Bring Power & Communication Services to Modular Furniture Systems

4FFATC15 Series Furniture Feed Style Poke-Thru Devices are an excellent solution for feeding power and communication services to modular furniture systems in an open space, above grade floor environment. Every Wiremold® Poke-Thru Device comes with built-in TopGuard™ protection, an industry-leading design that meets and exceeds UL scrub water exclusion requirements for tile and carpet floors. TopGuard protection prevents water, dirt, or debris from entering the power and communication compartments through the service head or floor fittings.

4FFATC15 Series Furniture Feed Style Poke-Thru Devices can be installed on tile, carpet, or wood covered concrete floors in both new or retrofit construction. Typical applications include commercial office buildings, financial institutions, and government facilities.

4FFATC Series

FEATURES & BENEFITS

- **4FFATC15 Flush Style Furniture Feed Series provides one 3/4" [19mm] opening for power and one 1 1/2" [38mm] opening for communication cabling**. Provides largest dual service capacity for furniture feed applications in the industry. UL Listed for both power and communication furniture feed applications.

- **"Step-on-it" installation.** Quick and easy installation without the need for additional fasteners or the need for a second installer.

- **Fire rated for up to 2-hour rated floors.** Maintains the fire classification of the floor.

- Suitable for use in air handling plenums in accordance with Sec. 300-22 (C) of the National Electrical Code.

- **TopGuard Protection.** Integral design component that prevents water, dirt and debris from entering power and communication compartments. Whenever you see the TopGuard protection icon on any Wiremold product, you'll know it meets and exceeds UL scrub water exclusion requirements for tile and carpet floors.

- **UL Listed and UL Fire Classified to U.S. and Canadian safety standards for tile, carpet and wood.**

The above maximum copper cross sectional area values are for each individual power and communication compartment. DO NOT add values together for any one compartment.

CAUTION: These devices meet all UL scrub water requirements, but are not suitable for wet or damp locations, or other areas subject to saturation with water or other liquids such as commercial kitchens.

Concrete Thickness Min/Max:

1-HOUR RATED FLOOR – 2 1/4" [57mm] minimum over top of deck (or 3" [76mm] thick reinforced concrete slab) to a maximum of 7 1/2" [191mm].

2-HOUR RATED FLOOR – 3 1/4" [83mm] minimum over top of deck (or 4" [102mm] thick reinforced concrete slab) to a maximum of 7 1/2" [191mm].

NOTE: The material that is used in Wiremold poke-thru devices is not listed under the directory for Fire Stopping Material because the poke-thru device is UL Classified as "Outlet Boxes and Fittings Classified For Fire Resistance (CEYY)". The pass/fail criteria comes from UL263. The pass criteria is that the poke-thru unit cannot exceed 325° F. above ambient before the concrete slab (or deck) reaches this same temperature. Some poke-thru devices are tested for 2 hours while others are tested for 4 hours. The intumescent material has never been tested as a fire-stopping material as a stand-alone device. This material is designed to work as a unit with the entire poke-thru device.
