

#### **DATA SHEET**

# SKY13441: 0.4-2.7 GHz SP10T Switch with GPI0 Interface

#### **Applications**

- 2G/3G multimode cellular handsets (UMTS, CDMA2000, EDGE, GSM)
- Embedded data cards

#### **Features**

- Broadband frequency range: 0.4 to 2.7 GHz
- Single, positive DC power supply (2.5 to 3.3 V)
- Excellent Band 13 2nd harmonic rejection
- Integrated, low-pass harmonic filter for GSM transmit paths
- Integrated GPIO interface
- Any of eight TRX ports can be used for WCDMA transmit/receive or GSM receive functions
- Small MCM (20-pin, 3.2 x 2.5 mm) package (MSL3, 260 °C per JEDEC J-STD-020)

Skyworks Green<sup>™</sup> products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green* <sup>™</sup>, document number SQ04-0074.

#### **Description**

The SKY13441 is a Single Pole, Ten-Throw (SP10T) antenna switch with an integrated General Purpose Input/Output (GPI0) interface and dual low-pass harmonic filters. The switch has eight transmit/receive ports, any of which can be used for WCDMA transmit/receive or GSM receive functions.

Using advance switching technologies, the SKY13441 maintains low insertion loss and high isolation for both transmit and receive switching paths. The switch also exhibits an excellent triple beat ratio and 2<sup>nd</sup>/3<sup>rd</sup> order modulation distortion performance.

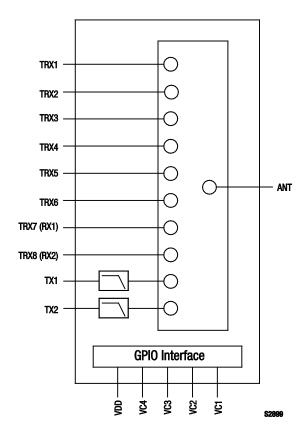

Figure 1. SKY13441 Block Diagram

Switching is controlled by an integrated GPIO interface. Depending on the logic applied to the decoder, the antenna pin is connected to one of ten switched RF ports using a low insertion loss path, while the paths between the antenna pin and the other RF pins are in a high isolation state. No external DC blocking capacitors are required on the RF paths.

The SKY13441 is manufactured in a compact, 3.2 x 2.5 mm, 20-pin Multi-Chip Module (MCM) package.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

| Operating temperature   | Тор    | -30     | +90                                       | °C          |
| Electrostatic Discharge: Charged Device Model (CDM) Human Body Model (HBM) Machine Model (MM) | ESD    |         | *** TBD ***<br>*** TBD ***<br>*** TBD *** | V<br>V<br>V |

**Note:** Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

**CAUTION**: Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

#### **Electrical and Mechanical Specifications**

The absolute maximum ratings of the SKY13441 are provided in Table 2. Electrical specifications are provided in Table 3. Table 4 provides the control logic for the SKY13441.

Typical performance characteristics of the SKY13441 are illustrated in Figures 3 to 13.

The isolation matrices shown in Tables 5 and 6 provide the port-to-port isolation and the antenna-to-port isolation for all available RF states at four different frequencies: 915, 1910, 2170, and 2690 MHz.

The insertion loss matrix shown in Table 7 provides the insertion loss for all available RF states at eight different frequencies: 704, 824, 915, 960, 1710, 1910, 2170, and 2690 MHz.

Figure 14 illustrates the test setup used to measure data for Figure 11. This industry standardized test is used to simulate the WCDMA Band 1 linearity of the antenna switch. A  $\pm$ 20 dBm Continuous Wave (CW) signal, f<sub>FUND</sub>, is sequentially applied to the TRX1 through TRX8 ports, while a  $\pm$ 15 dBm CW blocker signal, f<sub>BLK</sub>, is applied to the ANT port.

The resulting  $3^{rd}$  Order Intermodulation Distortion (IMD3),  $f_{RX}$ , is measured over all phases of  $f_{FUND}$ . The SKY13441 exhibits exceptional performance for all TRX ports.

Table 3. SKY13441 Electrical Specifications (Note 1) (1 of 2) ( $V_{DD} = 2.85 \text{ V}$ ,  $V_{C1} = V_{C2} = V_{C3} = V_{C4} = 0/1.8 \text{ V}$ ,  $V_{DP} = +25 \,^{\circ}\text{C}$ ,  $V_{DN} = 0 \,^{\circ}\text{C}$ ,  $V_{DN} =$ 

| Parameter                                 | Parameter Symbol Test Co |  | Min      | Typical        | Max  | Units          |

#### **Evaluation Board Description**

The SKY13441 Evaluation Board is used to test the performance of the SKY13441 SP10T Switch. An Evaluation Board schematic diagram is provided in Figure 15. A recommended ESD protection circuit diagram is provided in Figure 16. An assembly drawing for the Evaluation Board is shown in Figure 17.

#### **Package Dimensions**

The PCB layout footprint for the SKY13441 is provided in Figure 18. Typical case markings are shown in Figure 19. Package dimensions for the 20-pin MCM are shown in Figure 20, and tape and reel dimensions are provided in Figure 21.

## **Package and Handling Information**

Since the device package is sensitive to moisture absorption, it is baked and vacuum packed before shipping. Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

THE SKY13441 is rated to Moisture Sensitivity Level 3 (MSL3) at 260 °C. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *PCB Design and SMT Assembly/Rework Guidelines for MCM-L Packages*, document number 101752.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.
