HIRSCHMANN
A **BELDEN** BRAND

Product: Terminal Cable, RJ45 to DB9 ⧉

The terminal cable enables a local connection from an external management station to the serial interface of a network device.

Product Description

The terminal cable enables a local connection from an external management station (PC with corresponding terminal emulation) to the serial interface of a network device (Ethernet switch, wireless access point or firewall). This gives you the option to set up a connection to the Command Line Interface (CLI) and to the system monitor.
