**VOLINSU TUBING: EVSW**

**ELECTRIC VEHICLE, SINGLE WALL TUBING (EVSW)**

Orange single wall tubing has been specifically designed for the use within the vehicle electrification market.

EVSW has been designed from a flame retardant material with excellent electrical properties, alongside excellent insulation combined with the benefits of a heat shrink tube to allow use over both simple and intricate shapes. Based on other automotive applications the materials selected have proven use in many applications, creating a strong performance base to create a dedicated solution for the electric vehicle market.

EVSW tubing can be installed using conventional application equipment such as a hot air gun, a conveyor oven or air circulation oven. The product has a low shrink temperature so excessive heating is not required as it can cause damage to the product. Finally the EVSW tubing can be used in applications up to 135°C (275°F), with a short time excursion of up to 200°C (392°F).

**TEMPERATURE RATING**

- Full recovery temperature: 90°C (194°F)
- Continuous operating temperature: -55°C to 135°C (-67°F to 275°F)
- Minimum shrink temperature: 70°C (158°F)

**PRODUCT PERFORMANCE**

- **High level safety**
  - High volume resistivity.
  - Testing conducted in accordance to ASTM D2671.
- **Improved thermal and copper stability**
  - Excellent color stability
  - No cracking
  - Competitor tested EV heat shrink, discolors and cracks.
- **Better softness and flexibility**

**MARKETS**

- Automotive
- Industrial and Commercial Transportation

**SPECIFICATIONS***

- Type: VOLINSU TUBING: EVSW
- Raychem: 108-120071
- Does not propagate burning as specified in UL224 conducted internally at TE

*When ordering, always specify the latest specification file.
