The model 8711-01 are internally shielded rugged IEPE accelerometers designed for industrial condition monitoring. The accelerometers are available in four standard dynamic ranges from ±5g to ±80g and have a wide bandwidth up to greater than 10kHz.

The model 8711-01 accelerometers feature a top exit MIL-C-5015 connector and are designed to operate in ambient temperature ranges from -55°C to +125°C.

For a side exit form factor with same performance specifications, TE Connectivity also offers the model 8021 industrial accelerometer.

For wind turbines and other elevated installations that could be exposed to lightning strike, the model 8811-01 should be selected with 5,000V protection rating.

Performance Specifications

All values are typical at +24°C, 80Hz and 4mA excitation unless otherwise stated. TE Connectivity reserves the right to update and change these specifications without notice.
