force, allowing for easy mating. The standard .250" centerline allows for mating with TE's existing universal MATE-N-LOK wire-to-board connectors.
