An ALA4800 Series Raceway installation in a laboratory is both functional and aesthetically pleasing.

Architectural Twin Cover Raceway
Available Factory Prewired.

ALA4800 Series Isoduct™ Aluminum Raceway meets the demands of commercial spaces, providing a handsome and effective method of consolidating power and communications cabling. In laboratories, healthcare facilities and upscale office locations, the two-channel, dual-cover aluminum raceway directs power and communication cabling services where required and provides access to one channel at a time.

Features & Benefits

- **Two-Channel, Dual-Cover.** 2 1/4" (57mm) deep aluminum raceway. Accommodates high density communication cabling for networks and phone systems.

- **Snap fit cover.** Provides maximum flexibility for adding or relocating circuits, data openings or electrical devices. Side removal slots limit visibility of any accidental marring during cover removal. Shares cover plates with ALA3800 Series Raceway.

- **Durable, architectural clear anodized finish.** Wipes clean and resists corrosion. Custom colors available upon request. Consult factory for more information.

- **Accommodates standard electrical wiring devices.** Accommodates most installations including single outlets, duplex outlets, NEMA-Locking outlets, GFCI outlets, and Pass & Seymour surge protected outlets.

- **Electrical device identification with self-adhesive polyester labels or optional engraving.** No guesswork or time consuming tracing of circuits. Speeds circuit additions and renovations. (See Device and Raceway labeling Options)

- **Increased productivity for the contractor.** Jobs can be packaged by area, floor, or building and shipped per job site requirements.

- **Mitered standard fittings.** Provides a complete installation.

- **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point of use.

- **UL5 and ADA Compliant.** Raceway and fittings meet UL5 specifications and can be installed in conformance with ADA requirements.

- **UL Listed commercial outlet centers.** File E317375 Multioutlet assemblies rated to 20A maximum can be provided with listed cord and plug assemblies. These assemblies are optimal for mounting to semi-permanent structures such as shelving and rack displays found in many lab applications.

ALA4800 Series Raceway Ordering Process for Prewired Applications

Detailed Submittal The detailed submittal shows exactly how each raceway run will be built (lengths, number and type of receptacles, wiring schematics, circuiting information, etc.). The contractor and/or distributor must review and correct any information not clearly indicated on the drawings or specs, approve and return before production can be scheduled.

Submittal Free The Prewired Express Building Plan Checklist is filled out by the contractor or distributor and sent along with plans, casework, and specs. No submittal is required and the project is scheduled for production upon receipt of all information.
