Flush Activations for Walker Underfloor Duct Provide New Capabilities and Aesthetic Options

NEW!

FiberOptic / UTP   **Communications**

The New PSRC9 Series of poke-thru style flush service fittings can be applied to multiple Walker Infloor Wire Management Systems using ®Walkerduct Pro Series aftersets 2" [51mm] and above. The fittings can also attach to Walkerduct Pro Series presets 2" [51mm] and higher. They are an excellent solution for bringing single service power or communication directly to the workstation, with multiple fittings required for two or more services at a single location. The fittings are available in a variety of configurations for power, communication and furniture feed applications. The PSRC9 Series delivers the look, quality and functionality desirable in both new and retrofit construction. Applications include commercial office space, educational facilities, libraries and retail stores.
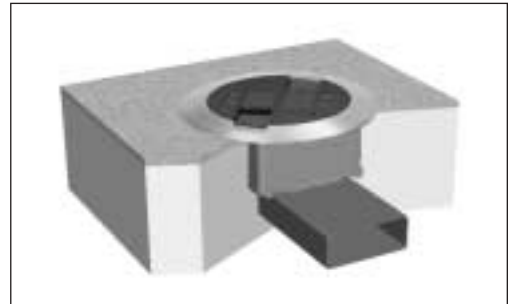

*PSRC9 Series Poke-Thru style service fittings for Underfloor Duct.*

Features & Benefits

- **UL Listed to both U.S. and Canadian safety standards**.
- **Quad power in one fitting**. The design of the PSRC9 Series provides (4) 15A receptacle locations, which can be wired as standard or as isolated ground.
- **Quad communication and furniture feed**. Communication bezels provided accept a wide variety of communication jacks. Furniture feed devices provide 1/2", 3/4" or 1 1/4" and 2" trade size conduit connections.
- **Color matched flanges and slide holde**r. Gray and black flanges feature nonmetallic slide holders in the same color. Provides a consistent, aesthetically pleasing appearance. Brass flange features a black nonmetallic slide holder.
- **New aluminum flange**. Brushed aluminum flange with black nonmetallic slide holder compliments other Walker brushed aluminum service fittings.
- **Flush profile cover**. Provides consistent look throughout buildings featuring multiple wire management systems (UFD or poke-thru systems). Flush cover will not obstruct ability to design an open floor plan.

- **Datacom connectivity options**. Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point of use.
- **Individual slide covers**. Slide covers protect both power and communication devices. Power slide covers snap back into place when receptacle is not in use. PSRC9AMDTC and PSRC9AMDRTTC Series are the only all communication poke-thru style service fittings with slide cover protection when devices are not in use.
- **Meets ADA accessibility guidelines**. Even though ADA does not specifically cover floor boxes or poke-thru style service fittings, the wide trim flange is designed to meet the ADA Accessibility Guidelines as it pertains to ADA Standard 4.5 which addresses changes in ground and floor surface levels. The trim flanges are beveled so the slope is no greater than a 1:2 ratio.
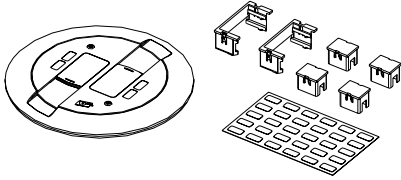

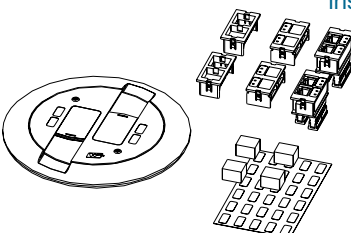

I M P O R T A N T !

The PSRC9 Series Power and Communication styles can be applied to Walkerduct Pro Series presets and aftersets 2"(51mm) and above. The PSRC9 Furniture Feed style can be applied to Pro Series presets and aftersets 1" and above. Refer to ED825 RC700XR Service Fittings for additional poke-thru style service fittings
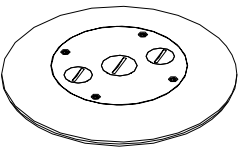

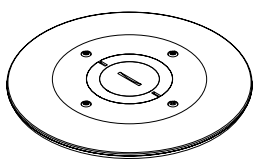

PSRC9TC Series Power Fittings

Datacom Connectivity Options

Now you have a wide range of options for providing datacom connectivity into Wiremold® Cable Management Systems. They are:

- **Ortronics® TracJack® and Series II Modular Connectivity Solutions**
- **Pass & Seymour Activate™ Modular Inserts**
- **Open System Communication Modules**

Use these icons to determine connectivity options for each Wiremold System component:

Ortronics® Connectivity

TracJack® Individual Jack System

- Front-loading, snap-in design supports future moves adds and changes
- Inserts for voice, data, audio, and video
- Available Category 3, 5e, 6, USOC 6-position, and other media
- Choice of 13 colors and color matched to Wiremold Systems
- Universal T568A/B wiring format

Series II Front-Loading, Module System

- Module design features easy snap-in front-loading design
- Linear 110 punch down format for easy termination
- Inserts for voice, data, audio, and video
- Available Category 3, 5e, 6, USOC 6-position, and other media
- Color matched to Wiremold Systems

Open Connectivity Solutions

Wiremold Open System Communications Modules

- Accommodate a wide range of manufacturers' communications outlets including keystone jacks, as well as proprietary solutions from Avaya (Lucent) and NORDX
- Modules insert into a wide range of Wiremold Systems
- Pre-punched faceplates accept common communication devices

NOTE: For more information on integrating connectivity into Wiremold Cable Management Systems contact the Wiremold Applications Engineering Team or your local Wiremold Sales Representative.
