

Brief Description

The ZSPM1000 is a configurable true-digital singlephase PWM controller for high-current, non-isolated DC/DC supplies. It operates as a synchronous stepdown converter in a single-rail and single-phase configuration.

The ZSPM1000 integrates a digital control loop, optimized for maximum flexibility and stability, as well as load step and steady-state performance. In addition, a rich set of protection and monitoring functions is provided. On-chip, non-volatile memory (NVM) and an I^2C^{TM} interface facilitate configuration.

The PC-based IDT's Pink Power Designer[™] provides a user-friendly and easy-to-use interface to the device for communication and configuration. It can guide the user through the design of the digital compensator and offers intuitive configuration methods for additional features, such as protection and sequencing.

Features

- Programmable digital control loop
- Advanced digital control techniques
 - Tru-sample Technology™
 - State-Law Control[™] (SLC)
 - Sub-cycle Response[™] (SCR)
- Improved transient response and noise immunity
- Protection features
 - Over-current protection
 - Over-voltage protection (VIN, VOUT)
 - Under-voltage protection (VIN, VOUT)
 - Overloaded startup
 - Restart and delay
- Support for SMOD and ZCD drivers
- Fuse-based NVM for improved reliability
- Operation from a single 5V or 3.3V supply
- Optional PMBus[™] address selection without external resistors

Benefits

- Fast configurability and design flexibility
- Simplified design and integration
- Reduced component count through system level integration
- Simplified monitoring for system power and thermal management
- Higher energy efficiency across all output loading conditions

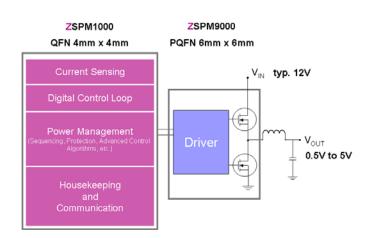

Available Support

- Evaluation Kit
- PC-based Pink Power Designer™

Physical Characteristics

- Operation temperature: -40°C to +125°C**
- V_{OUT} max: 5V
- Lead free (RoHS compliant) 24-pin QFN package (4 mm x 4 mm)
