## Dimensions

## Description

A cable socket in which the brass body is completely insulated from accidental touch. The attractive slimline styling is dark grey in colour, and will allow cables to be mounted either from the end or at right angles.

End mounting is via a removable end plug in the cap with grub screw fixing, whilst right angled mounting allows up to three cables to be soldered in by removing the long tab. A single cable is secured using the grub screw.

The end cap clips securely in place and is available in red or black for polarity indication. The socket will mate with any 4mm plug.
