1. Description

4D Programming Cable is a USB to Serial TTL converter cable, used to program both Firmware/PmmCs and user application code into the range of 4D Systems' modules.

The use of the 4D Programming Cable is required when programming 4D System modules. Use of a 3rd party programming cable could damage your module, and therefore the use of any programming cable or device other than those supplied by 4D Systems is discouraged and will **void your warranty**.
